BP EXPLORATION OPERATING COMPANY LIMITED

(Registered No.00305943)

ANNUAL REPORT AND FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2024

Board of Directors: K A H Butler
L A Kingham
R J Eaton
D F Reiter
D W Brown

The directors present the strategic report, their report and the audited financial statements on BP Exploration Operating Company Limited (also referred to as the 'company') for the year ended 31 December 2024.

The company is a member of the bp group of companies whose ultimate holding company is BP p.l.c. The term 'bp group', 'bp' or 'group' in this context and where used elsewhere in these reports and financial statements means BP p.l.c. and its subsidiaries. These terms are used in this report for convenience to refer to one or more of the members of the bp group instead of identifying a particular company or companies.

STRATEGIC REPORT

Principal activities

The company holds investments in subsidiary and associated undertakings and provides services to other group undertakings within the bp group. The company is also involved in the production and selling of petroleum products. Its main operations are located in the United Kingdom (Inside Ring Fence - IRF) and globally (Outside Ring Fence - ORF).

The company also has branches in Ireland, Turkey, Trinidad and Tobago, Russian Federation and UAE, where it is engaged in overseas exploration and production activities. As of 27 February 2022, bp decided to exit its businesses with Rosneft within Russia. This decision did not have a material effect on the company's operations.

Review of the business and results

The key financial performance indicators during the year were as follows:

	2024	2023	Variance
	$000	$000	%
Turnover	2,082,989	2,314,585	(10)
Operating loss	(7,085,097)	(2,489,217)	185
Profit for the financial year	3,450,343	10,005,065	(66)
Total equity	41,956,924	67,144,666	(38)

Turnover decreased by $232 million (10%) during the year mainly due to a decrease of $130 million in oil and natural gas liquids (NGL) revenue and $199 million in gas revenue. This was primarily driven by a decrease in the prices and volumes compared to 2023. The decrease was partially offset by an increase of $97 million in tariff and other income.

During the year the company made an operating loss of $7,085 million. It increased by $4,596 million compared to the prior year. This increase was primarily driven by the higher impairment of investments, tangible and intangible assets and the lower gross margin in 2024 as well as a decrease of the dividends received from the subsidiaries to $8,656 million (2023: $12,393 million). The received dividends were derived from the global operations.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

The profit for the year after taxation was $3,450,343,000 which, when added to the retained profit brought forward at 1 January 2024 of $24,392,663,000, the increase in reserves from reduction in share capital of $20,000,000,000 and after deducting total paid interim dividends to ordinary shareholders of $28,600,000,000, and other reserve movements of $38,065,000, gives a total retained profit carried forward at 31 December 2024 of $19,204,941,000. This excludes exchange adjustments, other reserves and cash flow hedges movement taken directly to reserves.

The other key performance indicators during the year were as follows:

	2024	2023	Variance
	%	%	%
Quick ratio*	87	253	(166)
Return on average capital employed**	8.43	18.13	(9.70)
Gross Profit percentage***	11.89	41.44	(29.55)

*Quick ratio is defined as current assets (excluding stocks, debtors falling due after one year, derivatives and other financial instruments falling due after one year and deferred tax assets) divided by current liabilities.

**Return on average capital employed is defined as profit or loss for the year after adding back interest, divided by average capital employed. Capital employed is defined as total equity plus gross debt, excluding goodwill and cash.

***Gross Profit percentage is defined as gross profit/loss divided by turnover.

Quick ratio decreased by 166% from 2023 to 2024. This decrease was primarily driven by the $28,600 million dividend paid in the year.

Return on average capital employed decreased by 9.70%. Profit for the financial year was $6,555 million lower and total equity decreased by $25,188 million compared to 2023.

Gross profit percentage decreased by 29.55% that reflects a lower turnover, but higher cost of sales in 2024 than in 2023. The decrease was mainly due to the lower prices and volumes in 2024.

In line with the changes to oil and gas price and discount rate assumptions and effect of the Energy Profit Levy tax the company recognized $766 million of impairment charge (2023: $503 million impairment charge) on tangible assets (mainly on Schiehallion, Clair area and ETAP) and $5 million (2023: $1 million) impairment on intangible assets. Please refer to Significant accounting policies: use of judgements, estimates and assumptions for further details on revised price assumption.

Furthermore, $6,825 million impairment has been recognized on investments in various subsidiaries and associates, mainly in BP Exploration (Delta) Limited, BP Mauritania Investments Limited, Britoil, BP Exploration (Alpha) Limited, BP Netherlands Upstream B.V., BP Karabagh Limited and BP Amoco Exploration (Faroes) Limited. Please refer to Note 13 for further details.

During the year, the company recognised loss on disposal of fixed assets of $5 million (gain of $87 million in 2023). The loss was mainly driven by the fair value adjustment on Magnus ($9 million), brought about by lower oil and gas prices and increase in discount rate, along with the decommissioning incentivisation income and the Negative Additional Consideration Amount partially offset by the decommissioning incentivisation at BKR ($3 million).

Profit on sale of operations increased to $420 million (gain of $179 million in 2023) representing bp's strategy to convert and consolidate the existing assets base. In 2024 it was mainly relating to selling of shares in BP Pipelines TAP Limited to AP Pistachio (UK) Limited (Apollo) that resulted in a $415 million gain. In 2023 this primarily related to Exploration (Algeria) Limited ($192 million), sale of bp's Angola business to Azule Energy ($189 million), BP West Aru II Limited ($12 million), Aker BP ($10 million),

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

partially offset by the loss on BP Amoco Exploration (In Amenas) Limited ($226 million) and other smaller movements.

The company received $8,656 million (2023: $12,393 million) dividends from its subsidiaries, comprising BP Exploration (Delta) Limited ($2,460 million), BP Exploration Epsilon Limited ($2,000 million), BP Exploration Azerbaijan Limited ($1,500 million), BP Exploration (Caspian Sea) Limited ($660 million), BP Pipelines SCP Limited ($550 million), Britoil Limited ($500 million), BP Holdings Iraq Limited ($350 million), BP Pipelines TAP Limited ($318 million), BP Pipeline (TANAP) Limited ($100 million), BP Atlantic 2/3 Holdings Limited ($100 million), BP Kuwait Limited ($100 million), BP Amoco Exploration (Faroes) Limited ($77 million) and BP Iraq N.V. ($18 million).

The company received $703 million (2023: $928 million) dividend from associated undertakings, comprising Aker BP ASA ($463 million) and BP Azule Holdings Limited ($240 million) in 2024.

Tax credit for 2024 of $337 million relates to a current tax charge of $353 million and a deferred tax credit of $690 million.

The current tax charge is split between Energy Profit Levy of $164 million and corporation tax of $189 million. The current tax charge decrease from prior year was mainly caused by reduced year-on-year profitability of the inside the ring fence (IRF) operations.

Deferred tax credit is mainly due to a decrease in deferred tax liabilities resulting from the current year impairment of tangible assets.

Section 172 (1) statement

This section describes how the directors have had regard to the matters set out in section 172 (1) (a) - (f) of the Companies Act 2006 (the 'Section 172 factors') and forms the statement required under section 414CZA of the Companies Act 2006. The directors understand their duties under Section 172 and receive training on them upon their appointment, and at regular intervals thereafter.

The board is committed to doing business ethically and transparently, using bp's values and code of conduct to guide them when engaging and working with business partners. The company's activities, and the decisions of the board, affect a wide variety of individuals and organisations. The directors engage with the company's stakeholders, listening to their differing needs and priorities as part of their role as a senior leader at bp and use the feedback received to inform the board's decision-making.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

Section 172 factors	
(a) – The likely consequences of any decision in the long term; (e) – the desirability of the company maintaining a reputation for high standards of business conduct	When performing their duties, the directors of the company had regard to the bp group strategy and how the long-term success and sustained economic viability of the company supports the bp group's financial frame and sustainability frame. bp's code of conduct, which was updated in 2024, and "Who we are" beliefs set clear expectations for how bp, the company and the board operate to maintain a reputation for high standards of business conduct.
(b) – the interests of the company's employees	The directors of the company engage with employees and keep them informed on matters of concern to them. The directors of the company acknowledge the key interests of the employees, which include job security and career development, when making decisions. This includes reviewing the key performance indicators on employee engagement measured by employee 'Pulse' surveys. Employees are kept informed on matters of concern to them as bp employees through the intranet, town halls, site visits and relevant webinars. Employee share ownership is encouraged and there are a number of employee share plans in place at bp group level to which employees of the company can participate in. For example, the bp group operates a ShareMatch plan in more than 50 countries, matching BP p.l.c. shares purchased by employees. The bp group continued to use its learning platform, Grow@bp to enable employees to take ownership of their career and develop skills both for their current roles and future options as bp evolves.
(c) – The need to foster the company's business relationships with suppliers, customers and others	During 2024, the directors of the company reiterated their focus on engaging and fostering relationships with suppliers and customers. Their actions were aligned with bp's Code of Conduct and 'Who we are' beliefs. Furthermore, the board reviewed and considered the company's prompt payment reporting performance and disclosed its practices in respect of the same on a bi-annual basis.
(d) – The impact of the company's operations on the community and the environment	The directors of the company are committed to the bp group's sustainability frame which includes 10 aims to get bp to net zero and help the world get there too, 5 aims to improve people's lives and 5 aims to care for our planet.
(e) - The need to act fairly as between members of the company	In considering both the short- and long-term consequences of decisions, the directors consider how to best maximize the long-term shareholder value for its member as a wholly-owned subsidiary.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

In addition to the section 172 stakeholders set out above, the company considers its key stakeholders groups to include:

Stakeholder*(s)*	
Government/Regulators	The company recognises the need to create valued relationships with the government/regulators such as the Health and Safety Executive (HSE), OPRED and the North Sea Transition Authority (NSTA), centered around ethics and transparency, and the need to discuss relevant regulations and guidance where necessary. The board is provided with updates on changes in regulation and /or legislation impacting the company and is committed to keeping the government/regulators informed of any significant changes to the company.
Industry Bodies	The Company is an active member of Offshore Energies UK, which represents the integrated offshore energy industry.

The company's principal decisions

The board recognizes the importance of considering and having regard to the section 172 factors when making decisions, particularly principal decisions of the company. The company has taken the view that a 'principal' decision is one which is material and strategic in nature and would affect the ability of the company to generate or preserve value over the long term.

The following principal decisions were taken by the company during the period:

Principal decision	**Relevant factors taken into account during decision making process**
Subscriptions into newly incorporated subsidiaries and/or entry into joint venture arrangements.	In 2024, the directors considered and approved the incorporation and/or subscription into the following, having considered the impact of such decisions on the long-term prospects and financial position of the Company: ● BP Exploration (Delta) NewCo Limited (April 2024) ● Arcius Energy Egypt Limited (April 2024); ● Arcius Energy Limited (October 2024); ● BP ADUA Limited (December 2024); ● BP ADUA Operating Company Limited (December 2024); ● BP Energy Company of Kirkuk Limited (December 2024); ● Incorporated joint venture to hold and develop the Ruwais Liquefied Natural Gas facility at Ruwais, United Arab Emirates (May 2024); and ● Joint venture arrangements with Net Zero Teesside Power Limited, Net Zero Teesside Power Holdings Limited, BP NZT Power Holdings Limited, Equinor New Energy Limited and Equinor NZT Holdings Limited (Feb 2024).

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

Approval of Licence transfer	In April 2024, the directors considered and approved the transfer of a licence interest in Foinaven to Britoil Limited. The directors considered the impact of such a decisions on the long-term prospects and financial position of the Company.
Approval of share transfer	In September 2024, the directors considered and approved the sale of the legal and beneficial ownership of BP Gas Marketing Limited to BP International Limited. In October 2024, the directors considered and approved the sale of the ownership of BP Gas CCUS UK Limited to BP Lambda Limited. The directors considered the impact of such a decisions on the long-term prospects and financial position of the Company.
Approval for capital reduction	In December 2024, the company underwent a share capital reduction to reduce the capital from $42,089,650,267 to $22,089,650,267 by cancelling and extinguishing 20,000,000,000 ordinary shares of USD $1.00 each allotted to the parent company. The directors considered the impact of such a decision on the long-term prospects of the company, as well as considering the financial position of the company to ensure that it has the sufficient distributable reserves at that time.
Approval and payment of an Interim dividend	In December 2024, the directors considered the impact of such a decision on the long-term prospects of the company, as well as considering the financial position of the company to ensure that it has the sufficient distributable reserves at the time of the dividend/interim dividend. The Board approved $28,600 million of dividend.

Principal risks and uncertainties

The bp group manages, monitors and reports on the principal risks and uncertainties that can impact the group's ability to deliver its strategy. The group's system of internal control includes policies, processes, management systems, organizational structures, culture and standards of conduct employed to manage bp's business and associated risks.

Throughout the year, bp management, the leadership team, the board and relevant committees provide oversight of how principal risks to bp are identified, assessed and managed. They support appropriate governance of risk management including having relevant policies in place to help manage risks. Such oversight may include internal audit reports, group risk reports and reviews of the outcomes of business processes including strategy, planning and resource and capital allocation. bp's group risk team analyses the group's risk profile and maintains the group's risk management system. bp's internal audit team provides independent assurance to the chief executive and board as to whether the group's system of internal control is adequately designed and operating effectively to respond appropriately to the risks that are significant to bp.

The company aims to deliver sustainable value by identifying and responding successfully to risks in line with the group's risk management process.

The risks listed below, separately or in combination, could have a material adverse effect on the implementation of the company's strategy, business, financial performance, results of operations, cash flows, liquidity, prospects, shareholder value and returns and reputation. Unless stated otherwise, further details on

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

these risks are included within the risk factors in the Strategic Report of the bp group Annual Report and Form 20-F for the year ended 31 December 2024.

Strategic and commercial risks

Prices and markets

The company's financial performance is impacted by fluctuating prices of oil, gas and refined products, technological change, climate policies and regulations, exchange rate fluctuations and the general macroeconomic outlook. Oil, gas and product prices are subject to international supply and demand and margins can be volatile. Political developments, fluctuations to the supply of either oil or natural gas or to alternative low carbon energy sources, technological change, global economic conditions, public health situations (including the outbreak of an epidemic or pandemic), the introduction of new (or amendment to existing) carbon costs and the influence of OPEC+ can impact supply and demand and prices for our products (including low carbon investments).

Decreases in the price of energy outputs the company produces could have an adverse effect on revenue, margins, profitability and cash flows. If these reductions are significant or for a prolonged period, management may have to write down assets and reassess the viability of certain projects, which may impact future cash flows, profit, capital expenditure, the ability to work within the bp group's financial frame and maintain bp's long-term investment programme. Conversely, an increase in the prices of the energy outputs the company produces may not improve margin performance as there could be increased fiscal take, cost inflation and more onerous terms for access to resources.

Exchange rate fluctuations can create currency exposures and impact underlying costs and revenues. Crude oil prices are generally set in US dollars, while products vary in currency. Many of the company's major project development costs are denominated in local currencies, which may be subject to fluctuations against the US dollar.

Accessing and progressing hydrocarbon resources and low carbon opportunities

The company's inability to access and progress hydrocarbon resources and low carbon opportunities could adversely affect delivery of bp group's strategy. Delivery of bp group's strategy depends partly on the ability to progress hydrocarbon resources from the company's existing portfolio and access new resources. The company's ability to progress upstream resources and develop technologies at a level in line with bp group's strategic outlook for hydrocarbon production could impact future production and financial performance. Furthermore, the company's ability to access low carbon opportunities and the commercial terms associated with those opportunities could impact its financial performance while moving at pace with society and its changing wants and needs.

Major project delivery

Failure to invest in the best opportunities or deliver major projects successfully could adversely affect the company's financial performance.

The company faces challenges in developing major projects, particularly in geographically and technically challenging areas. Poor investment choice, efficiency or delivery, inflation, supply chain, or operational challenges at any major project that underpins production or production growth, could adversely affect the company's financial performance.

Geopolitical

The company is exposed to a range of political developments and consequent changes to the operating and regulatory environment could cause business disruption.

Political instability, changes to the regulatory environment or taxation, international trade disputes and barriers to free trade, international sanctions, expropriation or nationalization of property, civil strife, strikes, insurrections, acts of terrorism, acts of war and public health situations (including the outbreak of an epidemic or pandemic) may disrupt or curtail our operations, business activities or investments. These may in turn cause production to decline, limit bp's ability to pursue new opportunities, affect the recoverability of

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

bp's assets and related earnings and cash flow or cause bp to incur additional costs, particularly due to the long-term nature of many of bp's projects and significant capital expenditure required.

Trade restrictions, international sanctions or any other actions taken by governmental authorities or other relevant persons have had and could continue to have an impact on global energy supply and demand, market volatility and the prices of oil, gas and products.

Liquidity, financial capacity and financial, including credit, exposure

Failure to work within the financial framework set by the bp group could impact the bp group as well as the company's ability to operate and result in financial loss. Credit rating downgrades could potentially increase financing costs and limit access to financing or engagement in the company's trading activities on acceptable terms, which could put pressure on the company's liquidity.

For further details see Note 29 of the bp group Annual Report and Form 20-F for the year ended 31 December 2024.

Joint arrangements and contractors

The company may have varying levels of control over the standards, operations and compliance of its partners, including non-operated joint ventures, contractors and sub-contractors which could result in legal liability and reputational damage.

The company's partners and contractors are responsible for the adequacy of their resources and capabilities. If these are found to be lacking, there may be financial, reputational, operational or safety exposures for the company. Should an incident occur in an operation that the company participates in, its partners and contractors may be unable or unwilling to fully compensate the company against costs it may incur on their behalf or on behalf of the arrangement.

Where the company does not have operational control of a joint arrangement or direct oversight of contractor activity, the company may still be pursued by regulators or claimants, and may still be the focus for interest groups or media attention in the event of an incident.

Digital infrastructure, cyber security and data protection

The energy industry is subject to fast-evolving risks, including ransomware, from cyber threat actors, including nation states, criminals, terrorists, hacktivists and insiders. Current geopolitical factors have increased these risks. There is also growing regulation around data protection and data privacy, critical national infrastructure and the evolving opportunities and threats from artificial intelligence. A breach or failure of the bp group or third parties' digital infrastructure – including control systems – due to breaches of cyber defences, or those of third parties, negligence, intentional misconduct or other reasons, could seriously disrupt operations. This could result in the loss or misuse of data or sensitive information, including employees' and customers' personal data, injury to people, disruption to bp group's business, harm to the environment or assets, legal or regulatory breaches, legal liability and significant costs including fines, cost of remediation or reputational consequences. Furthermore, the rapid detection of attempts to gain unauthorized access to digital infrastructure, often through the use of sophisticated and co-ordinated means, is a challenge and any delay or failure to detect could compound these potential harms.

Climate change and the transition to a lower carbon economy

Laws, regulations, policies, obligations, government actions, social attitudes and customer preferences relating to climate change and the transition to a lower carbon economy, including the pace of change to any of these factors, and also the pace of the transition itself, could have adverse impacts on our business including on our access to and realization of competitive opportunities, a decline in demand for, or constraints on our ability to sell certain products, constraints on production and supply, adverse litigation and regulatory or litigation outcomes, increased costs from compliance and increased provisions for environmental and legal liabilities.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

Investor preferences and sentiment are influenced by environmental, social and governance considerations including climate change and the transition to a lower carbon economy. Changes in those preferences and sentiment could affect bp group's access to capital markets and attractiveness to potential investors, potentially resulting in reduced access to financing, increased financing costs and impacts upon business plans and financial performance.

Technological improvements or innovations that support the transition to a lower carbon economy, and customer preferences or regulatory incentives that alter fuel or power choices, could impact demand for oil and gas (including low carbon energy).

Depending on the nature and speed of any such changes and our response, these changes could increase costs, reduce the company's profitability, reduce demand for certain products, limit our access to new opportunities, require us to write down certain assets or curtail or cease certain operations, and affect investor sentiment, our access to capital markets, our competitiveness and financial performance.

Policy, legal, regulatory, technological and market developments related to climate change could also affect future price assumptions used in the assessment of recoverability of asset carrying values. This may affect whether there is continued intent to develop exploration and appraisal intangible assets, the timing of decommissioning of assets and the useful economic lives of assets used for the calculation of depreciation and amortization.

Competition

The bp group's strategic progress and performance could be impeded if the company is unable to control its development and operating costs and margins, fails to scale its businesses at pace, or to sustain, develop and operate a high-quality portfolio of assets efficiently. Furthermore, as an integrated energy company, the bp group faces an expanded and rapidly evolving range of competitors in the sectors in which it operates.

The company could be adversely affected if competitors offer superior terms for access rights or licences, or if our innovation in areas such as new low carbon technologies, digital, customer offer, exploration or production, lags behind those of our competitors.

The company's performance could also be negatively impacted if it fails to protect its intellectual property.

Talent and capability

The sectors in which the bp group operates face increasing challenges to attract and retain diverse, skilled and capable talent. An inability to successfully recruit, develop and retain core skills and capabilities and to reskill existing talent could negatively impact delivery of our strategy.

Crisis management and business continuity

The bp group's reputation and business activities could be negatively impacted if the management does not respond, or is perceived not to respond, in an appropriate manner to any major crisis.

Insurance

The bp group insures in situations where this is legally and contractually required. Some risks are insured with third parties and reinsured by group insurance companies. Uninsured losses could have a material adverse effect on the company's financial position, particularly if they arise at a time when the company is facing material costs as a result of a significant operational event which could put pressure on liquidity and cash flows.

Safety and operational risks

Process safety, personal safety and environmental risks

Technical integrity failure, natural disasters, extreme weather or a change in its frequency or severity, human error and other adverse events or conditions, including breach of digital security, could lead to loss of containment of hazardous materials, including hydrocarbons. This could also lead to fires, explosions or other personal and process safety incidents when drilling wells, constructing and operating facilities; in

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

addition to activities associated with transportation by road, sea or pipeline. There can be no certainty that our operating management system or other policies and procedures will adequately identify all process safety, personal safety and environmental risks or that all our operating activities will be conducted in conformance with these systems.

Such events or conditions or inability to provide safe environments for our workforce and the public while at our facilities, premises or during transportation, could lead to injuries, loss of life or environmental damage. As a result, the company could face regulatory action and legal liability, including penalties and remediation obligations, increased costs and potentially denial of licence to operate. The company's activities are sometimes conducted in hazardous, remote or environmentally sensitive locations, where the consequences of such events or conditions could be greater than in other locations.

Drilling and production
The company's activities require high levels of investment and are sometimes conducted in challenging environments such as those prone to natural disasters and extreme weather, which heightens the risks of technical integrity failure. The physical characteristics of an oil or natural gas field, and cost of drilling, completing or operating wells are often uncertain. The company may be required to curtail, delay or cancel drilling operations or stop production because of a variety of factors, including unexpected drilling conditions, pressure or irregularities in geological formations, equipment failures or accidents, adverse weather conditions and compliance with governmental requirements.

Security
Acts of terrorism, piracy, sabotage, activism and similar activities directed against the company's operations and facilities, pipelines, transportation or digital infrastructure could cause harm to people and severely disrupt operations. The company's activities could also be severely affected by conflict, civil strife or political unrest.

Product quality
Failure to meet product quality specifications could cause harm to people and the environment, damage bp group's reputation, result in regulatory action and legal liability, and impact financial performance.

Compliance and control risks

Ethical misconduct and non-compliance
Incidents of ethical misconduct or non-compliance with applicable laws and regulations, including anti-bribery and corruption, competition and antitrust, data privacy, and anti-fraud laws, trade restrictions or other sanctions, could damage the company's reputation, and result in litigation, regulatory action, penalties and potentially affect licence to operate.

In relation to trade restrictions or other sanctions, current geopolitical factors have increased these risks.

Regulation
Changes in the law and regulation, including how they are interpreted and enforced, could increase costs, constrain the company's operations and affect its business plans and financial performance.

Royalties and taxes, particularly those applied to our hydrocarbon activities, tend to be high compared with those imposed on similar commercial activities. In certain jurisdictions there is also a degree of uncertainty relating to tax law interpretation and changes. Governments may change their fiscal and regulatory frameworks in response to public pressure on finances or for other policy reasons, resulting in increased amounts payable to them or their agencies.

Treasury
Ineffective oversight of treasury and trading activities could lead to business disruption, financial loss, regulatory intervention, fines or damage to the company’s reputation.

Reporting

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

External reporting of financial and non-financial data relies on the integrity of the control environment, bp group's systems and people operating them. Failure to report data accurately and in compliance with applicable standards could result in regulatory action, legal liability and reputational damage.

Financial risk management

The company is exposed to a number of different financial risks arising from natural business exposures as well as its use of financial instruments including market risks relating to commodity prices, foreign currency exchange rates and interest rates, credit risk and liquidity risk. Further details on these financial risks are included within Note 29 of the bp group Annual Report and Form 20-F for the year ended 31 December 2024.

DIRECTORS' REPORT

BP EXPLORATION OPERATING COMPANY LIMITED

Directors

The present directors are listed on page 1.

G R Gordon, D F Reiter, J S Burton, K A H Butler, A J De'Ath and L A Kingham served as directors throughout the financial year. Changes since 1 January 2024 are as follows:

	Appointed	Resigned
G R Gordon	—	25 March 2025
J S Burton	—	7 February 2025
R J Eaton	9 April 2025	—
A J De'Ath	—	28 July 2025
D W Brown	7 August 2025	—

Directors' indemnity

The company indemnifies the directors in its Articles of Association to the extent allowed under section 232 of the Companies Act 2006. Such qualifying third party indemnity provisions for the benefit of the company's directors remain in force at the date of this report.

Dividends

During the year the company has declared and paid dividends of $28,600 million (2023: $4,200 million). The directors do not propose the payment of a final dividend.

Financial risk management

In accordance with section 414C of the Companies Act 2006 the directors have included information regarding financial instruments as required by Schedule 7 (Part 6.1) of the Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations 2008 in the Strategic Report under Financial risk management.

Post balance sheet events

On 13 March 2025, the company has issued a performance guarantee on BP Energy Company of Kirkuk Limited in amount of $880 million.

On 26 March 2025, the company subscribed for 193,227,364 shares each of AED 1 in ADNOC (Abu Dhabi National Oil Company) Ruwais Liquified Natural Gas L.L.C - S.P.C project company as part of the Ruwais Natural Liquified Natural Gas project for an aggregate nominal value of AED 193,227,364 being a 10% shareholding. The company became 10% shareholder in ADNOC Ruwais Liquefied Natural Gas L.L.C. in June 2025. The Shareholders' Agreement was signed on 23 June 2025.

On 11 April 2025, it was proposed that the company makes an equity injection into BP Brazil Tracking LLC by applying for an amount not to exceed US $270million worth of member interests in the entity in tranches throughout 2025.

On 17 April 2025, the company subscribed for 1 ordinary share at a nominal value of $1 in the newly incorporated subsidiary, BP Gaea Limited.

On 17 April 2025, the company subscribed for 1 ordinary share at a nominal value of $1 in the newly incorporated subsidiary, BP Gaea II Limited.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

On 24 April 2025 the company subscribed to 6,000,000 ordinary shares of $1 each in BP Karabagh Limited for cash consideration of $6,000,000.

On 24 April 2025 the company subscribed to 1,000,000 ordinary shares of $1 each in BP ADUA Limited for cash consideration of $1,000,000.

On 18 May 2025, the company subscribed to 9,866 ordinary shares of $1 each for a total subscription price of $76,404,421 (being the aggregate nominal value of the shares plus an additional premium of $76,394,555) and 9 ordinary shares of $1.00 each in the share capital of BP Energy Company of Kirkuk Limited (Subsidiary) for a total subscription price of $9.00 of which $8.72 shall be paid from the Subsidiary's redenomination reserve and $0.28 shall remain outstanding with a commitment to pay.

On 26 June 2025, Arcius Energy Limited cancelled and extinguished 400,000,000 ordinary shares with a nominal value of $1.00 each in the share capital, such that 204,000,000 ordinary shares of $1 are held by the company and 196,000,000 ordinary shares of $1.00 each held by XRG P.J.S.C.

On 21 August 2025, the company approved an equity injection into BP Brasil Limitada (BPB) of up to USD 6,000,000 (approximately BRL 32,468,400) worth of ordinary shares (quotas) of BRL 1.00 each in the capital of BPB to be allotted to the company in tranches as and when funds are requested by BPB.

Going concern

The directors consider it appropriate to adopt the going concern basis of accounting in preparing the financial statements. The current economic and geopolitical environment were considered as part of the going concern assessment.

Liquidity and financing are managed within the bp group under pooled group-wide arrangements which include the company. As part of the going concern basis of preparation for the company, the ability and intent of the bp group to support the company has also been taken into consideration. The most recent bp group financial statements continue to be prepared on a going concern basis. Forecast liquidity of the bp group has been assessed under a number of stressed scenarios, including a significant decline in oil prices over the 12-month period from the date these financial statements were approved. Reverse stress tests performed indicated that the bp group will continue to operate as a going concern for at least 12 months from the date of approval of the financial statements even if the Brent price fell to zero. In addition, bp group management have confirmed the existing intra-group funding and liquidity arrangements as currently constituted are expected to continue for the foreseeable future, being no less than twelve months from the approval of these financial statements. No material uncertainties over going concern or significant judgements or estimates on the assessment were identified. Accordingly, the company will be able to draw on support from the bp group for the foreseeable future and these financial statements have therefore been prepared on a going concern basis. For further information on financial risk factors, including credit risk and liquidity risk, see page 11.

As noted in the Strategic Report, the company holds interests in a number of producing fields in the UK continental shelf and in a number of subsidiary and associated undertakings engaged in overseas oil and gas exploration and production activities, as a result the company's cash flows are impacted by changes in the commodity prices. The company holds limited cash directly and funding requirements are met through the central bp Treasury organisation, as a result the company is reliant on the overall group funding to continue in operation and meet its liabilities as they fall due in the going concern period. The company has mainly intercompany trading (97% of 2024 revenue) within the bp group and also has net assets of $41,957 million as at 31 December 2024, while the profit for the year was $3,450 million. In 2023, the company generated $10,005 million profit.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

In assessing the prospects of BP Exploration Operating Company Limited, the directors noted that such assessment is subject to a degree of uncertainty that can be expected to increase looking out over time and, accordingly, that future outcomes cannot be guaranteed or predicted with certainty.

Having a reasonable expectation that the company has adequate resources to continue in operational existence for at least the next 12 months from the date these financial statements were approved, the directors consider it appropriate to continue to adopt the going concern basis of accounting in preparing the financial statements.

Future developments

The directors aim to maintain the management policies which have resulted in the company's growth in recent years.

They believe that the company is in a good position to take advantage of any opportunities which may arise in the future.

It is the intention of the directors that the business of the company will continue for the foreseeable future.

Research and development

Research and development costs relate to the company's share of group led research and development programmes and initiatives. The cost of these group projects is absorbed by the fields and locations and therefore the legal entities which are expected to benefit from those developments in the future.

Branches

The company has overseas branches established in Ireland, Trinidad and Tobago, UAE and Russian Federation. The branch in the Russian Federation is in the process of closing down.

Disabled employees

The company gives full and fair consideration to applications for employment from disabled persons where the requirements of the job can be adequately fulfilled by a handicapped or disabled person.

Where existing employees become disabled, it is the company's policy wherever practicable to provide continuing employment under normal terms and conditions and to provide training and career development and promotion wherever appropriate.

Stakeholder statements

Employee engagement statement

The directors of the company recognize that employees are vital to the long-term success of the company and engage with employees, and keep them informed on matters of concern to them. The company's section 172(1) statement in the Strategic Report demonstrates how the directors have engaged with employees throughout the year, and how the directors of the company have had regard to their interests when making decisions.

Statement of engagement with suppliers, customers and others in a business relationship with the company

The company's section 172(1) statement in the Strategic Report demonstrates how the directors have had regard to the need to foster business relationships with suppliers, customers and other stakeholders when making decisions on behalf of the company.

Streamlined Energy & Carbon Reporting (SECR)

As a UK subsidiary of a UK parent company which prepares a group directors' report, SECR reporting details are included in the Strategic Report of the bp group Annual Report and Form 20-F for the year ended 31 December 2024.

Corporate Governance Statement

In 2024, the bp group continued to operate under the corporate governance framework (the Framework). The Framework closely aligns with bp's purpose - reimagining energy for people and our planet - and strategy. The Framework also defines bp's role, to promote the long-term sustainable success of the company, generating value for its shareholders while having regard to its other stakeholders, the impact of its operations on the communities within which it operates and the environment.

The core of the company's governance arrangements come from bp's System of Internal Control, Global Subsidiary Corporate Governance Policy (the Policy) and Code of Conduct, and 'Who we are' beliefs, details of which are set out below.

System of Internal Control

The System of Internal Control is the holistic set of management systems, organizational structures, processes, standards and behaviours that are employed to conduct the bp group's business. These processes enable the company to achieve its objectives and purpose by ensuring that it responds appropriately to business, operational, financial and other risks and opportunities.

Further, the System of Internal Control requires the maintenance of proper records and processes that generate a flow of timely, relevant and reliable information from within and outside the organization which helps to ensure the quality of internal and external reporting. The System of Internal Control helps to ensure compliance with laws and regulations, bp's Code of Conduct and other internal policies.

The Policy

The Policy has been established by BP p.l.c. and implemented by its subsidiaries, including the company, to establish common standards in corporate governance across the group. These standards cover the role and responsibilities of the board and the directors, its processes and its relationship with executive management, shareholders and other stakeholders.

The Policy underpins the Subsidiary Governance Framework (the Framework) which embodies a comprehensive set of rules and recommendations designed to standardize and promote best practice subsidiary governance across:

i. Legal entity data management;
ii. Legal entity compliance;
iii. Legal entity lifecycle management;
iv. Directors & officers support; and
v. Board governance.

The Policy and the Framework set out the responsibilities of all directors and officers of each of the bp group's subsidiaries and the primary tasks of the board, including consideration and execution of long-term strategy, monitoring of the subsidiary's performance and ensuring that the principal risks to the subsidiary are identified and that appropriate systems of risk management and control are in place. As a result, the company has not considered it necessary to adopt a formal corporate governance code.

The Policy requires directors to:

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

i. Attend induction training upon appointment and are recommended to refresh their training annually;
ii. Not engage in any activity that is, or could reasonably be perceived to be, in conflict with the interests of the company and are further required to act in the best interests of the company, which may not necessarily coincide with the best interest of the bp group;
iii. Consult in advance of conflicts of duties in order to identify and implement steps to avoid or mitigate such conflicts; and
iv. Retain responsibility for the approval of financial statements.

Decision making rests with the directors of the company and delegation of specific powers or decisions is documented in writing, setting out the reasons for the scope as well as limitation of such delegation, supported by a form of bp group authority. Delegations are monitored and reviewed by the board on a regular basis.

The Code of Conduct

bp's code of conduct was relaunched in January 2023 and is based on bp's values and beliefs, and sets clear expectations for how all employees at bp should work, including directors of the company. The code is designed to be a clear set of expectations to enable all employees to make choices in a consistent way.

The code of conduct includes sections covering:

i. Our responsibility and how we speak up, including our channels for speaking up and how concerns are managed;
ii. Safety and sustainability, including operating safely and securely and delivering bp's sustainability frame;
iii. People, including diversity, equity and inclusion;
iv. Business partners, including building and maintaining strong relationships and proactively managing conflicts of interest;
v. Governments and communities, including human rights, community engagement and public communications; and
vi. Assets and financial integrity, including the need to record and maintain accurate and complete information

Application of the system of governance

The directors have applied this system of governance by:

a. Regularly reviewing board composition to ensure that it has an appropriately diverse balance of skills, backgrounds, experience and knowledge and ensuring that individual directors have sufficient capacity to make valuable contributions. The board, where appropriate, and in accordance with the Policy, retains a minimum of three directors, promotes independent and objective challenge through the appointment of directors who are not directly or indirectly responsible for the management function of the company and may nominate a designated Chair to provide leadership of the board.
b. Undertaking training on a regular basis to ensure that they have a clear understanding of their responsibilities and accountabilities. To support effective decision-making in their capacity as directors, the board considers the System of Internal Control, the bp Code of Conduct and the company's purpose and how it furthers the bp group's purpose, aims and ambitions.
c. In accordance with the Policy, the board is supported by the System of Internal Control to identify opportunities to create and preserve value. Refer to the principal risks and uncertainties in the Strategic Report.
d. Having regard to and fostering good stakeholder relationships. Refer to the company's section 172 statement in the Strategic Report for further information.

Auditors

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

Pursuant to section 487 of the Companies Act 2006, Deloitte LLP have expressed their willingness to continue in office as auditors and are therefore deemed reappointed as auditors.

Directors' statement as to the disclosure of information to the auditor

The directors who were members of the board at the time of approving the directors' report, as listed on page 1, confirm that:

- To the best of each director's knowledge and belief, there is no information relevant to the preparation of the auditor's report of which the company's auditor is unaware; and
- Each director has taken all the steps a director might reasonably be expected to have taken to be aware of relevant audit information and to establish that the company's auditor is aware of that information.

This confirmation is given and should be interpreted in accordance with section 418 of the Companies Act 2006.

Approved by the board of directors and signed on behalf of the board by:

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE FINANCIAL STATEMENTS

BP EXPLORATION OPERATING COMPANY LIMITED

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable UK law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law) including Financial Reporting Standard 101 'Reduced Disclosure Framework'. Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and the profit or loss for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable United Kingdom accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors confirm that they have complied with these requirements. Details of the directors' assessment of going concern are provided in the Directors' Report.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF BP EXPLORATION OPERATING COMPANY LIMITED

Report on the audit of the financial statements

Opinion

In our opinion the financial statements of BP Exploration Operating Company Limited (the 'company'):

- give a true and fair view of the state of the company's affairs as at 31 December 2024 and of its profit for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice, including Financial Reporting Standard 101 "Reduced Disclosure Framework"; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements which comprise:

- the profit and loss account;
- the statement of comprehensive income;
- the balance sheet;
- the statement of changes in equity; and
- the related notes 1 to 28.

The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 101 "Reduced Disclosure Framework" (United Kingdom Generally Accepted Accounting Practice).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the financial statements section of our report.

We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the 'FRC's') Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our evaluation of the directors' assessment of the company's ability to continue to adopt the going concern basis of accounting included:

- An assessment of whether material uncertainties existed that could cast significant doubt on the entity's ability to continue as a going concern for least 12 months after the date of approval of the financial statements;
- An assessment of the funds that can be made available to the company through bp group treasury channels;
- An assessment of the management's identified potential mitigating actions and the appropriateness of the inclusion of these in the going concern assessment;
- An assessment of the disclosures made within the financial statements.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the directors' responsibilities statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

We considered the nature of the company's industry and its control environment, and reviewed the company's documentation of their policies and procedures relating to fraud and compliance with laws and regulations. We also enquired of management and the directors about their own identification and assessment of the risks of irregularities, including those that are specific to the company's business sector.

We obtained an understanding of the legal and regulatory frameworks that the company operates in, and identified the key laws and regulations that:

- had a direct effect on the determination of material amounts and disclosures in the financial statements. These included UK Companies Act, pensions legislation and tax legislation; and
- do not have a direct effect on the financial statements but compliance with which may be fundamental to the company's ability to operate or to avoid a material penalty. These included the company's operating licences and environmental regulations.

We discussed among the audit engagement team including relevant internal specialists regarding the opportunities and incentives that may exist within the organisation for fraud and how and where fraud might occur in the financial statements.

In common with all audits under ISAs (UK), we are also required to perform specific procedures to respond to the risk of management override. In addressing the risk of fraud through management override of controls, we tested the appropriateness of journal entries and other adjustments; assessed whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluated the business rationale of any significant transactions that are unusual or outside the normal course of business.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

In addition to the above, our procedures to respond to the risks identified included the following:

- reviewing financial statement disclosures by testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- enquiring of management internal audit and in-house legal counsel concerning actual and potential litigation and claims, and instances of non-compliance with laws and regulations; and
- reading minutes of meetings of those charged with governance and reviewing correspondence with HMRC and the licensing authority.

Report on other legal and regulatory requirements

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the strategic report and the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the strategic report and the directors' report have been prepared in accordance with applicable legal requirements.

In the light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified any material misstatements in the strategic report or the directors' report.

Matters on which we are required to report by exception

Under the Companies Act 2006 we are required to report in respect of the following matters if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit

We have nothing to report in respect of these matters.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

1. Authorisation of financial statements and statement of compliance with Financial Reporting Standard 101 Reduced Disclosure Framework (FRS 101)

The financial statements of BP Exploration Operating Company Limited for the year ended 31 December 2024 were approved by the board of directors on 22 September 2025 and the balance sheet was signed on the board's behalf by R J Eaton. BP Exploration Operating Company Limited is a private company, limited by shares incorporated, domiciled and registered in England and Wales (registered number 00305943) under the Companies Act 2006. The company's registered office is at Chertsey Road, Sunbury on Thames, Middlesex, TW16 7BP, United Kingdom. These financial statements were prepared in accordance with Financial Reporting Standard 101 'Reduced Disclosure Framework' (FRS 101) and the provisions of the Companies Act 2006.

2. Material accounting policy information, significant judgements, estimates and assumptions

The material accounting policy information and critical accounting judgements, estimates and assumptions of the company are set out below.

Basis of preparation

These financial statements have been prepared in accordance with FRS 101. The financial statements have been prepared under the historical cost convention, modified to include the revaluation of certain financial instruments. Historical cost is generally based on the fair value of the consideration given in exchange for the assets.

The accounting policies that follow have been consistently applied to all years presented, except where otherwise indicated.

These financial statements are separate financial statements. The company has taken advantage of the exemption under s400 of the Companies Act 2006 not to prepare consolidated financial statements, because it is included in the group financial statements of BP p.l.c. Details of the parent in whose consolidated financial statements the company is included are shown in Note 28 to the financial statements.

The company meets the definition of a qualifying entity under FRS 100 'Application of Financial Reporting Requirements' issued by the FRC. Accordingly, these financial statements were prepared under the historical cost convention in accordance with Financial Reporting Standard 101 Reduced Disclosure Framework and the Companies Act 2006. As permitted by FRS 101, the company has taken advantage of the disclosure exemptions available under that standard in relation to:

a. the requirements of paragraphs 10(d), 10(f), 16, 38A, 38B, 38C, 38D, 40A, 40B, 40C, 40D, 111 and 134 to 136 of IAS 1 Presentation of Financial Statements;
b. the requirement in paragraph 38 of IAS 1 Presentation of Financial Statements to present comparative information in respect of:
    (i) paragraph 79(a)(iv) of IAS 1 Presentation of Financial Statements
    (ii) paragraph 73(e) of IAS 16 Property, Plant and Equipment
    (iii) paragraph 74A(b) of IAS 16 Property, Plant and Equipment
    (iv) paragraph 118(e) of IAS 38 Intangible Assets
c. the requirements of IAS 7 Statement of Cash Flows (excluding paragraphs 1 to 44E, 44H(b)(ii) and 45 to 63 which are not applicable);
d. the requirements of paragraphs 30 and 31 of IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors in relation to standards not yet effective;
e. the requirements of paragraph 17 and 18A of IAS 24 Related Party Disclosures;

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

f. the requirements of IAS 24 Related Party Disclosures to disclose related party transactions entered into between two or more members of a group, provided that any subsidiary which is a party to the transaction is wholly owned by such a member;
g. the requirements of paragraphs 130(f)(ii), 130(f)(iii), 134(d) to 134(f) and 135(c)-135(e) of IAS 36, Impairment of Assets;
h. the requirements of paragraphs 45(b) and 46 to 52 of IFRS 2 Share-based Payment;
i. the requirements of IFRS 7 Financial Instruments: Disclosures;
j. the requirements of paragraphs 91 – 99 of IFRS 13 Fair Value Measurement;
k. the requirement of the second sentence of paragraph 110 and paragraphs 113(a), 114, 115, 118, 119(a) to (c), 120 to 127 and 129 of IFRS 15 Revenue from Contracts with Customers;
l. the requirements of paragraph 52, the second sentence of paragraph 89, and paragraphs 90, 91 and 93 of IFRS 16 Leases;
m. the requirements of paragraph 58 of IFRS 16 Leases, provided that the disclosure of details of indebtedness required by paragraph 61(1) of Schedule 1 to the Regulations is presented separately for lease liabilities and other liabilities, and in total;
n. the requirements of paragraphs 88C and 88D of IAS 12 Income Taxes.

Where required, equivalent disclosures are given in the consolidated financial statements of BP p.l.c. The consolidated financial statements of BP p.l.c. are available to the public and can be obtained as set out in Note 28.

The financial statements are presented in US dollars and all values are rounded to the nearest thousand dollars ($000), except where otherwise indicated.

Material accounting policy information: use of judgements, estimates and assumptions

Inherent in the application of many of the accounting policies used in preparing the financial statements is the need for management to make judgements, estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. Actual outcomes could differ from the estimates and assumptions used.

The accounting judgements and estimates that have a significant impact on the results of the company are set out below, and should be read in conjunction with the information provided in the Notes to the financial statements.

The areas requiring the most significant judgement and estimation in the preparation of the financial statements are: accounting for the investments in Aker BP and Azule Energy; exploration and appraisal intangible assets; the recoverability of asset carrying values, including the estimation of reserves; provisions and contingencies; and taxation.

Judgements and estimates, not all of which are significant, made in assessing the impact of the current economic and geopolitical environment, and climate change and the transition to a lower carbon economy on the financial statements are also set out below. Where an estimate has a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year this is specifically noted within the boxed text.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

Judgements and estimates made in assessing the impact of climate change and the transition to a lower carbon economy

Climate change and the transition to a lower carbon economy were considered in preparing the financial statements. These may have significant impacts on the currently reported amounts of the company's assets and liabilities discussed below and on similar assets and liabilities that may be recognized in the future. bp's assumptions for investment appraisal form part of an investment-decision making framework for currently unsanctioned future capital expenditure on tangible assets, and intangibles including exploration and appraisal assets, that is designed to support the effective and resilient implementation of bp's strategy. The price assumptions used for investment appraisal include oil and gas price assumptions, which are producer prices and are therefore net of any future carbon prices that the purchaser may be required to pay, and an assumption of a single carbon emissions cost imposed on the producer in respect of operational greenhouse gas (GHG) emissions (carbon dioxide and methane) in order to incentivize engineering solutions to mitigate GHG emissions on projects. bp's oil and gas price assumptions for value in use impairment testing are aligned with those investment appraisal assumptions. The assumptions for future carbon emissions costs in value in use impairment testing differ from the investment appraisal assumptions and are described below. Management has also not identified any off-balance sheet commodity purchase obligations to be onerous contracts as result of the transition to a lower carbon economy at 31 December 2024.

Impairment of investments

The recoverable amounts of the company's investments in subsidiaries are closely linked to the carrying value of tangible assets and goodwill in the oil and gas industry. Please refer below and see significant judgement and estimates: impairment of investments for further information.

Impairment of tangible assets

The energy transition is likely to impact the future prices of commodities such as oil and natural gas which in turn may affect the recoverable amount of tangible assets and goodwill in the oil and gas industry. bp's best estimate oil and natural gas price assumptions for value in use impairment testing were revised during 2024. The revised price assumptions have been rebased in real 2023 terms and are materially consistent with the disclosed prices in 2022 terms. The near term Brent oil assumption was held constant at $70 per barrel to reflect near-term supply constraints before declining after 2030 to $50 per barrel by 2050 continuing to reflect the assumption that as the energy system decarbonizes, falling oil demand will cause oil prices to decline. The price assumptions for Henry Hub gas up to 2050 were held constant at $4.00 per mmBtu reflecting an assumption that declining domestic demand in the US is offset by higher liquefied natural gas (LNG) exports. The revised assumptions for Brent oil and Henry Hub gas sit within the range of external scenarios considered by management and are in line with a range of transition paths consistent with the temperature goal of the Paris climate change agreement, of holding the increase in the global average temperature to well below 2°C above pre-industrial levels and pursuing efforts to limit the temperature increase to 1.5°C above pre-industrial levels.

The bp group's investment appraisal process includes a carbon emissions price series for the investment economics which is applied to bp's anticipated share of bp's forecast of the investment assets' scope 1 and 2 GHG emissions where they exceed defined thresholds, and is assumed to apply whether or not bp is the asset operator. However, for value in use impairment testing on bp's existing cash generating units (CGUs), consistent with all other relevant cash flows estimated, bp is required to reflect management's best estimate of any expected applicable carbon emission costs payable by bp, including where bp is not the operator, in the future for each jurisdiction in which the company has interests. This requires management's best estimate of how future changes to relevant carbon emission cost policies and/or legislation are likely to affect the future cash flows of the company's applicable CGUs, whether currently enacted or not. Future potential carbon pricing and/or costs of carbon emissions allowances are included in the value in use calculations to the extent management has sufficient information to make such an estimate. Currently this results in limited application of carbon price assumptions in value in use impairment tests given that carbon pricing legislation in most impacted jurisdictions where the company has interests is not in place and there is not sufficient information available as to the relevant policy makers' future intentions regarding carbon pricing to support an estimate. A key input into the determination of impairment is the assumption, aligned with bp's aim to reach net zero greenhouse gas emissions by 2050 or sooner, that the current recognized portfolio of oil and gas properties and refining assets will have an immaterial carrying value by 2050.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

The most significant instances where a carbon price has been incorporated in the 2024 value in use impairment tests is for the UK North Sea and Gelsenkirchen refinery. The assumptions for UK North Sea were £59/tCO2e in 2025 gradually increasing to £231/tCO2e in 2050.

However, as bp's forecast future prices are producer prices, the company considers it reasonable to assume that if, in addition to the costs already in place, further scope 1 and 2 emission costs were partially to be borne directly by oil and gas producers including bp in future and the prevalence of such costs were to become widespread, the gross oil and gas prices realized by producers would be correspondingly higher over the long term, resulting in no expected overall materially negative impacts on the company's net cash flows. See significant judgements and estimates: recoverability of asset carrying values for further information including sensitivity analysis in relation to reasonably possible changes in the price assumptions and carbon costs.

Production assumptions within upstream tangible assets impairment tests reflect management's current best estimate of future production of the existing upstream portfolio. See significant judgements and estimates: recoverability of asset carrying values for sensitivity analyses in relation to reasonably possible changes in production for upstream oil and gas properties.

Management will continue to review price assumptions as the energy transition progresses and this may result in impairment charges or reversals in the future.

Exploration and appraisal intangible assets

The energy transition may affect the future development or viability of exploration prospects. The recoverability of the group's exploration and appraisal intangible assets was considered during 2024. No significant write-offs were identified. These assets will continue to be assessed as the energy transition progresses. See significant judgement: exploration and appraisal intangible assets and Note 11 for further information.

Tangible assets – depreciation and expected useful lives

The energy transition may curtail the expected useful lives of oil and gas industry assets thereby accelerating depreciation charges.

However, a significant majority of bp's existing upstream oil and natural gas properties are likely to have immaterial carrying values within the next 12 years and, as outlined in bp's strategy, oil and natural gas production will remain an important part of bp's business activities over that period.

Therefore, management does not expect the useful lives of bp's reported tangible assets to change and do not consider this to be a significant accounting judgement or estimate. Significant capital expenditure is still required for ongoing projects as well as renewal and/or replacement of aged assets and therefore the useful lives of future capital expenditure may be different. See material accounting policy: tangible assets for more information.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

Provisions: decommissioning

The energy transition may bring forward the decommissioning of oil and gas industry assets thereby increasing the present value of associated decommissioning provisions. Decommissioning cost estimates are based on the known regulatory and external environment. These cost estimates may change in the future, including as a result of the transition to a lower carbon economy.

The majority of bp's existing upstream oil and gas properties are expected to start decommissioning within the next two decades. Currently, the expected timing of decommissioning expenditures for the upstream oil and gas assets in the company's portfolio has not materially been brought forward. Management does not expect a reasonably possible change of two years in the expected timing of all decommissioning to have a material effect on the upstream decommissioning provisions, assuming cost assumptions remain unchanged.

Management will continue to review facts and circumstances to assess if decommissioning provisions need to be recognized. See significant judgements and estimates: provisions for further information.

Judgements and estimates made in assessing the impact of the geopolitical and economic environment

In preparing the financial statements, the following areas involving judgement and estimates were identified as most relevant with regards to the impact of the current geopolitical and economic environment.

Oil and gas price assumptions

Oil and gas price assumptions applied in value in use impairment testing have been updated for inflation and have been rebased in real 2023 terms. See significant judgements and estimates: recoverability of asset carrying values for further information.

Discount rate assumptions

The discount rates used for impairment testing and provisions were reassessed during the year in light of changing economic and geopolitical outlooks. The nominal discount rate applied to provisions was increased during the year to reflect higher US Treasury yields. The principal impact of this rate increase was a $150 million decrease in the decommissioning provision with an associated decrease in the carrying amount of tangible assets of $103 million and a pre-tax credit to the profit and loss account of $47 million. The post-tax impairment discount rate applicable to assets remained consistent with 2023 as did the risk premium applied to the majority of countries classified as higher-risk. See significant judgements and estimates: recoverability of asset carrying values and provisions for further information.

Pensions and other post-retirement benefits

The volatility in the financial markets during 2024 impacted the assumptions used for determining the fair value of plan assets and the present value of defined benefit obligations in the company's defined benefit pension plans. See significant estimate: pensions and other post-retirement benefits and Note 27 for further information.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

Material accounting policy information

Going concern

The directors consider it appropriate to adopt the going concern basis of accounting in preparing the financial statements. The current economic and geopolitical environment were considered as part of the going concern assessment.

Liquidity and financing are managed within the bp group under pooled group-wide arrangements which include the company. As part of the going concern basis of preparation for the company, the ability and intent of the bp group to support the company has also been taken into consideration. The most recent bp group financial statements continue to be prepared on a going concern basis. Forecast liquidity of the bp group has been assessed under a number of stressed scenarios, including a significant decline in oil prices over the 12-month period from the date these financial statements were approved. Reverse stress tests performed indicated that the bp group will continue to operate as a going concern for at least 12 months from the date of approval of the financial statements even if the Brent price fell to zero. In addition, bp group management have confirmed the existing intra-group funding and liquidity arrangements as currently constituted are expected to continue for the foreseeable future, being no less than twelve months from the approval of these financial statements. No material uncertainties over going concern or significant judgements or estimates on the assessment were identified. Accordingly, the company will be able to draw on support from the bp group for the foreseeable future and these financial statements have therefore been prepared on a going concern basis. For further information on financial risk factors, including credit risk and liquidity risk, see pages 11.

As noted in the Strategic Report, the company holds interests in a number of producing fields in the UK continental shelf and in a number of subsidiary and associated undertakings engaged in overseas oil and gas exploration and production activities, as a result the company's cash flows are impacted by changes in the commodity prices. The company holds limited cash directly and funding requirements are met through the central bp Treasury organisation, as a result the company is reliant on the overall group funding to continue in operation and meet its liabilities as they fall due in the going concern period. The company has mainly intercompany trading (97% of 2024 revenue) within the bp group and also has net assets of $41,957 million as at 31 December 2024, while the profit for the year was $3,450 million. In 2023, the company generated $10,005 million profit.

In assessing the prospects of BP Exploration Operating Company Limited, the directors noted that such assessment is subject to a degree of uncertainty that can be expected to increase looking out over time and, accordingly, that future outcomes cannot be guaranteed or predicted with certainty.

Having a reasonable expectation that the company has adequate resources to continue in operational existence for at least the next 12 months from the date these financial statements were approved, the directors consider it appropriate to continue to adopt the going concern basis of accounting in preparing the financial statements.

Foreign currency

The functional and presentation currency of the financial statements is US dollars. The functional currency is the currency of the primary economic environment in which the company operates and is normally the currency in which the company primarily generates and expends cash.

Transactions in foreign currencies are initially recorded in the functional currency by applying the rate of exchange ruling at the date of the transaction. Where this is not practical and exchange rates do not fluctuate materially the average rate has been used. Monetary assets and liabilities denominated in foreign currencies are retranslated into the functional currency at the spot exchange on the balance sheet date. Any resulting exchange differences are included in the profit and loss account, unless hedge accounting is applied. Non-

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

monetary assets and liabilities, other than those measured at fair value, are not retranslated subsequent to initial recognition.

Assets and liabilities of foreign currency branches are translated into US dollars at rates of exchange ruling at the balance sheet date. The profit and loss account is translated into US dollars using average rates of exchange. Exchange differences arising when the opening net assets and the profits for the year retained by foreign currency branches are translated into US dollars. These exchange differences are taken directly to reserves and reported in other comprehensive income. When a foreign currency branch is disposed of the cumulative amount of foreign currency differences included in other comprehensive income is reclassified to the profit and loss account.

Investments

Fixed asset investments in subsidiaries, joint ventures and associates are held at cost. The company assesses investments for an impairment indicator annually. If any such indication of possible impairment exists, the company makes an estimate of the investment's recoverable amount. Where the carrying amount of an investment exceeds its recoverable amount, the investment is considered impaired and is written down to its recoverable amount.

Where these circumstances have reversed, the impairment previously made is reversed to the extent of the original cost of the investment.

Interests in joint arrangements
A joint arrangement is an arrangement in which two or more parties have joint control. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. The company recognizes, on a line-by-line basis, its share of the assets, liabilities and expenses of these joint operations incurred jointly with the other partners, along with the company's income from the sale of its share of the output and any liabilities and expenses that the company has incurred in relation to the joint operation.

For joint arrangements in a separate entity, judgement may be required as to whether the arrangement should be classified as a joint venture or if the legal form, contractual arrangements or other facts and circumstances indicate that the company has rights to the assets and obligations for the liabilities of the arrangement, rather than rights to the net assets, and therefore should be classified as a joint operation. No such judgement made by the company is considered significant.

Interests in associates
An associate is an entity over which the company has significant influence, through the power to participate in the financial and operating policy decisions of the investee, but which is not a subsidiary or a joint arrangement.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

Interests in other entities

Significant judgements: investments in Aker BP

Judgement is required in assessing the level of control or influence over another entity in which the group holds an interest. For bp, the judgement that the group has significant influence over Aker BP, a Norwegian oil and gas company, is significant.

As a consequence of this judgement, bp uses the equity method of accounting for its investment and bp's share of Aker BP's oil and natural gas reserves is included in the bp group's estimated net proved reserves of equity-accounted entities. If significant influence was not present, the investment would be accounted for as an investment in an equity instrument measured at fair value as described under 'Financial assets' below and no share of Aker BP's oil and natural gas reserves would be reported.

Significant influence is defined in IFRS as the power to participate in the financial and operating policy decisions of the investee but is not control or joint control of those decisions. Significant influence is presumed when an entity owns 20% or more of the voting power of the investee. Significant influence is presumed not to be present when an entity owns less than 20% of the voting power of the investee.

bp owned 15.9% of the voting shares at 31 December 2024. bp's senior vice president North Sea, Doris Reiter, was appointed a member of the Aker BP board during 2024. bp's other nominated director, group chief financial officer, Kate Thomson has been a member of the Aker BP board since formation of that company in 2016. She is also a member of the Aker BP board's Audit and Risk Committee. bp also holds the voting rights at general meetings of shareholders conferred by its stake in Aker BP. bp's management considers, therefore, that bp continues to have significant influence at 31 December 2024.

Significant judgements and estimates: impairment of investments

Determination as to whether, and how much, an investment is impaired involves management estimates on highly uncertain matters such as the effects of inflation and deflation on operating expenses, discount rates, production profiles, reserves and resources, and future commodity prices, including the outlook for global or regional market supply-and-demand conditions for crude oil, natural gas and refined products.

For value in use calculations, future cash flows are adjusted for risks specific to the cash-generating unit and are discounted using a pre-tax discount rate. The pre-tax discount rate is based upon the cost of funding the company derived from an established model, adjusted to a pre-tax basis. Fair value less costs of disposal calculations use the post-tax discount rate. The discount rates applied in impairment tests are reassessed each year.

See 'Significant judgements and estimates: recoverability of asset carrying values' below for details of assumptions used.

Intangible assets

Intangible assets include expenditure on the exploration for and evaluation of oil and natural gas resources and are stated at the amount initially recognized, less accumulated amortization and accumulated impairment losses.

For information on accounting for expenditures on the exploration for and evaluation of oil and natural gas resources, see the accounting policy for oil and natural gas exploration, appraisal and development expenditure below.

Intangible assets are carried initially at cost.

Intangible assets with a finite life are amortized on a straight-line basis over their expected useful lives. Digital asset costs generally have a useful life of three to five years.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

The expected useful lives of assets and the amortization method are reviewed on an annual basis and, if necessary, changes in useful lives or the amortization method are accounted for prospectively.

The carrying value of intangible assets is reviewed for impairment whenever events or changes in circumstances indicate the carrying value may not be recoverable.

Oil and natural gas exploration and appraisal expenditure

Oil and natural gas exploration and appraisal expenditure is accounted for using the principles of the successful efforts method of accounting as described below.

Licence and property acquisition costs

Exploration licence and leasehold property acquisition costs are capitalized within intangible assets and are reviewed at each reporting date to confirm that there is no indication that the carrying amount exceeds the recoverable amount. This review includes confirming that exploration drilling is still under way or planned or that it has been determined, or work is under way to determine, that the discovery is economically viable based on a range of technical and commercial considerations, and sufficient progress is being made on establishing development plans and timing. If no future activity is planned, the remaining balance of the licence and property acquisition costs is written off. Lower value licences are pooled and amortized on a straight-line basis over the estimated period of exploration. Upon internal approval for development and recognition of proved reserves of oil and natural gas, the relevant expenditure is transferred to tangible assets.

Exploration and appraisal expenditure

Geological and geophysical exploration costs are charged to the profit and loss account as incurred. Costs directly associated with an exploration well are capitalized as an intangible asset until the drilling of the well is complete and the results have been evaluated. These costs include employee remuneration, materials and fuel used, rig costs and payments made to contractors. If potentially commercial quantities of hydrocarbons are not found, the exploration well costs are written off. If hydrocarbons are found and, subject to further appraisal activity, are likely to be capable of commercial development, the costs continue to be carried as an asset. If it is determined that development will not occur that is, the efforts are not successful, then the costs are expensed.

Costs directly associated with appraisal activity undertaken to determine the size, characteristics and commercial potential of a reservoir following the initial discovery of hydrocarbons, including the costs of appraisal wells where hydrocarbons were not found, are initially capitalized as an intangible asset. Upon internal approval for development and recognition of proved reserves, the relevant expenditure is transferred to tangible assets. If development is not approved and no further activity is expected to occur, then the costs are expensed.

The determination of whether potentially economic oil and natural gas reserves have been discovered by an exploration well is usually made within one year of well completion, but can take longer, depending on the complexity of the geological structure. Exploration wells that discover potentially economic quantities of oil and natural gas and are in areas where major capital expenditure (e.g. an offshore platform or a pipeline) would be required before production could begin, and where the economic viability of that major capital expenditure depends on the successful completion of further exploration or appraisal work in the area, remain capitalized on the balance sheet as long as such work is under way or firmly planned.

In accordance with section 844(3) of the Companies Act 2006 the directors have determined that it is appropriate not to treat capitalized development costs as a realized loss in determination of distributable reserves as these have been determined in accordance with the applicable accounting standards.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

Significant judgement: exploration and appraisal intangible assets

Judgement is required to determine whether it is appropriate to continue to carry costs associated with exploration wells and exploratory-type stratigraphic test wells on the balance sheet. This includes costs relating to exploration licences or leasehold property acquisitions. It is not unusual to have such costs remaining suspended on the balance sheet for several years while additional appraisal drilling and seismic work on the potential oil and natural gas field is performed or while the optimum development plans and timing are established. The costs are carried based on the current regulatory and political environment or any known changes to that environment. All such carried costs are subject to regular technical, commercial and management review on at least an annual basis to confirm the continued intent to develop, or otherwise extract value from, the discovery. Where this is no longer the case, the costs are immediately expensed.

The carrying amount of capitalized costs and further information on the write-offs are included in Note 11.

Tangible assets

Tangible assets owned by the company are stated at cost, less accumulated depreciation and accumulated impairment losses. The initial cost of an asset comprises its purchase price or construction cost, any costs directly attributable to bringing the asset into the location and condition necessary for it to be capable of operating in the manner intended by management, the initial estimate of any decommissioning obligation, if applicable, and, for assets that necessarily take a substantial period of time to get ready for their intended use, directly attributable finance costs. The purchase price or construction cost is the aggregate amount paid and the fair value of any other consideration given to acquire the asset.

Expenditure on major maintenance refits or repairs comprises the cost of replacement assets or parts of assets, inspection costs and overhaul costs. Where an asset or part of an asset that was separately depreciated is replaced and it is probable that future economic benefits associated with the item will flow to the company, the expenditure is capitalized and the carrying amount of the replaced asset is derecognized. Inspection costs associated with major maintenance programmes are capitalized and amortized over the period to the next inspection. Overhaul costs for major maintenance programmes, and all other maintenance costs are expensed as incurred.

Expenditure on the construction, installation and completion of infrastructure facilities such as platforms, pipelines and the drilling of development wells, including service and unsuccessful development or delineation wells, is capitalized within tangible assets and is depreciated from the commencement of production.

Oil and natural gas properties, including certain related pipelines, are depreciated using a unit-of-production method. The cost of producing wells is amortized over proved developed reserves. Licence acquisition, common facilities and future decommissioning costs are amortized over total proved reserves. The unit-of-production rate for the depreciation of common facilities takes into account expenditures incurred to date, together with estimated future capital expenditure expected to be incurred relating to as yet undeveloped reserves expected to be processed through these common facilities.

Tangible assets are depreciated on a straight-line basis over their expected useful lives. The typical useful lives of the company's tangible assets on initial recognition are as follows:

Land improvements	15 to 25 years
Buildings	20 to 50 years
Plant and machinery	5 to 15 years
Fixtures and fittings	5 to 15 years

The expected useful lives and depreciation method of tangible assets are reviewed on an annual basis and, if necessary, changes in useful lives or the depreciation method are accounted for prospectively.

The carrying amounts of tangible assets are reviewed for impairment whenever events or changes in circumstances indicate the carrying value may not be recoverable.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

An item of tangible assets is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the profit and loss account in the period in which the item is derecognized.

Impairment of intangible and tangible assets

The company assesses assets or groups of assets, called cash-generating units (CGUs), for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or CGU may not be recoverable, for example, changes in the company's business plans, plans to dispose rather than retain assets, changes in the company's assumptions about discount rates, commodity prices, low plant utilization, evidence of physical damage or, for oil and gas assets, significant downward revisions of estimated reserves or increases in estimated future development expenditure or decommissioning costs. If any such indication of impairment exists, the company makes an estimate of the asset's or CGU's recoverable amount. Individual assets are grouped into CGUs for impairment assessment purposes at the lowest level at which there are identifiable cash inflows that are largely independent of the cash inflows of other groups of assets. A CGU's recoverable amount is the higher of its fair value less costs of disposal and its value in use. If it is probable that the value of the CGU will be primarily recovered through a disposal transaction, the expected disposal proceeds are considered in determining the recoverable amount. Where the carrying amount of a CGU exceeds its recoverable amount, the CGU is considered impaired and is written down to its recoverable amount.

The business segment plans, which are approved on an annual basis by senior management, are the primary source of information for the determination of value in use. They contain forecasts for oil and natural gas production, revenues, costs and capital expenditure. Carbon taxes and costs of emissions allowances are also included in estimates of future cash flows, based on the regulatory environment in each jurisdiction in which the group operates. As an initial step in the preparation of these plans, various assumptions regarding market conditions, such as oil prices, natural gas prices, refining margins, refined product margins and cost inflation rates are set by senior management. These assumptions take account of existing prices, global supply-demand equilibrium for oil and natural gas, other macroeconomic factors and historical trends and variability. In assessing value in use, the estimated future cash flows are adjusted for the risks specific to the asset group to the extent that they are not already reflected in the discount rate and are discounted to their present value typically using a pre-tax discount rate that reflects current market assessments of the time value of money.

Fair value less costs of disposal is the price that would be received to sell the asset in an orderly transaction between market participants and does not reflect the effects of factors that may be specific to the entity and not applicable to entities in general. Fair value may be determined by reference to agreed or expected sales proceeds, recent market transactions for similar assets or using discounted cash flow analyses. Where discounted cash flow analyses are used to calculate fair value less costs of disposal, estimates are made about the assumptions market participants would use when pricing the asset, CGU or group of CGUs and the test is performed on a post-tax basis.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such an indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's or CGU's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset or CGU is increased to the lower of its recoverable amount and the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset or CGU in prior years. Impairment reversal is recognized in profit or loss. After such a reversal, the depreciation charge is adjusted in future periods to allocate the asset's or CGU's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

DT

Significant judgements and estimates: recoverability of asset carrying values

Determination as to whether, and by how much, an asset, CGU, or group of CGUs is impaired involves management estimates on highly uncertain matters such as the effects of inflation and deflation on operating expenses, discount rates, capital expenditure, carbon pricing (where applicable), production profiles, reserves and resources, and future commodity prices, including the outlook for global or regional market supply-and-demand conditions for crude oil, natural gas, power and refined products. Judgement is required when determining the appropriate grouping of assets into a CGU or the appropriate grouping of CGUs for impairment testing purposes. For example, individual oil and gas properties may form separate CGUs whilst certain oil and gas properties with shared infrastructure may be grouped together to form a single CGU. Alternative groupings of assets or CGUs may result in a different outcome from impairment testing.

The recoverable amount of an asset is the higher of its value in use and its fair value less costs of disposal. Fair value less costs of disposal may be determined based on expected sales proceeds or similar recent market transaction data.

Details of impairment charges and reversals recognized in the profit and loss account are provided in Note 4 and details of the carrying amounts of assets are shown in Note 11, Note 12 and Note 13.

The estimates for assumptions made in impairment tests in 2024 relating to discount rates and oil and gas properties are discussed below. Changes in the economic environment including as a result of the energy transition or other facts and circumstances may necessitate revisions to these assumptions and could result in a material change to the carrying values of the company's assets within the next financial year.

Discount rates

For discounted cash flow calculations, future cash flows are adjusted for risks specific to the CGU. Value in use calculations are typically discounted using a pre-tax discount rate based upon the cost of funding the bp group derived from an established model, adjusted to a pre-tax basis and incorporating a market participant capital structure and country risk premiums. Fair value less costs of disposal discounted cash flow calculations use a post-tax discount rate.

The discount rates applied in impairment tests are reassessed each year and, in 2024 the post-tax discount rate was 8% (2023 8%). Where the CGU is located in a country that was judged to be higher risk, an additional premium of 1% to 3% was reflected in the discount rate (2023 1% to 4%). The judgement of classifying a country as higher risk and the applicable premium takes into account various economic and geopolitical factors. The nominal pre-tax discount rate typically ranged from 9% to 20% (2023 9% to 20%) depending on the risk premium and applicable tax rate in the geographic location of the CGU. This excludes the impact of the temporary Energy Profits Levy.

Oil and natural gas properties

For oil and natural gas properties expected future cash flows are estimated using management’s best estimate of future oil and natural gas prices, production and reserves and certain resources volumes. Forecast cash flows include the impact of all approved emission reduction projects. The estimated future level of production in all impairment tests is based on assumptions about future commodity prices, production and development costs, field decline rates, current fiscal regimes and other factors.

In 2024, the company identified no oil and gas properties (2023 $Nil) where the headroom, as at the dates of the last impairment test performed on those assets, was less than or equal to 20% of the carrying value. A change in the discount rate, reserves, resources or the oil and gas price assumptions in the next financial year may result in a recoverable amount of one or more of these assets above or below the current carrying amount and therefore there is a risk of impairment reversals or charges in that period.

The recoverability of intangible exploration and appraisal expenditure is covered under Oil and natural gas exploration, appraisal and development expenditure above.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

Information on the carrying amounts of the company's oil and natural gas properties, together with the amounts recognized as depreciation, depletion and amortization is contained in Note 12.

Oil and natural gas prices

The price assumptions used for value in use impairment testing are based on those used for investment appraisal. bp's carbon emissions cost assumptions and their interrelationship with oil and gas prices are described in 'Judgements and estimates made in assessing the impact of climate change and the transition to a lower carbon economy' on page 29. The investment appraisal price assumptions are recommended by the senior vice president economic & energy insights after considering a range of external price sets, and supply and demand profiles associated with various energy transition scenarios. They are reviewed and approved by management. As a result of the current uncertainty over the pace of transition to lower-carbon supply and demand and the social, political and environmental actions that will be taken to meet the goals of the Paris climate change agreement, the scenarios considered include those where those goals are met as well as those where they are not met.

During the year, bp's price assumptions applied in value in use impairment testing were revised. The revised price assumptions have been rebased in real 2023 terms and are materially consistent with the disclosed prices in real 2022 terms. The near term Brent oil assumption was held constant at $70 per barrel to reflect near term supply constraints before declining after 2030 to $50 per barrel by 2050 continuing to reflect the assumption that as the energy system decarbonizes, falling oil demand will cause oil prices to decline. The price assumptions for Henry Hub gas up to 2050 were held constant at $4.00 per mmBtu reflecting an assumption that declining domestic demand in the US is offset by higher LNG exports. These price assumptions are derived from the central case investment appraisal assumptions. A summary of the group's revised price assumptions for Brent oil and Henry Hub gas, applied in 2024 and 2023, in real 2023 terms, is provided below. The assumptions represent management's best estimate of future prices at the balance sheet date, which sit within the range of external scenarios considered as appropriate for the purpose. They are considered by bp to be in line with a range of transition paths consistent with the temperature goal of the Paris climate change agreement, of holding the increase in the global average temperature to well below 2°C above pre-industrial levels and pursuing efforts to limit the temperature increase to 1.5°C above pre-industrial levels. However, they do not correspond to any specific Paris-consistent scenario. Inflation rate of 2.0-2.5%(2023 2.0%) is applied to determine the price assumptions in nominal terms.

2024 price assumptions		2025	2030	2040	2050
Brent oil ($/bbl)		70	70	63	50
Henry Hub gas ($/mmBtu)		4.00	4.00	4.00	4.00
2023 price assumptions	2024	2025	2030	2040	2050
Brent oil ($/bbl)	71	71	71	59	46
Henry Hub gas ($/mmBtu)	4.06	4.05	4.05	4.05	4.05

Global oil production increased by 1.4% in 2024 with this growth predominantly coming from non-OPEC countries as OPEC+ continued its output reductions. Global oil demand growth slowed, increasing by 0.9% in 2024 as we leave the post-Covid recovery period and Chinese demand fell short of forecasts. Brent dropped by nearly $2 per barrel in 2024 in response to lacklustre demand growth and increasing supply. While geopolitical risk (e.g. tariffs, sanctions) may support prices in the short-term, bp's long-term assumption for oil prices is lower than the 2024 average as oil demand is likely to fall such that the price levels needed to encourage sufficient investment to meet global oil demand will also be lower.

US Henry Hub spot prices averaged $2.2/mmBtu in 2024 from $2.5/mmBtu in 2023. Prices fell further in order to reduce output and stimulate demand in the power sector. Milder than normal winter weather during winter 2023/2024 left US gas storage levels over 20% above historic average levels at the end of winter 2023/2024, causing prices to fall below $2/mmBtu. Meanwhile, after growing by 4 Bcf/d in 2023, low prices caused natural gas production to fall by 0.4 Bcf/d in 2024, helping to bring the market back into balance. The level of US gas prices in 2024 was below bp's long term price assumption based on the judgment of the price level required to incentivize new production.

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

Oil and natural gas reserves

In addition to oil and natural gas prices, significant technical and commercial assessments are required to determine the company's estimated oil and natural gas reserves. Reserves estimates are regularly reviewed and updated. Factors such as the availability of geological and engineering data, reservoir performance data, acquisition and divestment activity and drilling of new wells all impact on the determination of the company's estimates of its oil and natural gas reserves. bp bases its reserves estimates on the requirement of reasonable certainty with rigorous technical and commercial assessments based on conventional industry practice and regulatory requirements.

Reserves assumptions for value in use tests reflect the reserves and resources that management currently intend to develop. The recoverable amount of oil and gas properties is determined using a combination of inputs including reserves, resources and production volumes. Risk factors may be applied to reserves and resources which do not meet the criteria to be treated as proved or probable.

Sensitivity analyses

Management considers discount rates, oil and natural gas prices and production to be the key sources of estimation uncertainty in determining the recoverable amount of upstream oil and gas assets. The sensitivity analyses below, in addition to covering the key sources of estimation uncertainty, also indicate how the energy transition, potential future carbon emissions costs for operational GHG emissions and/or reduced demand for oil and gas may further impact forecast revenue cash inflows to a greater extent than currently anticipated in the company's value in use estimates for oil and gas CGUs, if carbon emissions costs were to be implemented as a deduction against revenue cash flows. The analyses therefore represent a net revenue sensitivity.

A change in net revenue from upstream oil and gas properties can arise either due to changes in oil and natural gas prices, carbon emissions costs/carbon prices, changes in oil and natural gas production, or a combination of these.

Management tested the impact of changes in net revenue cash flows in value-in-use impairment testing under the following sensitivity analyses: an increase in net revenues of 8% in all years up to 2040 and 25% in all remaining years to 2050; and a decrease in net revenues of 20% in all years up to 2030, 35% in all subsequent years to 2040 and 50% in all remaining years to 2050.

Net revenue reductions of this magnitude in isolation could indicatively lead to a reduction in the carrying amount of the company's upstream oil and gas properties in the amount of $1,929 million of the net book value of property, plant and equipment as at 31 December 2024. If this net revenue reduction was solely due to reductions in oil prices in isolation, it reflects an indicative decrease in the carrying amount of using price assumptions for Brent oil trending broadly towards the bottom of the range of prices associated with a pre-publication version of the World Business Council for Sustainable Development (WBCSD) 'family' of scenarios considered to be consistent with limiting global average temperature to 1.5°C above pre-industrial levels.

Net revenue increases of this magnitude in isolation could indicatively lead to an increase in the carrying amount of the company's upstream oil and gas properties in the amount of $381 million of the net book value of property, plant and equipment as at 31 December 2024. This potential increase in the carrying amount would arise due to reversals of previously recognized impairments. If this net revenue increase was solely due to increases in oil prices in isolation, it reflects an indicative increase in the carrying amount of using price assumptions for Brent oil trending broadly towards the top end until 2040, and then towards the mean average at 2050, of the range of prices associated with a pre-publication version of the WBCSD 'family' of scenarios considered to be consistent with limiting global average temperature to 1.5°C above pre-industrial levels.

These sensitivity analyses do not, however, represent management's best estimate of any impairment charges or reversals that might be recognized as they do not fully incorporate consequential changes that may arise, such as changes in costs and business plans and phasing of development. For example, costs across the industry are more likely to decrease as oil and natural gas prices fall. The analyses also assume the

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

impact of increases in carbon price on operational GHG emissions are fully absorbed as a decrease in net revenue (and vice versa) rather than reflecting how carbon prices or other carbon emissions costs may ultimately be incorporated by the market. The above sensitivity analyses therefore do not reflect a linear relationship between net revenue and value that can be extrapolated. The interdependency of these inputs and risk factors plus the diverse characteristics of the company's upstream oil and gas properties limits the practicability of estimating the probability or extent to which the overall recoverable amount is impacted by changes to the price assumptions or production volumes.

Management also tested the impact of a 1% change in the discount rate used for value in use impairment testing of upstream oil and gas properties. This level of change reflects past experience of a reasonable change in rate that could arise within the next financial year. If the discount rate was 1% higher across all tests performed, the net impairment loss recognized in 2024 would have been approximately $128 million higher. If the discount rate was one percentage point lower, the net impairment loss recognized would have been approximately $99 million lower.

Stock

Stocks are stated at the lower of cost and net realizable value. Cost is typically determined by the first-in first-out method and comprises direct purchase costs, cost of production, transportation and manufacturing expenses. Net realizable value is based on estimated selling price less any further costs expected to be incurred to completion and disposal. Net realizable value is determined by reference to prices existing at the balance sheet date, adjusted where the sale of inventories after the reporting period gives evidence about their net realizable value at the end of the period.

Supplies are valued at the lower of cost on a weighted-average basis and net realizable value.

Leases

Agreements that convey the right to control the use of an identified asset for a period of time in exchange for consideration are accounted for as leases. The right to control is conveyed if bp has both the right to obtain substantially all of the economic benefits from, and the right to direct the use of, the identified asset throughout the period of use. An asset is identified if it is explicitly or implicitly specified by the agreement and any substitution rights held by the lessor over the asset are not considered substantive.

Agreements that convey the right to control the use of an intangible asset including rights to explore for or use hydrocarbons are not accounted for as leases. See material accounting policy information: intangible assets.

A lease liability is recognized on the balance sheet on the lease commencement date at the present value of future lease payments over the lease term. The discount rate applied is the rate implicit in the lease if readily determinable, otherwise an incremental borrowing rate is used. For the majority of the leases in the company, there is not sufficient information available to readily determine the rate implicit in the lease, and therefore the incremental borrowing rate is used. The incremental borrowing rate is determined based on factors such as the company’s cost of borrowing, lessee legal entity credit risk, currency and lease term. The lease term is the non-cancellable period of a lease together with any periods covered by an extension option that bp is reasonably certain to exercise, or periods covered by a termination option that bp is reasonably certain not to exercise. The future lease payments included in the present value calculation are any fixed payments, payments that vary depending on an index or rate, payments due for the reasonably certain exercise of options and expected residual value guarantee payments.

Payments that vary based on factors other than an index or a rate such as usage, sales volumes or revenues are not included in the present value calculation and are recognized in the profit and loss account. The lease liability is recognized on an amortized cost basis with interest expense recognized in the profit and loss account over the lease term, except where capitalized as exploration, appraisal or development expenditure.

The right-of-use asset is recognized on the balance sheet as tangible assets at a value equivalent to the initial measurement of the lease liability adjusted for lease prepayments, lease incentives, initial direct costs and

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

any restoration obligations. The right-of-use asset is depreciated typically on a straight-line basis over the lease term. The depreciation charge is recognized in the profit and loss account, except for where capitalized as exploration, appraisal or development expenditure. Right-of-use assets are assessed for impairment in line with the accounting policy for impairment of tangible and intangible assets.

Agreements may include both lease and non-lease components. Payments for lease and non-lease components are allocated on a relative stand-alone selling price basis.

If the lease term at commencement of the agreement is less than 12 months, a lease liability and right-of-use asset are not recognized, and a lease expense is recognized in the profit and loss account on a straight-line basis.

If a significant event or change in circumstances, within the control of bp, arises that affects the reasonably certain lease term or there are changes to the lease payments, the present value of the lease liability is remeasured using the revised term and payments, with the right-of-use asset adjusted by an equivalent amount.

Modifications to a lease agreement beyond the original terms and conditions are accounted for as a re-measurement of the lease liability with a corresponding adjustment to the right-of-use asset. Any gain or loss on modification is recognized in the profit and loss account. Modifications that increase the scope of the lease at a price commensurate with the stand-alone selling price are accounted for as a separate new lease.

The company recognizes the full lease liability, rather than its working interest share, for leases entered into on behalf of a joint operation if the company has the primary responsibility for making the lease payments. In such cases, the company's working interest share of the right-of-use asset is recognized if it is jointly controlled by the company and the other joint operators, and a receivable is recognized for the share of the asset transferred to the other joint operators. If the company is a non-operator, a payable to the operator is recognized if they have the primary responsibility for making the lease payments and the company has joint control over the right-of-use asset, otherwise no balances are recognized.

Financial assets

Financial assets are recognized initially at fair value, normally being the transaction price. In the case of financial assets not measured at fair value through profit or loss, directly attributable transaction costs are also included. The subsequent measurement of financial assets depends on their classification, as set out below. The company derecognizes financial assets when the contractual rights to the cash flows expire or the rights to receive cash flows have been transferred to a third party and either substantially all of the risks and rewards of the asset have been transferred, or substantially all the risks and rewards of the asset have neither been retained nor transferred but control of the asset has been transferred.

The company classifies its financial assets as measured at amortized cost or fair value through profit or loss. The classification depends on the business model for managing the financial assets and the contractual cash flow characteristics of the financial asset.

Financial assets measured at amortized cost

Financial assets are classified as measured at amortized cost when they are held in a business model the objective of which is to collect contractual cash flows and the contractual cash flows represent solely payments of principal and interest. Such assets are carried at amortized cost using the effective interest method if the time value of money is significant. Gains and losses are recognized in profit or loss when the assets are derecognized or impaired and when interest income is recognized using the effective interest method. This category of financial assets includes trade and other receivables.

Financial assets measured at fair value through profit or loss

Financial assets are classified as measured at fair value through profit or loss when the asset does not meet the criteria to be measured at amortized cost. Such assets are carried on the balance sheet at fair value with

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

gains or losses recognized in the profit and loss account. Derivatives, other than those designated as effective hedging instruments, are included in this category.

Derivatives designated as hedging instruments in an effective hedge
Derivatives designated as hedging instruments in an effective hedge are carried on the balance sheet at fair value. The treatment of gains and losses arising from revaluation is described below in the accounting policy for derivative financial instruments and hedging activities.

Impairment of financial assets measured at amortized cost
The company assesses on a forward-looking basis the expected credit losses associated with financial assets measured at amortized cost at each balance sheet date. Expected credit losses are measured based on the maximum contractual period over which the company is exposed to credit risk. As lifetime expected credit losses are recognized for trade receivables and the tenor of substantially all other in-scope financial assets is less than 12 months there is no significant difference between the measurement of 12-month and lifetime expected credit losses for the company. The measurement of expected credit losses is a function of the probability of default, loss given default and exposure at default. The expected credit loss is estimated as the difference between the asset's carrying amount and the present value of the future cash flows the company expects to receive, discounted at the financial asset's original effective interest rate. The carrying amount of the asset is adjusted, with the amount of the impairment gain or loss recognized in the profit and loss account.

A financial asset or group of financial assets classified as measured at amortized cost is considered to be credit-impaired if there is reasonable and supportable evidence that one or more events that have a detrimental impact on the estimated future cash flows of the financial asset (or group of financial assets) have occurred. Financial assets are written off where the company has no reasonable expectation of recovering amounts due.

Financial liabilities

Financial liabilities are recognized when the company becomes party to the contractual provisions of the instrument. The company derecognizes financial liabilities when the obligation specified in the contract is discharged, cancelled or expired. The measurement of financial liabilities depends on their classification, as follows:

Financial liabilities measured at fair value through profit or loss
Financial liabilities that meet the definition of held for trading are classified as measured at fair value through profit or loss. Such liabilities are carried on the balance sheet at fair value with gains or losses recognized in the profit and loss account. Derivatives, other than those designated as effective hedging instruments, are included in this category.

Derivatives designated as hedging instruments in an effective hedge
Derivatives designated as hedging instruments in an effective hedge are carried on the balance sheet at fair value. The treatment of gains and losses arising from revaluation is described below in the accounting policy for derivative financial instruments and hedging activities.

Financial liabilities measured at amortized cost
All other financial liabilities are initially recognized at fair value, net of directly attributable transaction costs. For interest-bearing loans and borrowings this is typically equivalent to the fair value of the proceeds received, net of issue costs associated with the borrowing.

After initial recognition, these financial liabilities are subsequently measured at amortized cost using the effective interest method. This category of financial liabilities includes trade and other payables.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

Financial guarantees

The company issues financial guarantee contracts to make specified payments to reimburse holders for losses incurred if certain associates, joint ventures or third-party entities fail to make payments when due in accordance with the original or modified terms of a debt instrument such as a loan. The liability for a financial guarantee contract is initially measured at fair value and subsequently measured at the higher of the contract's estimated expected credit loss and the amount initially recognized less, where appropriate, cumulative amortization.

Derivative financial instruments and hedging activities

The company is exempt from the disclosure requirements of IFRS 7 Financial Instruments: Disclosures and IFRS 13 Fair value measurement as the company is included in the consolidated financial statements of the ultimate parent undertaking, BP p.l.c., which include the disclosures on a group basis that comply with these standards. Relevant disclosures as required by the Companies Act 2006 in relation to instruments held at fair value have been included in these financial statements.

The company uses derivative financial instruments to manage certain exposures to fluctuations in foreign currency exchange rates. These derivative financial instruments are recognized initially at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

If, at inception of a contract, the valuation cannot be supported by observable market data, any gain or loss determined by the valuation methodology is not recognized in the profit and loss account but is deferred on the balance sheet and is commonly known as 'day-one profit or loss'. This deferred gain or loss is recognized in the profit and loss account over the life of the contract until substantially all the remaining contractual cash flows can be valued using observable market data at which point any remaining deferred gain or loss is recognized in the profit and loss account. Changes in valuation subsequent to the initial valuation at inception of a contract are recognized immediately through the profit and loss account.

For the purpose of hedge accounting, hedges are classified as:

- Fair value hedges when hedging exposure to changes in the fair value of a recognized asset or liability.
- Cash flow hedges when hedging exposure to variability in cash flows that is attributable to either a particular risk associated with a recognized asset or liability or a highly probable forecast transaction.

Hedge relationships are formally designated and documented at inception, together with the risk management objective and strategy for undertaking the hedge. The documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged, the existence at inception of an economic relationship and subsequent measurement of the hedging instrument's effectiveness in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk, the hedge ratio and sources of hedge ineffectiveness. Hedges meeting the criteria for hedge accounting are accounted for as follows:

Cash flow hedges

The effective portion of the gain or loss on a cash flow hedging instrument is reported in other comprehensive income, while the ineffective portion is recognized in profit or loss. Amounts reported in other comprehensive income are reclassified to the profit and loss account when the hedged transaction affects the profit or loss.

Where the hedged item is a highly probable forecast transaction that results in the recognition of a non-financial asset or liability, such as a forecast foreign currency transaction for the purchase of tangible assets, the amounts recognized within other comprehensive income are transferred to the initial carrying amount of the non-financial asset or liability. Where the hedged item is an equity investment, the amounts recognized in other comprehensive income remain in the separate component of equity until the hedged cash flows affect profit or loss. Where the hedged item is recognized directly in profit or loss, the amounts recognized in

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

other comprehensive income are reclassified to production and manufacturing expenses or other operating revenues as appropriate.
Cash flow hedge accounting is discontinued only when the hedging relationship or a part thereof ceases to meet the qualifying criteria. This includes when the designated hedged forecast transaction or part thereof is no longer considered to be highly probable to occur, or when the hedging instrument is sold, terminated or exercised without replacement or rollover. When cash flow hedge accounting is discontinued, amounts previously recognized within other comprehensive income remain in equity until the forecast transaction occurs and are reclassified to profit or loss or transferred to the initial carrying amount of a non-financial asset or liability as above. If the forecast transaction is no longer expected to occur, amounts previously recognized within other comprehensive income will be immediately reclassified to profit or loss.

Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The company categorizes assets and liabilities measured at fair value into one of three levels depending on the ability to observe inputs employed in their measurement. Level 1 inputs are quoted prices in active markets for identical assets or liabilities. Level 2 inputs are inputs that are observable, either directly or indirectly, other than quoted prices included within level 1 for the asset or liability. Level 3 inputs are unobservable inputs for the asset or liability reflecting significant modifications to observable related market data or bp's assumptions about pricing by market participants.

Offsetting of financial assets and liabilities
Financial assets and liabilities are presented gross in the balance sheet unless both of the following criteria are met: the company currently has a legally enforceable right to set off the recognized amounts; and the company intends to either settle on a net basis or realize the asset and settle the liability simultaneously. If both of the criteria are met, the amounts are set off and presented net. A right of set off is the company's legal right to settle an amount payable to a creditor by applying against it an amount receivable from the same counterparty. The relevant legal jurisdiction and laws applicable to the relationships between the parties are considered when assessing whether a current legally enforceable right to set off exists.

Provisions and contingent liabilities
Provisions are recognized when the company has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where appropriate, the future cash flow estimates are adjusted to reflect risks specific to the liability.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax risk-free rate that reflects current market assessments of the time value of money. Where discounting is used, the increase in the provision due to the passage of time is recognized in the profit and loss account. Provisions are discounted using a nominal discount rate of 4.5% (2023 4.0%).

Contingent liabilities are possible obligations whose existence will only be confirmed by future events not wholly within the control of the company, or present obligations where it is not probable that an outflow of resources will be required or the amount of the obligation cannot be measured with sufficient reliability. Contingent liabilities are not recognized in the financial statements but are disclosed, if material, unless the possibility of an outflow of economic resources is considered remote.

Decommissioning
Liabilities for decommissioning costs are recognized when the company has an obligation to plug and abandon a well, dismantle and remove a facility or an item of plant and to restore the site on which it is located, and when a reliable estimate of that liability can be made. Where an obligation exists for a new facility or item of plant, such as oil and natural gas production or transportation facilities, this liability will be recognized on construction or installation. Similarly, where an obligation exists for a well, this liability is recognized when it is drilled. An obligation for decommissioning may also crystallize during the period of operation of a well, facility or item of plant through a change in legislation or through a decision to terminate

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

operations; an obligation may also arise in cases where an asset has been sold but the subsequent owner is no longer able to fulfil its decommissioning obligations, for example due to bankruptcy. The amount recognized is the present value of the estimated future expenditure determined in accordance with the local conditions and requirements. The provision for the costs of decommissioning wells, production facilities and pipelines at the end of their economic lives is estimated using existing technology, at future prices, depending on the expected timing of the activity, and discounted using a nominal discount rate.

An amount equivalent to the decommissioning provision is recognized as part of the corresponding intangible asset (in the case of an exploration or appraisal well) or tangible assets. The decommissioning portion of the tangible assets is subsequently depreciated at the same rate as the rest of the asset. Other than the unwinding of discount on or utilization of the provision, any change in the present value of the estimated expenditure is reflected as an adjustment to the provision and the corresponding asset where that asset is generating or is expected to generate future economic benefits.

Environmental expenditures and liabilities

Environmental expenditures that are required in order for the company to obtain future economic benefits from its assets are capitalized as part of those assets. Expenditures that relate to an existing condition caused by past operations that do not contribute to future earnings are expensed.

Liabilities for environmental costs are recognized when a clean-up is probable and the associated costs can be reliably estimated. Generally, the timing of recognition of these provisions coincides with the commitment to a formal plan of action or, if earlier, on divestment or on closure of inactive sites.

The amount recognized is the best estimate of the expenditure required to settle the obligation. Provisions for environmental liabilities have been estimated using existing technology, at future prices and discounted using a nominal discount rate.

Emissions

Liabilities for emissions are recognized when the cumulative volumes of gases emitted by the company at the end of the reporting period exceed the allowances granted free of charge held for own use or a set baseline for emissions. The provision is measured at the best estimate of the expenditure required to settle the present obligation at the balance sheet date. It is based on the excess of actual emissions over the free allowances held or set baseline in tonnes (or other appropriate quantity) and is valued at the actual cost of any allowances that have been purchased and held for own use on a first-in-first-out (FIFO) basis, and, if insufficient allowances are held, for the remaining requirement on the basis of the spot market price of allowances at the balance sheet date. The majority of these provisions are typically settled within 12 months of the balance sheet date however certain schemes may have longer compliance periods. The cost of allowances purchased to cover a shortfall is recognized separately on the balance sheet as an intangible asset unless the emission allowances acquired or generated by the group are risk-managed by the supply, trading and shipping function, then they are recognized on the balance sheet as inventory.

Restructuring provisions

Restructuring provisions are recognized where a detailed formal plan exists, and a valid expectation of risk of redundancy has been made to those affected but where the specific outcomes remain uncertain. Where formal redundancy offers have been made, the obligations for those amounts are reported as payables and, if not, as provisions if unpaid at the year-end.

Significant judgements and estimates: provisions

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

The company holds provisions for the future decommissioning of oil and natural gas production facilities and pipelines at the end of their economic lives. The largest decommissioning obligations facing the company relate to the plugging and abandonment of wells and the removal and disposal of oil and natural gas platforms and pipelines. Most of these decommissioning events are many years in the future and the precise requirements that will have to be met when the removal event occurs are uncertain. Decommissioning technologies and costs are constantly changing, as well as political, environmental, safety and public expectations. The timing and amounts of future cash flows are subject to significant uncertainty and estimation if required in determining the amounts of provisions to be recognized. Any changes in the expected future costs are reflected in both the provision and, where still recognized, the asset.

If oil and natural gas production facilities and pipelines are sold to third parties, judgement is required to assess whether the new owner will be unable to meet their decommissioning obligations, whether the company would then be responsible for decommissioning, and if so the extent of that responsibility. This typically requires assessment of the local legal requirements and the financial standing of the owner. If the standing deteriorates significantly, for example, bankruptcy of the owner, a provision may be required. The company has assessed that no decommissioning provisions should be recognized as at 31 December 2024 (2023 no significant provision) for assets previously sold to third parties where the sale transferred the decommissioning obligation to the new owner.

The timing and amount of future expenditures relating to decommissioning and environmental liabilities are reviewed annually. The interest rate used in discounting the cash flows is reviewed quarterly. The nominal interest rate used to determine the balance sheet obligations at the end of 2024 was 4.5% (2023 4%), which was based on long-dated US government bonds.The weighted average period over which decommissioning costs are generally expected to be incurred is estimated to be approximately 15 years (2023 16 years). Costs at future prices are determined by applying an inflation rate of 1.5% (2023 1.5%) to decommissioning costs and 2% (2023 2%) for all other provisions. A lower rate is typically applied to decommissioning as certain costs are expected to remain fixed at current or past prices.

The estimated phasing of undiscounted cash flows in real terms for the upstream decommissioning is approximately $1,164 million (2023 $1,009 million) within the next 10 years, $1,725 million (2023 $1,628 million) in 10 to 20 years and the remainder of approximately $765 million (2023 $764 million) after 20 years. The timing and amount of decommissioning cash flows are inherently uncertain and therefore the phasing is management’s current best estimate but may not be what will ultimately occur.

Further information about the company’s provisions is provided in Note 20. Changes in assumptions in relation to the company's provisions could result in a material change in their carrying amounts within the next financial year. A 1.0 percentage point increase in the nominal discount rate applied could decrease the company’s provision balances by approximately $273 million (2023 $293 million). The pre-tax impact on the company's income statement would be a credit of approximately $91 million (2023 $96 million). This level of change reflects past experience of a reasonable change in rate that could arise within the next financial year.

The discounting impact on the company's decommissioning provisions for oil and gas properties in the oil productions & operations and gas & low carbon energy segments of a two-year change in the timing of expected future decommissioning expenditures is approximately $131 million (2023 $113 million). Management currently does not consider a change of greater than two years to be reasonably possible in the next financial year and therefore the timing of upstream decommissioning expenditure is not a key source of estimation uncertainty.
If all expected future decommissioning expenditures were 10% higher, then these decommissioning provisions would increase by approximately $237 million (2023 $242 million) with a pre-tax charge of approximately $89 million (2023 $100 million).

Employee benefits
Wages, salaries, bonuses, social security contributions, paid annual leave and sick leave are accrued in the period in which the associated services are rendered by employees of the company. Deferred bonus arrangements that have a vesting date more than 12 months after the balance sheet date are valued on an

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

actuarial basis using the projected unit credit method and amortized on a straight-line basis over the service period until the award vests. The accounting policies for share-based payments and for pensions and other post-employment benefits are described below.

Share-based payments

Equity-settled transactions

The cost of equity-settled transactions with employees of the company is measured by reference to the fair value at the date at which equity instruments are granted and is recognized as an expense on a straight-line basis over the vesting period, which ends on the date on which the employees become fully entitled to the award. A corresponding credit is recognized within equity. The culmulative expense is recognised at each reporting date until the vesting date reflects the extend to which the vesting period has expired and the company's best estimate of the number of options that will ultimately vest. Expenses related to these payments are offset by a recharge from BP p.l.c, which is further accounted for as an equity deduction. Fair value is determined by using an appropriate valuation model. In valuing equity-settled transactions, no account is taken of any vesting conditions, other than conditions linked to the price of the shares of the BP p.l.c. (market conditions). Non-vesting conditions, such as the condition that employees contribute to a savings-related plan, are taken into account in the grant-date fair value, and failure to meet a non-vesting condition, where this is within the control of the employee, is treated as a cancellation and any remaining unrecognized cost is expensed.

Pensions

The sponsoring employer for the BP Pension Fund is BP p.l.c. The directors have assessed in accordance with IAS 19 Employee Benefits that BP p.l.c. applies defined benefit pension accounting for this defined benefit plan that shares risks between entities under common control. There is no contractual agreement or stated policy in place for charging to individual group entities. The net defined benefit cost for the plan as a whole is measured in accordance with IAS 19 and as a result, the company recognizes only a cost equal to the contribution payable for the period as if they were contributions to a defined contribution scheme. Relevant disclosures in relation to the plan are included in the accounts of BP p.l.c.

In the BP p.l.c. accounts, pension plan assets are measured at fair value and pension plan liabilities are measured on an actuarial basis using the projected unit credit method and discounted at an interest rate equivalent to the current rate of return on a high-quality corporate bond of equivalent currency and term to the plan liabilities. Actuarial gains and losses are recognized in full in this company's statement of total recognized gains and losses in the period in which they occur.

Remeasurements of the defined benefit liability and asset, comprising actuarial gains and losses, and the return on plan assets (excluding amounts included in net interest) are recognised within this company's statement of total recognised gains and losses in the period in which they occur.

Taxation

Income tax expense represents the sum of current tax and deferred tax.

Income tax is recognized in the profit and loss account, except to the extent that it relates to items recognized in other comprehensive income or directly in equity, in which case the related tax is recognized in other comprehensive income or directly in equity.

Current tax is based on the taxable profit for the period. Taxable profit differs from net profit as reported in the profit and loss account because it is determined in accordance with the rules established by the applicable taxation authorities. It therefore excludes items of income or expense that are taxable or deductible in other periods as well as items that are never taxable or deductible. The company's liability for current tax is calculated using tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is provided, using the balance sheet method, on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

Deferred tax liabilities are recognized for all taxable temporary differences except:

- Where the deferred tax liability arises on the initial recognition of an asset or liability in a transaction that is not a business combination, at the time of the transaction, affects neither accounting profit nor taxable profit or loss and, at the time of the transaction, does not give rise to equal taxable and deductible temporary differences.; or
- In respect of taxable temporary differences associated with investments in group undertakings and associates and interests in joint arrangements, where the company is able to control the timing of the reversal of the temporary differences and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for deductible temporary differences, carry-forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry-forward of unused tax credits and unused tax losses can be utilized, except where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination, at the time of the transaction, affects neither accounting profit nor taxable profit or loss and, at the time of the transaction, does not give rise to equal taxable and deductible temporary differences.

In respect of deductible temporary differences associated with investments in group undertakings and associates and interests in joint arrangements, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable or increased to the extent that it is probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance sheet date. Deferred tax assets and liabilities are not discounted.

Deferred tax assets and liabilities are offset only when there is a legally enforceable right to set off current tax assets against current tax liabilities and when the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the current tax assets and liabilities on a net basis or to realize the assets and settle the liabilities simultaneously.

Where tax treatments are uncertain, if it is considered probable that a taxation authority will accept the company's proposed tax treatment, income taxes are recognized consistent with the company's income tax filings. If it is not considered probable, the uncertainty is reflected within the carrying amount of the applicable tax asset or liability using either the most likely amount or an expected value, depending on which method better predicts the resolution of the uncertainty.

Judgement is required when determining whether a particular tax is an income tax or another type of tax (for example a production tax). Accounting for deferred tax is applied to income taxes as described above but is not applied to other types of taxes; rather such taxes are recognized in the profit and loss account in accordance with the applicable accounting policy such as Provisions and contingent liabilities.

In July 2023, the UK government enacted legislation to implement the Pillar Two Model rules. The legislation is effective for bp from 1 January 2024 and includes an income inclusion rule and a domestic minimum tax, which together are designed to ensure a minimum effective tax rate of 15% in each country in which bp operates. In line with the amendments to IAS 12, the exception from recognising and disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes has been applied.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

In October 2024, the UK government announced changes (effective from 1 November 2024) to the Energy Profits Levy including a 3% increase in the rate taking the headline rate of tax on North Sea profits to 78%, an extension to the period of application of the Levy to 31 March 2030 and the removal of the Levy's main investment allowance. The changes to the rate and to the investment allowance were substantively enacted in 2024 and have been applied in accounting for current tax and deferred tax in the year, resulting in an additional non-cash deferred tax charge of approximately $75 million. The extension of the Levy to 31 March 2030 was substantively enacted after 31 December 2024 and will result in a non-cash deferred tax charge of approximately $181 million in the year ended 31 December 2025.

Significant judgements and estimates: taxation

The value of deferred tax assets and liabilities is an area involving inherent uncertainty and estimation and balances are therefore subject to risk of material change as a result of underlying assumptions and judgements used, in particular the forecast of future profitability used to determine the recoverability of deferred tax, for example future oil and gas prices, see 'Significant judgements and estimates - Recoverability of asset carrying values'. It is impracticable to disclose the extent of the possible effects of profitability assumptions on the company's deferred tax assets. It is reasonably possible that to the extent that actual outcomes differ from management's estimates, material income tax charges or credits, and material changes in current and deferred tax assets or liabilities, may arise within the next financial year and in future periods.

Judgement is required when determining whether a particular tax is an income tax or another type of tax (for example, a production tax). The attributes of the tax, including whether it is calculated on profits or another measure such as production or revenues, the extent of deductibility of costs and the interaction with existing income taxes, are considered in determining the classification of the tax. Accounting for deferred tax is applied to income taxes as described above but is not applied to other types of taxes; rather such taxes are recognized in the profit and loss account in accordance with the applicable accounting policy such as Provisions and contingencies.

For more information see Note 9.

Petroleum revenue tax

Deferred Petroleum Revenue Tax (PRT) assets are recognized where PRT relief on future decommissioning costs is virtually certain.

Customs duties and sales taxes

Customs duties and sales taxes that are passed on or charged to customers are excluded from turnover and expenses. Assets and liabilities are recognized net of the amount of customs duties or sales tax except:

- Customs duties or sales taxes incurred on the purchase of goods and services which are not recoverable from the taxation authority are recognized as part of the cost of acquisition of the asset.
- Receivables and payables are stated with the amount of customs duty or sales tax included.

The net amount of sales tax recoverable from, or payable to, the taxation authority is included within receivables or payables in the balance sheet.

Turnover

Revenue from contracts with customers is recognized when or as the company satisfies a performance obligation by transferring control of a promised good or service to a customer. The transfer of control of oil, natural gas and natural gas liquids usually coincides with title passing to the customer and the customer taking physical possession. The company principally satisfies its performance obligations at a point in time; the amounts of revenue recognized relating to performance obligations satisfied over time are not significant.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

When, or as, a performance obligation is satisfied, the company recognizes as revenue the amount of the transaction price that is allocated to that performance obligation. The transaction price is the amount of consideration to which the company expects to be entitled. The transaction price is allocated to the performance obligations in the contract based on standalone selling prices of the goods or services promised. Contracts for the sale of commodities are typically priced by reference to quoted prices. Revenue from term commodity contracts is recognized based on the contractual pricing provisions for each delivery. Certain of these contracts have pricing terms based on prices at a point in time after delivery has been made. Revenue from such contracts is initially recognized based on relevant prices at the time of delivery and subsequently adjusted as appropriate. All revenue from these contracts, both that recognized at the time of delivery and that from post-delivery price adjustments, is disclosed as revenue from contracts with customers.

Tariff income is recognized as the underlying commodity is shipped through the pipeline network based on established tariff rates.

Interest income
Interest income is recognized as the interest accrues using the effective interest rate – that is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument to the net carrying amount of the financial asset.

Dividend income
Dividend income from investments is recognized when the shareholders' right to receive the payment is established.

Government grants
Government grants are recognized when it is reasonable to expect that the grants will be received and that all related conditions will be met, usually on submission of a valid claim for payment. Government grants in respect of capital expenditure are credited to a deferred income account and are released as income by equal annual amounts over the expected useful lives of the relevant assets. Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the company with no future related costs are recognized in profit or loss in the period in which they become receivable. Government grants of a turnover nature are credited to income so as to match them with the expenditure to which they relate.

Finance costs
Finance costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use, are added to the cost of those assets until such time as the assets are substantially ready for their intended use. All other finance costs are recognized in the profit and loss account in the period in which they are incurred.

Dividends payable
Final dividends are recorded in the financial statements in the year in which they are approved by the company's shareholders. Interim dividends are recorded in the year in which they are approved and paid.

Updates to material accounting policy information

There are no new IFRS Accounting Standards or other amended standards or interpretations adopted from 1 January 2024 onwards, that have a significant impact on the financial statements.

Impact of new International Financial Reporting Standards

The following pronouncements from the IASB have not been adopted by the company in these financial statements as they will only become effective for future financial reporting periods. There are no other standards, amendments or interpretations in issue but not yet adopted that the directors anticipate will have a material effect on the reported income or net assets of the company.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

Amendment to IFRS 9 Financial Instruments

Amendments to IFRS 9 Financial Instruments relating to the settlement of liabilities through electronic payment systems are effective for annual periods beginning on or after 1 January 2026 subject to endorsement by the UK Endorsement Board. The potential impact on cash and banking operations and amounts reported on adoption of the amendments is currently being assessed.

IFRS 18 Presentation and Disclosure in Financial Statements

IFRS 18 Presentation and Disclosure in Financial Statements will supersede IAS 1 Presentation of Financial Statements and is effective for annual periods beginning on or after 1 January 2027 subject to endorsement by the UK Endorsement Board. IFRS 18 (and consequential amendments made to IAS 7 Statement of Cash Flows, IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors, IAS 33 Earnings per share and IFRS 7 Financial Instruments: Disclosures) introduces several new requirements that are expected to impact the presentation and disclosure of the company's financial statements. These new requirements include:

- Requirements to classify all income and expenses included in the statement of profit or loss into one of five categories and to present two new mandatory subtotals.
- Required disclosures about certain non-GAAP measures ('management defined performance measures') in a single note to the financial statements.
- Enhanced guidance on the aggregation of information across all the primary financial statements and the notes.

The company's evaluation of the effect of adopting IFRS 18 is ongoing.

3. Turnover

Sales of goods, which is stated net of value added tax, represents amounts where the performance obligation of a contract has been met with third parties and group companies.

An analysis of the company's turnover is as follows:

	2024	2023
	$000	$000
Revenue from contracts with customers	1,935,638	2,264,418
Tariff income	142,037	37,799
Other operating revenue	5,314	12,368
	2,082,989	2,314,585
Other operating income	110,476	116,599
Turnover and other operating revenue	2,193,465	2,431,184

The country of origin and destination is substantially the UK geographic area.

Turnover is attributable to one continuing activity, the production and sale of hydrocarbon products with other operating income relating mostly to lease partner recovery* and RDEC claim (Research and Development Expenditure Credit). Turnover is recognized as the performance obligation of delivery to the end buyer is met, being the point risk and reward has transferred in accordance with the sales contract.

*The company recognizes the full lease liability for leases entered into on behalf of a joint operation if the company has the primary responsibility for making the lease payments.

For details of turnover change in comparison to previous year please refer to Strategic Report.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

4. Operating loss

This is stated after charging / (crediting):

	2024	2023
	$000	$000
Net foreign exchange losses / (gains)	109,983	(54,809)
Research and development costs expensed	2,014	584
Amortisation of intangible assets (Note 11)	29,770	27,707
Depreciation of tangible assets (Note 12)	1,002,267	707,112
Depreciation of right-of-use assets	98,001	64,567
Impairment of intangible assets (Note 11)	5,011	34,421
Reversal of impairment of intangible assets (Note 11)	(7,321)	—
Impairment of tangible assets (Note 12)	764,586	503,327
Impairment of right-of-use assets	1,444	—
Impairment of investments (Note 13)[b]	6,825,285	3,073,601
Cost of stock recognized as an expense[a]	23,405	517
Loss / (profit) on disposal of fixed assets	5,256	(86,693)
Profit on sale of operations	(420,369)	(178,736)

[a] Amount is included in Cost of sales.

[b] Includes write-off of a loan to a subsidiary of $161 million that was accounted for as 'Debtors, amounts owed from group undertakings' prior to the write-off.

5. Auditor’s remuneration

	2024	2023
	$000	$000
Fees for the audit of the company's financial statements	900	1,014

Fees paid to the company's auditor, Deloitte LLP and its associates for services other than the statutory audit of the company are not disclosed in these financial statements since the consolidated financial statements of the company’s ultimate parent, BP p.l.c., are required to disclose non-audit fees on a consolidated basis.

The audit fees were borne by another group company.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

6. Interest receivable and similar income

	2024	2023
	$000	$000
Interest income from amounts owed by group undertakings	1,851,961	1,467,215
Other interest income	49,300	6,802
Other interest	255	384
Total interest receivable and similar income	1,901,516	1,474,401

The increase in interest income was mainly due to an increase of interest received on IFA accounts following the higher average IFA balance in 2024 than in 2023 partially offset by the decrease of daily SOFR interest rate during the year.

7. Interest payable and similar expenses

	2024	2023
	$000	$000
Interest expense on:		
Lease liabilities	10,157	5,268
Overdrafts from group undertakings	935,266	1,264,283
Other loans	9,396	9,101
Tax liabilities	20,969	59
Total interest expense	975,788	1,278,711
Interest capitalized in relation to qualifying assets at 4.50% (2023: 4.50%)	(8,981)	(17,045)
	966,807	1,261,666
Unwinding of discount on provisions (Note 20)	95,314	78,645
Total interest payable and similar charges	1,062,121	1,340,311

A decrease of $329 million in the interest expense on overdrafts from group undertakings was mainly due to a lower interest rate in 2024 compared to 2023.

8. Exploration for and evaluation of oil and natural gas resources

The following financial information represents the amounts relating to activity associated with the exploration for and evaluation of oil and natural gas resources.

For information on significant judgements and estimates made in relation to oil and natural gas accounting see Intangible assets in Note 2.

	2024	2023
	$000	$000
Exploration and evaluation costs		
Exploration expenditure written (back) / off	(7,321)	33,059
Other exploration costs	26,945	11,120
Exploration expense for the year	19,624	44,179
Intangible assets – exploration and appraisal expenditure	466,705	400,571
Liabilities	(49,181)	(40,442)
Net assets	417,524	360,129

DT

Exploration expenditures write-offs in 2024 ($7 million write back) and in 2023 ($33 million write off) were mainly related to Arpet asset, which is a historic well, handed back by the regulator in 2022.

9. Taxation

The company is a member of a group for the purposes of relief within Part 5, Corporation Tax Act 2010.

In May 2023, the IASB issued International Tax Reform – Pillar Two Model Rules - Amendments to IAS 12 Income Taxes to clarify the application of IAS 12 to tax legislation enacted or substantively enacted to implement Pillar Two of the Organisation for Economic Co-operation and Development's Base Erosion and Profit Shifting project, which aims to address the tax challenges arising from the digitalisation of the economy. The amendments include a mandatory temporary exception from accounting for deferred tax on such tax law. In July 2023, the UK government enacted legislation to implement the Pillar Two rules. The legislation is effective for the company from 1 January 2024 and includes an income inclusion rule and a domestic minimum tax. The Pillar Two rules apply at a country level across legal entities in the same group. The rules also include a transitional safe harbour (TCSH) based on Country-by-Country reporting which is applicable for the first three years of the Pillar Two rules. The TCSH provides for three tests which simplify the application of the Pillar Two rules, and where at least one of these tests is met, the top-up tax is deemed to be zero. No provision has been made for Pillar Two current tax for the company for the year ended 31 December 2024 as the company is expected to qualify for the TCSH. In line with the amendments to IAS 12, the exception from accounting for deferred tax for the Pillar Two rules has been applied.

The taxation charge in the profit and loss account is made up as follows:

	2024	2023
Current tax	$000	$000
UK corporation tax on income for the year	393,995	891,934
Adjustment in respect of prior years	(40,563)	(6,033)
Total current tax charged	353,432	885,901
Deferred tax		
Origination and reversal of temporary differences	(763,044)	69,217
Effect of changes in tax rate	75,164	5,698
Prior year adjustments	(2,146)	—
Total deferred tax (credited) / charged	(690,026)	74,915
Tax (credited) / charged on profit	(336,594)	960,816

(a) Reconciliation of the effective tax rate

The tax assessed on the profit for the year is lower (2023: lower) than the standard rate of corporation tax in the UK of 75.5% for the year ended 31 December 2024 (2023: 75%). The differences are reconciled below:

	2024	2023
	UK	UK
	$000	$000
Profit before tax	3,113,749	10,965,881
Taxation	(336,594)	960,816
Effective tax rate	(11)%	9 %

Effective tax rate	(11)	9

Change in corporation tax rate

The UK corporation tax rate is 25%, effective from 1 April 2023, which applies for the year ended 31 December 2024. The company had no deferred tax balances, recognized or unrecognized, at the balance sheet date.

On 26 May 2022, the UK Government announced the introduction of the Energy Profits Levy (EPL), which was subsequently enacted on 14 July 2022. EPL is effective from the date of announcement and was intended to be applicable until 31 December 2025. The Autumn Finance Bill on 17 November 2022 announced that the EPL rate would increase to 35% from 1 January 2023 and the period over which EPL would apply was extended to 31 March 2028. The Finance Bill was substantively enacted on 30 November 2022.

The Autumn Finance Bill on 31 October 2024 announced that the EPL rate would increase to 38% from 1 November 2024 and the period over which EPL would apply was extended to 31 March 2030.

EPL is applied to profits, or losses, that arise from UK oil and gas extraction or rights (Ring fence profits). EPL is levied at 35% on ring fence profits from 1 January 2023 and 38% from 1 November 2024. For 31 December 2024, the blended EPL rate is 35.5%. EPL is in addition to the existing Ring Fence Corporation Tax (30%) and Supplementary Charge (10%), increasing the headline rate of tax to 75.5%.

Ring fence profits, or losses, are subject to EPL, but no relief is available for Ring Fence Corporation Tax losses carried forward, decommissioning expenditure or finance costs. An 80% EPL Investment Allowance is given for capital expenditure incurred after 26 May 2022 up to 31 December 2022. The EPL Investment Allowance is reduced from 80% to 29% from 1 January 2023. The Autumn Finance Bill on 31 October 2024 announced that the 29% investment allowance abolished for qualifying expenditure incurred on or after 1 November 2024.

A 29% EPL investment allowance was given for capital expenditure incurred from 1 January 2023, with a higher investment allowance available for qualifying decarbonisation expenditure. The Autumn Finance Bill on 30 October 2024 announced that the 29% investment allowance would be abolished for qualifying expenditure incurred on or after 1 November 2024, although a reduced investment allowance for qualifying decarbonisation expenditure remains. This change was substantively enacted prior to 31 December 2024.

The Autumn Finance Bill on 30 October 2024 also announced that the period over which EPL is to apply will extended from 31 March 2028 to 31 March 2030, however this change was not substantively enacted prior to 31 December 2024. Please note, EPL has a current year income statement impact of $163,583,697. The impact of the rate change in the period has increased the deferred tax position at 31 December 2024 by $75,163,878 and the impact of the not yet enacted extension to 31 March 2030 would be approximately $181,000,000.

	$000
At 1 January 2024	2,425,063
Deferred tax credit in the profit and loss account	(690,026)
At 31 December 2024	1,735,037

10. Directors and employees

(a) Remuneration of directors

A number of directors are senior executives of the bp group and received no remuneration for qualifying services to this company.

The following details relate to the directors who received remuneration for their qualifying services to the company and so are in scope for this disclosure.

The total remuneration for these qualifying directors for their period of directorship to the company amounted to $2,204,000 (2023: $707,000). These costs are borne by the company.

None of the qualifying directors received a compensation for loss of office (2023 None).

Of these qualifying directors, the highest paid director received $918,000 (2023: $402,000). The accrued pension of the highest paid director at 31 December 2024 was $Nil (2023: $Nil). The highest paid director received no contributions to a money purchase pension scheme during the year. The highest paid director had awards receivable in the form of BP p.l.c. shares under a long-term incentive scheme (2023 One).

Three of these qualifying directors were members of the defined benefit section of the BP Pension Fund at 31 December 2024 (2023: One).

None of these qualifying directors received any contribution to a money purchase pension scheme during the year (2023 None).

None of the qualifying directors exercised share options over BP p.l.c. shares during the year (2023: Two).

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

Five of the qualifying directors had awards receivable in the form of BP p.l.c. shares under a long-term incentive scheme (2023 Two).

Capitalized interest included above is as follows:

	Net book value
Capitalized interest	$000
At 31 December 2024	155,215
At 31 December 2023	210,737

Management's best estimate of oil price assumptions for value in use impairment testing was revised during 2024. See 'Material accounting policy: Impairment of intangible and tangible assets' for details of assumptions used.

As a result of this review, the company has recognized total impairment of $766 million (2023: 503 million impairment charge). Impairments were calculated on a value in use basis, applying a pre-tax discount rate of 13% (excluding effect of the EPL). The residual value of the CGU's which have recognized impairment charges during the year was $5,722 million. The main impacted areas were Schiehallion ($255 million), Clair and Clair Ridge ($468 million) and ETAP ($41 million). Impairment charge of $766 million mainly arose as a result of changes to the company's oil and gas price and discount rate assumptions in 2024.

In 2024, the company formed a new joint venture, Arcius Energy (51% bp, 49% XRG), to develop gas in the Middle East with ADNOC's investment arm XRG. As a result of this deal, the company recognized $974 million of investments in associates in 2024. As part of the agreement five concessions were contributed by the company's 100% subsidiary, BP Exploration Delta Limited.

14. Stocks

	2024	2023
	$000	$000
Raw materials and consumables	112,968	94,080
Crude oil	83,715	52,646
	196,683	146,726

The difference between the carrying value of stocks and their replacement cost is not material.

15. Debtors

Amounts falling due within one year::

	2024	2023
	$000	$000
Trade debtors	62,786	42,641
Amounts owed from group undertakings	4,142,324	11,649,374
Amounts owed from joint ventures	140	—
Amounts owed from associates	29,975	190,409
Other debtors	444,400	555,691
Prepayments and accrued income	107,757	55,625
Petroleum Revenue Tax	11,977	8,576
	4,799,359	12,502,316

Amounts falling due after one year:

	2024	2023
	$000	$000
Other debtors	98,139	105,221
Loans to group undertakings	—	2,320,465
Prepayments and accrued income	10,756	—
Petroleum Revenue Tax	328,768	341,411
	437,663	2,767,097
Total debtors	5,237,022	15,269,413

The amounts owed from group undertakings comprise Internal Funding Accounts (IFAs) of $2,564 million receivable from BP International Limited (2023 $10,383 million creditor balance).

This balance forms a key part of the bp group's liquidity and funding arrangements under its centralized treasury funding model and it can be accessed by BP International Limited at short notice. Whilst IFA balances are legally repayable on demand, in practice they have no termination date.

Interest is accrued on a monthly basis based on overnight SOFR plus 4 basis points.

Amounts owed from group undertakings, associates and joint ventures relate to the company's operations and are pre-dominantly non-interest bearing and have repayment terms in the range of 30 to 60 days.

Other debtors mainly consist of receivables from JV partners and taxes receivable.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

16. Creditors

Amounts falling due within one year:

	2024	2023
	$000	$000
Trade creditors	224,032	179,965
Amounts owed to group undertakings	4,426,068	3,819,196
Amounts owed to associates	42,292	42,780
Other creditors	286,890	265,083
Taxation	21,362	118,250
Accruals and deferred income	364,488	349,614
	5,365,132	4,774,888

Amounts falling due after one year:

	2024	2023
	$000	$000
Amounts owed to group undertakings	1,618	1,592
Other creditors	407	22,147
Accruals and deferred income	9,031	3,119
Deferred income in relation to government grants	0	26,644
	11,056	53,502
Total creditors	5,376,188	4,828,390

Materially all of the company's trade payables have payment terms of less than 60 days and give rise to operating cash flows.

The amounts owed to group undertakings consist of intercompany trade payable balances related to the operation of the company. Intercompany payable balances also have payment terms in the range of 30 to 60 days, with no interest being charged.

17. Loans and obligations under leases

Lease liabilities are analysed as follows:

Within 5 years

	2024	2023
	$000	$000
Not wholly repayable	252,150	199,286
	252,150	199,286

After 5 years

	2024	2023
	$000	$000
Not wholly repayable	9,082	2,421
	9,082	2,421

Lease liabilities due within one year is $128,172,000 and due after more than one year is $133,060,000.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

Weighted average interest rates on borrowings repayable wholly or partly after five years from 31 December 2024 is 4.64%.

18. Leases

The company leases a number of assets as part of its activities. The weighted average remaining lease term for the total lease portfolio is around 2.1 year (2023: around 1.5 years). Some leases will have payments that vary with market interest or inflation rates. Certain leases contain residual value guarantees, these may be triggered in certain circumstances such as if market values have significantly declined at the conclusion of the lease.

	2024	2023
	$000	$000
Short-term lease expense[a]	33,553	—
Additions to right-of-use assets in the period	155,621	134,721
Total cash outflow for amounts included in lease liabilities[b]	46,780	59,069

[a]A short-term lease is a lease that, at the commencement date, has a lease term of 12 months or less.
[b] The cash outflows for amounts not included in lease liabilities approximate the profit and loss expenses disclosed above.

An analysis of right-of-use assets and depreciation is provided in Note 12. An analysis of lease interest expense is provided in Note 7.

19. Derivatives and other financial instruments

In the normal course of business the company enters into derivative financial instruments (derivatives), to manage its normal business exposures in relation to commodity prices, foreign currency exchange rates and interest rates, including management of the balance between floating rate and fixed rate debt consistent with risk management policies and objectives.

For information on significant judgements and estimates made in relation to the application of hedge accounting and the valuation of derivatives, see Derivative financial instruments and hedging activities within Note 2.

The fair values of financial instruments accounted for at fair value at 31 December are set out below:

	2024	2024	2023	2023
	Fair value asset	Fair value liability	Fair value asset	Fair value liability
	$000	$000	$000	$000

Cash flow hedges

At 31 December 2024, the company held currency forwards designated as hedging instruments in cash flow hedge relationships of highly probable forecast non-US dollar capital expenditure. Note 29 of the bp group Annual Report and Form 20-F for the year ended 31 December 2024 outlines the group's approach to foreign currency exchange risk management. When the highly probable forecast capital expenditure designated as a hedged item occurs, a non-financial asset is recognized and is presented within the fixed asset section of the balance sheet.

The company claims hedge accounting only for the spot value of the currency exposure in line with the strategy to fix the volatility in the spot exchange rate element. The fair value on the instrument attributable to forward points is taken immediately to the profit and loss account.

The company applies hedge accounting where there is an economic relationship between the hedged item and hedging instrument. The existence of an economic relationship is determined at inception and prospectively by comparing the critical terms of the hedging instrument and those of the hedged item. The company enters into hedging derivatives that match the currency and notional of the hedged items on a 1:1 hedge ratio basis. The hedge ratio is determined by comparing the notional amount of the derivative with the notional designated on the forecast transaction. The company determines the extent to which it hedges highly probable forecast capital expenditures on a project by project basis.

The company has identified the following sources of ineffectiveness, which are not expected to be material:

- counterparty's credit risk, the company mitigates counterparty credit risk by entering into derivative transactions with high credit quality counterparties; and

- differences in settlement timing between the derivative and hedged items. The latter impacts the discount factor used in the calculation of the hedge ineffectiveness. The company mitigates differences in timing between the derivatives and hedged items by applying a rolling strategy and by hedging currency pairs from stable economies. The company's cash flow hedge designations are highly effective as the sources of ineffectiveness identified are expected to result in minimal hedge ineffectiveness.

The company has not designated any net positions as hedged items in cash flow hedges of foreign currency risk.

The table below summarizes the change in the fair value of hedging instruments and the hedged item used to calculate ineffectiveness in the period.

DT

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

At 31 December 2024	Change in fair value of hedging instruments used to calculate ineffectiveness	Change in fair value of hedged item used to calculate ineffectiveness	Hedge ineffectiveness recognized in profit or loss
	$000	$000	$000
Cash flow hedges			
Foreign exchange risk			
Highly probable forecast capital expenditure	(11,080)	11,080	—

The table below summarizes the carrying amount and nominal amount of the derivatives designated as hedging instruments in cash flow hedge relationships at 31 December 2024.

	Carrying amount of hedging instrument		Nominal amount of hedging instruments
	Assets	Liabilities	
At 31 December 2024	$000	$000	$000
Cash flow hedges			
Foreign exchange risk			
Highly probable forecast capital expenditure	2,364	—	78,578

All hedging instruments are presented within derivative financial instruments on the company balance sheet.

Of the nominal amount of hedging instruments relating to highly probable forecast capital expenditure $2.31 million matures in 2025 and $0.05 million matures in 2026.

The table below summarizes the weighted average exchange rates in relation to the derivatives designated as hedging instruments in cash flow hedge relationships at 31 December 2024.

		Weighted average price/rate
At 31 December 2024	Forecast Capital Expenditure	Forecast Sales
GBP/USD	1.21	—

Movement in reserves related to hedge accounting

The table below provides a reconciliation of the cash flow hedge and costs of hedging reserves on a pre-tax basis by risk category. The signage convention of this table is consistent with that presented in the Statement of Changes in Equity.

	$000	
	Cash flow hedge reserves	
	Highly probable forecast future sales	Total
As at 1 January 2024	13,415	13,415
Recognized in other comprehensive income		
Cash flow hedges marked to market	(11,045)	(11,045)
As at 31 December 2024	2,370	2,370

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

The gain of $2,461,000 in the Statement of Changes in Equity includes an additional $91,000 adjustment for tax on other comprehensive income.

Substantially all of the cash flow hedge reserve balances and all of the amounts reclassified into profit or loss during the year relate to continuing hedge relationships. Amounts deferred in the cash flow hedge reserve that have been reclassified to profit or loss are presented in sales and other operating revenues in the profit and loss account.

Costs of hedging relates to the foreign currency basis spreads of hedging instruments used to hedge the company's interest rate and foreign currency risk on debt which is a time-period related item.

Another group company, BP International Ltd, has entered into a foreign exchange hedging programme on behalf of the company. This is to manage foreign exchange risk in relation to non US$ highly probable forecast capital expenditure on the Seagull project. The hedging instrument is an intercompany derivative between the company and BP International Ltd.

For cash flow hedges the company only claims hedge accounting on the intrinsic value on the currency, with any fair value attributable to forward points taken immediately to the income statement. The amount recognized in the profit and loss account was a loss of $35,000 (2023: loss of $200,000).

The other financial assets at fair value through profit or loss include amounts relating to the Magnus disposals ($166 million), and the balance related to the Thistle financial deed agreement ($18 million). These balances are all related to future cash flows to which the company is entitled and have been recognized in these accounts as other financial instruments at fair value through profit and loss account. The balances are fair valued quarterly based on an estimate of future oil and gas prices and applying a 8% post-tax discount rate to the cash flows. Magnus cash flows are linked to the underlying field cash flow generation.

	2,382,360	53,623	—	2,435,983

For information on the nature, significant judgements and estimates made in relation to provisions, see Provisions within Note 2.

The company makes full provision for the future cost of decommissioning oil and natural gas production facilities and related pipelines on a discounted basis upon installation of those facilities.

Utilization of decommissioning provision is mainly related to Foinaven, Andrew area, BKR, Magnus, SVT, Miller and Schiehallion.

Legal provision balance of $32.5 million represents contractual disputes.

21. Called up share capital

	2024	2023
	$000	$000
Issued and fully paid:		
22,089,650,267 ordinary shares of $1 each for a total nominal value of $22,089,650,267 (2023 42,089,650,267 ordinary shares of $1 each for a total nominal value of $42,089,650,267)	22,089,650	42,089,650

Docusign Envelope ID: 5B64DEED-0B41-4056-A8D8-498DE27E7286

On 19 December 2024, the company approved a share capital reduction by cancelling and extinguishing 20,000,000,000 ordinary shares of $1 each in the share capital of the company.

22. Reserves

Called up share capital

The balance on the called up share capital account represents the aggregate nominal value of all ordinary shares in issue.

Cash flow hedge reserve
The cash flow hedge reserve records the portion of the gain or loss on a hedging instrument in a cash flow hedge that is determined to be an effective hedge. For further information on the accounting for cash flow hedges see Note 2 - Derivative financial instruments and hedging activities.

Foreign currency translation reserve
The foreign currency translation reserve is used to record the currency fluctuations in relation to the foreign currency branches.

Other reserves
The balance held on this reserve represents the share-based payment contribution from the parent company.

Profit and loss account
The balance held on this reserve is the retained profit of the company, increased for the share capital reduction during the year (Note 21) to reserves of $20,000,000,000, and decreased for the dividend of $28,600,000,000 paid during the year to BP Exploration Company Limited and other movement of $38,065,000.

In 2024, the company paid ordinary interim dividends of $28,600,000,000 (2023: $4,200,000,000). The dividend per share was $0.68 (2023: $0.10).

23. Capital commitments

Authorized and contracted future capital expenditure (excluding right-of-use assets) by the company for which contracts had been placed but not provided in the financial statements at 31 December 2024 is estimated at $228 million (2023: $224 million).

24. Guarantees and other financial commitments

The company has issued guarantees, under which outstanding at 31 December 2024 were $6,883 million (2023: $8,416 million) in respect of liabilities of other third parties. No material losses are likely to arise from these guarantees.

25. Related party transactions

The company has taken advantage of the exemption contained within paragraphs 8(k) and (j) of FRS 101, and has not disclosed transactions entered into with wholly-owned group companies or key management personnel. There were no other related party transactions in the year.

26. Post balance sheet events

On 13 March 2025, the company has issued a performance guarantee on BP Energy Company of Kirkuk Limited in amount of $880 million.

On 26 March 2025, the company subscribed for 193,227,364 shares each of AED 1 in ADNOC (Abu Dhabi National Oil Company) Ruwais Liquified Natural Gas L.L.C - S.P.C project company as part of the Ruwais

Natural Liquified Natural Gas project for an aggregate nominal value of AED 193,227,364 being a 10% shareholding. The company became 10% shareholder in ADNOC Ruwais Liquefied Natural Gas L.L.C. in June 2025. The Shareholders' Agreement was signed on 23 June 2025.

On 11 April 2025, it was proposed that the company makes an equity injection into BP Brazil Tracking LLC by applying for an amount not to exceed US $270million worth of member interests in the entity in tranches throughout 2025.

On 17 April 2025, the company subscribed for 1 ordinary share at a nominal value of $1 in the newly incorporated subsidiary, BP Gaea Limited.

On 17 April 2025, the company subscribed for 1 ordinary share at a nominal value of $1 in the newly incorporated subsidiary, BP Gaea II Limited.

On 24 April 2025 the company subscribed to 6,000,000 ordinary shares of $1 each in BP Karabagh Limited for cash consideration of $6,000,000.

On 24 April 2025 the company subscribed to 1,000,000 ordinary shares of $1 each in BP ADUA Limited for cash consideration of $1,000,000.

On 18 May 2025, the company subscribed to 9,866 ordinary shares of $1 each for a total subscription price of $76,404,421 (being the aggregate nominal value of the shares plus an additional premium of $76,394,555) and 9 ordinary shares of $1.00 each in the share capital of BP Energy Company of Kirkuk Limited (Subsidiary) for a total subscription price of $9.00 of which $8.72 shall be paid from the Subsidiary's redenomination reserve and $0.28 shall remain outstanding with a commitment to pay.

On 26 June 2025, Arcius Energy Limited cancelled and extinguished 400,000,000 ordinary shares with a nominal value of $1.00 each in the share capital, such that 204,000,000 ordinary shares of $1 are held by the company and 196,000,000 ordinary shares of $1.00 each held by XRG P.J.S.C.

On 21 August 2025, the company approved an equity injection into BP Brasil Limitada (BPB) of up to USD 6,000,000 (approximately BRL 32,468,400) worth of ordinary shares (quotas) of BRL 1.00 each in the capital of BPB to be allotted to the company in tranches as and when funds are requested by BPB.

27. Pensions

The company is a participating employer in the BP Pension Fund. The closed BP Pension Fund is separately funded and provides benefits that are computed based on an employee's years of service and final pensionable salary.

The obligation and the cost of providing pensions are assessed annually using the projected unit credit method. The most recent formal actuarial valuation for the BP Pension Fund was as at 31 December 2023. The date of the most recent actuarial review was 31 December 2024.

The BP Pension Fund is operated in a way that does not allow the individual participating employing companies in the Pension Fund to identify their share of the underlying assets and liabilities of the fund. Therefore the company's payments in respect of pension current service cost have been accounted for as an expense as if they were contributions to a defined contribution scheme and no further FRS 101 disclosures made in these accounts.

The results of the most recent formal actuarial valuation of the BP Pension Fund as at 31 December 2023, have been reflected into the disclosures required by FRS 101 for the year ended 31 December 2024, and are included within the accounts of the ultimate parent undertaking BP p.l.c..

28. Immediate and ultimate controlling parent undertaking

The immediate parent undertaking is BP Exploration Company Limited, a company registered in Scotland. The ultimate controlling parent undertaking is BP p.l.c., a company registered in England and Wales, which is the parent undertaking of the smallest and largest group to consolidate these financial statements.
