

bp's contribution to North East England in 2025

Analysis and modelling by Oxford Economics

Economic contribution

bp supported a contribution of around £150 million gross value added (GVA) to the economy of the North East. This was approximately £1 in every £480.

Overall spend with suppliers

bp spent £61 million with North East suppliers in 2025, £53 million of which was operational spending and £9 million was capital expenditure.*

2025 saw spending across a variety of sectors, with the largest recipients being £28 million with professional services and £17 million with construction.

Supporting jobs

bp supported an estimated 1,800 jobs across the North East, comprising its direct workforce and jobs indirectly supported through supply chain expenditure.

Delivering quality services

There were 48 bp-operated and dealer-operated retail sites in the North East offering quality fuels and convenience. Three sites offered bp pulse ultra-fast and rapid EV charging.

Spotlight on social investment

In 2025, our social investment activities in Teesside continued to focus on helping to build skills in the region. We supported specialist training for apprenticeships at the Clean Energy Education Hub at Redcar & Cleveland College, and through our shareholder interests in Net Zero Teesside Power, helped to develop new apprenticeship pathways, including an operations scheme with Middlesbrough College. Working with others, these initiatives formed part of a wider programme of scholarships, skills outreach and local partnerships, designed to help create opportunities and ensure the benefits of Teesside's lower carbon activities were felt across the region.

£61 million
spent with suppliers in North East England

~£150m
contribution to GVA in North East England

~1,800
jobs supported, directly and indirectly through the supply chain
