

Planners

Planner:

“A lot of the people that are using the system now are starting to see the benefits and realise that we’re not just watching the person and the machine, we’re analysing the data to make improvements to the process, to assist them in their jobs.”

“Our reaction time to problems now is a lot quicker with BP MX, because, like I say, real-time data - I can check the system every two minutes if I wanted to, so as soon as I see a reaction happening on the shop floor I can then react to that and stop it from, or increase it - increase the momentum.”
