

The Titan I Wind Farm

A development venture by BP Wind Energy

- Sponsor: The Titan I Wind Farm is 100% owned by BP Wind Energy.
- Site Location: A 7500-acre site in Hand County south of the town of Ree Heights, South Dakota.
- The Project: Phase I of the project will generate 25 megawatts (MW) and is expected to be online in the first quarter of 2010. When in full operation, the Titan I Wind Farm will generate enough carbon-free electricity to power 7500 average American homes.
- Wind Turbines: Phase I of the development will utilize 10 Clipper C89 wind turbines each with a rated capacity of 2.5 MW. The wind turbines have a hub height of 262 feet and a rotor diameter of 314 feet.
- Transmission: The first phase of the wind farm will tie into an existing above-ground 69 kV NorthWestern Energy transmission line.
- Power Sales: The power from the Titan I Wind Farm has been sold under a long-term power purchase contract to NorthWestern Energy.
- Project Benefits: Phase I of the wind farm is expected to employ approximately 175 workers during peak construction. The project will employ a full-time staff of some 5 individuals who will monitor and maintain the site after Phase I becomes fully operational.

About BP Wind Energy:

BP Wind Energy is one of the leading wind developers in the U.S. with a wind portfolio that includes the opportunity to develop almost 100 projects and a potential total generating capacity of 20,000 megawatts (MW). BP Wind Energy has over 1,000 MW in commercial operation and more than 1,000 MW in an advanced stage of development. For more information please visit our website:
