

EDF Energy Services, LLC

District of Columbia Disclosure Label

For the Semiannual Period Ending June 30, 2022

Power plants can generate electricity from a number of different fuel sources, resulting in different emissions that impact the environment. EDF will report fuel sources and emissions to customers twice a year, allowing you to compare this electricity product with electricity products offered by other electricity suppliers.

EDF Energy Services, LLC is a member of the PJM regional transmission organization that coordinates the movement of wholesale electricity in all or parts of 13 states and the District of Columbia. The standardized environmental data shown below are regional averages only and was gathered by the PJM Generation Attribute Tracking System.
