bp marine

Global network

bp marine's proposition to customers is a simple one: to consistently provide outstanding levels of service and deliver quality marine fuels, including lower carbon fuel alternatives, that are on-specification and delivered on time throughout our network of strategically based ports.

bp marine

Keeping vessels moving

Ship owners and operators need a trusted marine fuels supplier to ensure that their fleets are able to operate seamlessly to deliver cargoes and supplies globally.

In a vast and highly complex industry, bp marine is a leading supplier of bunker fuels that operates globally across the world's largest port networks, operating assets including barges for the marine bunkering fuel supply chain.

bp marine's commitment to our customers is simple: to safely and consistently deliver quality marine fuels, including lower carbon fuels, with outstanding levels of service throughout our network of strategically based ports.

Our strength in global trading offers unrivalled levels of supply security and cost-effective products throughout bp's globally diverse portfolio of ports.

Through continuous investment in infrastructure, the upgrading of existing supply locations, investment in new key bunker locations, and the extensive range of marine fuel products available, bp can provide our customers with the best solutions to meet their energy needs – today and in the future.

Delivering on-specification products to our customers, in full and on time, and consistently throughout our port network, is at the core of our business. We conduct stringent product testing during the manufacturing and delivery process to meet our ISO requirements.

bp marine provides customers with a powerful problem-solving force through our experienced and dedicated technical team. The technical team acts as a focal point for sharing best practice around the world and monitors the operational standards within the bp marine fuels business.

We also play an influential role in the international bunker fuels industry, supporting legislative bodies and engine builders as well as conducting numerous programs within bp's global research centre.
