

Beacon Wind, south of Nantucket, MA

2.4 GW renewable energy expected, once in operation.

Together they have the potential to generate power for more than

2 million

US homes.

Empire Wind, off the coast of Long Island, NY

2 GW renewable energy expected, once in operation.

This is bp's **first ever offshore wind venture**, in line with its strategy to rapidly grow its renewable electricity and energy portfolio.

bp is investing **\$1.1 billion** for a 50% share in **4 projects** within two offshore leases.

Together with Equinor, who has more than 10 years experience in offshore wind, we are working to become a **leading partner** in the fastest growing renewables sector. Helping the world get to net zero.

A partnership with **sky-high ambitions**

Equinor and bp are teaming up to develop offshore wind in the US.

We believe we can achieve more by working together.

#NetZero
