

bp is **Investing in America**

bp in the US

Across the country, bp is helping produce, refine and deliver the energy America relies on today, while building capacity for tomorrow – with a clear focus on safety, reliability and value.

bp has a larger presence in America than anywhere else in the world, employs around 30,000 people across the country and has contributed more than $250 billion to the US economy over the past four years.

From expanding production offshore in the Gulf of America and onshore in Texas and Louisiana, to operating our US refineries and delivering products to customers on the road and in the air, bp plays an important role in helping meet the country's energy needs. In all of our work, safety remains at the heart of everything we do.

Oil and gas production

We're investing to safely and efficiently grow our US oil and gas production across the Gulf of America and bpx energy, our onshore oil and gas business. bp produced 812,000 barrels of oil equivalent per day (boe/d) in the US in 2025, and we're working toward producing around 1 million boe/d by 2030.

bp operates five offshore oil and gas production hubs in the Gulf. We're investing in production today with platform expansion projects and preparing for the future with new developments in the Paleogene, an oil-rich geological area.

Onshore, bpx is helping strengthen America's energy supply by growing production in the Permian, Eagle Ford and Haynesville basins – scaling smarter by applying advanced technologies across its operations.

Refineries

Our two US refineries represent more than half of bp's global refining capacity.

The Whiting refinery in northwest Indiana can process around 440,000 barrels of crude oil daily, producing enough fuel each day to support the average daily travel of more than 7 million cars.

Our Cherry Point refinery in Washington state is the largest in the Pacific Northwest. With capacity to process around 250,000 barrels of crude oil daily, it helps supply the fuels the region relies on.

Convenience & mobility

We have more than 8,500 retail sites in the US – including bp, *ampm, Amoco, Thorntons* and *TravelCenters of America* – that span 46 states and the District of Columbia.

Supply, Trading & Shipping

bp buys, sells and moves energy across the Americas using ships, pipelines and terminals, helping deliver reliable supply and products to businesses and industries throughout the US.

Economic impact in the US

$160bn+
in US capital expenditures since 2005

$250bn+
contributed by our operations to the US economy since 2022

~30,000
employees across the US

Support for US communities

$10bn+
spent with local businesses in 2025

$175m+
donated to US community programs since 2016

40,000+
volunteer hours contributed by employees in 2025

Customer focus

3.5m+
daily customers

8,500+
retail sites – bp, *Amoco, ampm/ARCO, Thorntons* and *TravelCenters of America*

Nearly **19bn**
gallons of refined products delivered in 2025
