Energy illustrated

The Dual Challenge

- INCREASING PROSPERITY WILL LIFT BILLIONS OUT OF LOW INCOMES
- MORE ENERGY
- AVOID THE THREAT OF EVER MORE DAMAGING CLIMATE CHANGE
- FEWER EMISSIONS
- SOURCES OF CARBON EMISSIONS

GLOBAL ENERGY DEMAND WILL GROW BY A THIRD

SAME AS THE CURRENT ENERGY CONSUMPTION OF CHINA, INDIA & AFRICA COMBINED!

SWITCHING GOAL FOR NATURAL GAS

COULD REDUCE GLOBAL EMISSIONS BY 5 GIGATONNES = ALL CO2 PRODUCED BY AMERICA

BUT WE STILL NEED MORE RENEWABLES
