

BP in America

Committed to economic growth, energy security and a lower-carbon future

For more than 150 years, BP has been contributing to America's economy and energy security. Today, its U.S. operations provide the investment, jobs and products that underpin American prosperity while also helping drive the global transition to a lower-carbon fuel mix.

\$100+ billion

Investment since 2005

120,000

Jobs supported by BP's U.S. business activities

1.4 million

Barrels of oil equivalent (BOE) produced and refined per day in 2017

Committed to the U.S. economy and American communities

BP has a larger economic footprint in the United States than it does in any other country, and it has invested more than \$100 billion in the U.S. since 2005.

From the Gulf of Mexico to the North Slope of Alaska, BP's business activities support more than 120,000 American jobs and contribute \$67 billion to the national economy. BP invests every dollar of profit it earns in America back into America.

With about 14,000 employees across the country, BP is a strong supporter of the communities where it operates. Between 2012 and 2016 alone, it donated \$130 million to U.S. community programs. Meanwhile, since 2007, the BP Foundation has given more than \$185 million — or 70 percent of its global spending — to U.S. charities.

Committed to America's energy security

To fuel America's future, BP is focusing on high-value, high-quality projects that play to the company's distinctive strengths. These include exploration and discovery, deepwater, giant fields and a world-class downstream business — all supported by leading-edge technology. In 2017, BP produced 712,000

barrels of oil equivalent per day, making the company one of America's largest oil and natural gas producers. BP also is one of the top refiners in the U.S., with the capacity to process 746,000 barrels of crude oil every day. About 7,100 retail sites operate in the U.S. under a BP brand (BP, *ARCO*, *Amoco* and *ampm*), together representing 40 percent of the company's global retail presence.

BP safely and responsibly provides raw materials that power and heat Americans' homes, fuel vehicles that keep the country moving, and form the building blocks of everyday items ranging from paints and detergents to clothes and packaging.

Committed to a lower-carbon future

Its U.S. businesses also are helping to advance the global transition toward lower-carbon energy sources. For example, BP is the leading supplier of renewable natural gas to the U.S. transportation sector, and it has wind farms in eight states, from Pennsylvania to Hawaii.

Since 2006, BP Ventures has invested more than \$290 million in 35 U.S. companies, including eight alternative energy companies.

Fast facts

BP is the No. 1 marketer of natural gas in North America, selling enough to meet the average daily needs of every home and commercial building in the United States.

In 2016, BP spent about \$16 billion with U.S. vendors.

Over 40 percent of BP shares are held in the U.S., more than in any other country.

1866

ARCO's oldest heritage company was founded in Pennsylvania in 1866. In 2000, *ARCO* joined the BP group of companies.

1959

BP opens its first office in Anchorage, Alaska. Prudhoe Bay remains one of the largest oil fields in North America, with production topping more than 12 billion barrels.

1987

BP acquires Sohio, making it the cornerstone of a new national operation, BP America. Sohio's history dates back to the Standard Oil Company, which was incorporated in Cleveland, Ohio, in 1870.

1998

BP and Amoco merge, becoming the largest producer of oil and gas in the country. Amoco was originally the Standard Oil Company of Indiana, dating back to 1911.

2000

One of the world's most recognized lubricant brands, *Castrol*, becomes part of the BP group of companies.
