*Inland demand plus international aviation and marine bunkers and refinery fuel and loss. Consumption of fuel ethanol and biodiesel is also included.

♦Less than 0.05%.

Notes: Annual changes and shares of total are calculated using million tonnes per annum figures.

Differences between these world consumption figures and world production statistics on page 8 are accounted for by stock changes; consumption of non-petroleum additives and substitute fuels; and unavoidable disparities in the definition, measurement or conversion of oil supply and demand data.
