

Juniper

Juniper's platform weighs approximately 10,000 tons – equivalent to more than

20 Boeing 747s fully loaded for take-off

0

Zero

- the number of people on the unmanned platform

BP has been the largest contributor to natural gas production in Trinidad for over

50 years

Juniper will add

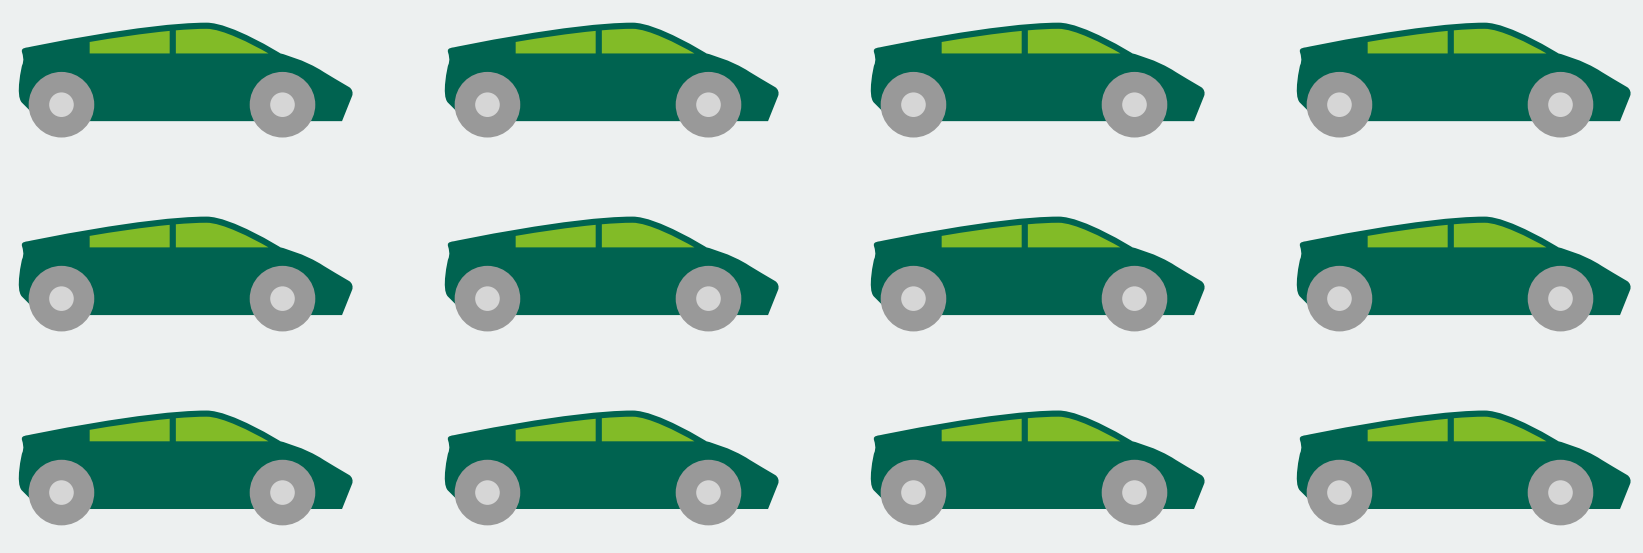

14%

to national Trinidad & Tobago gas production

BP Trinidad and Tobago's

FIRST

subsea development

Approximately 8,000 tons of pipe were installed on the seabed, the same weight as

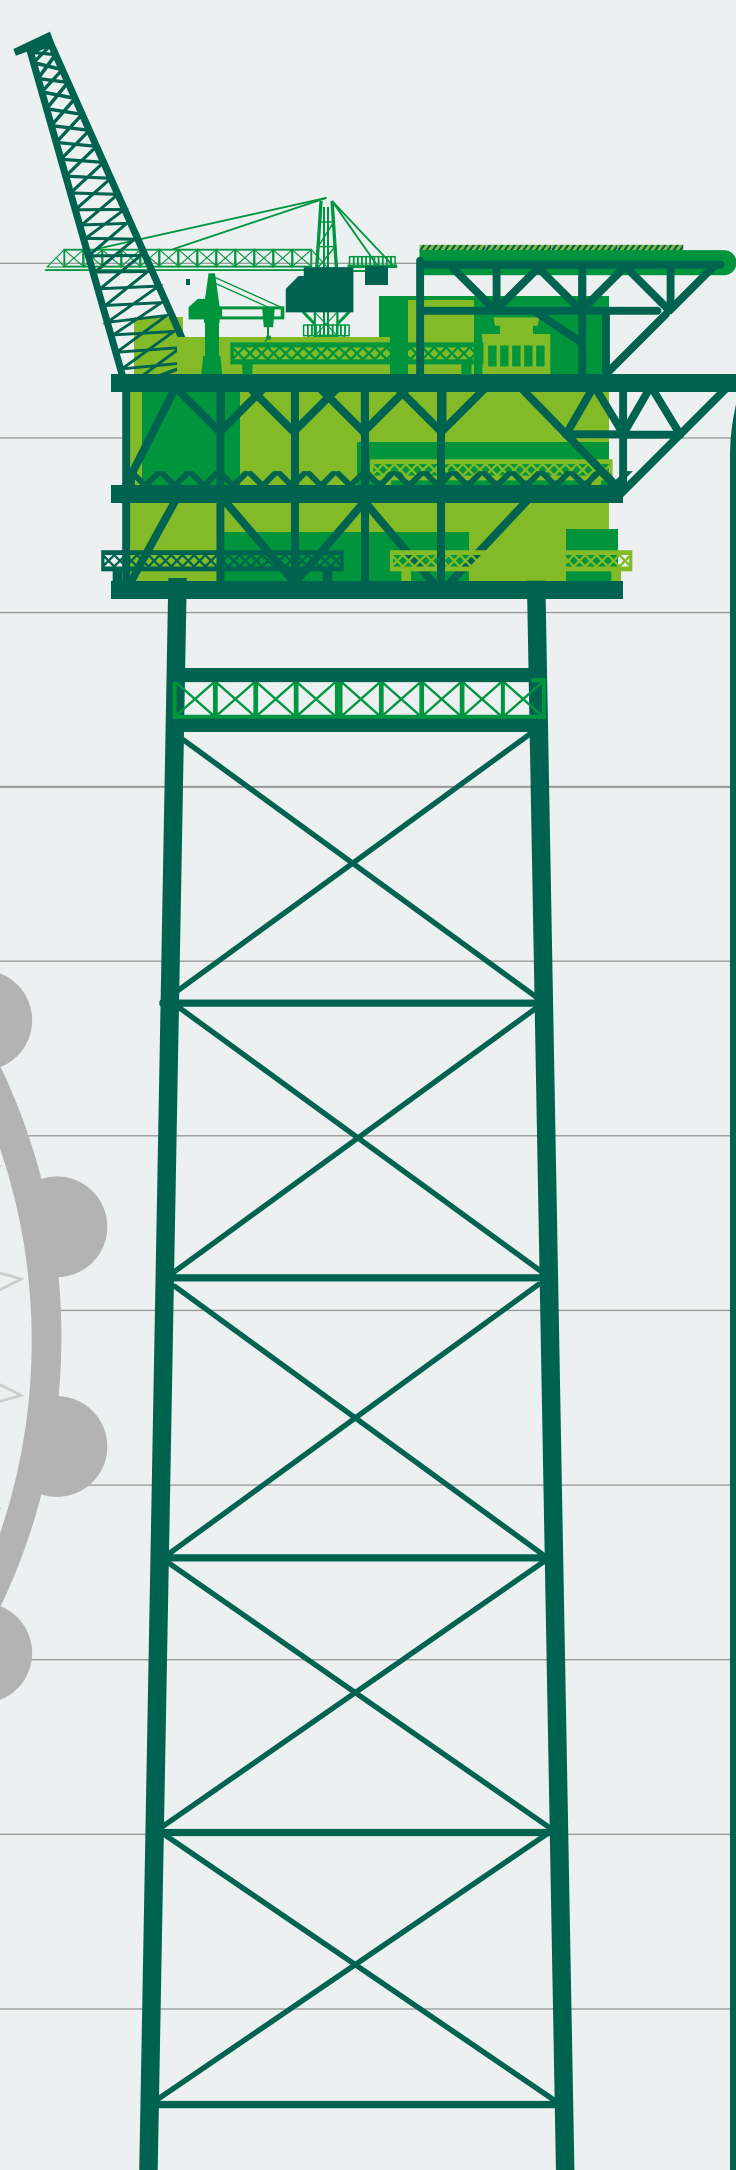

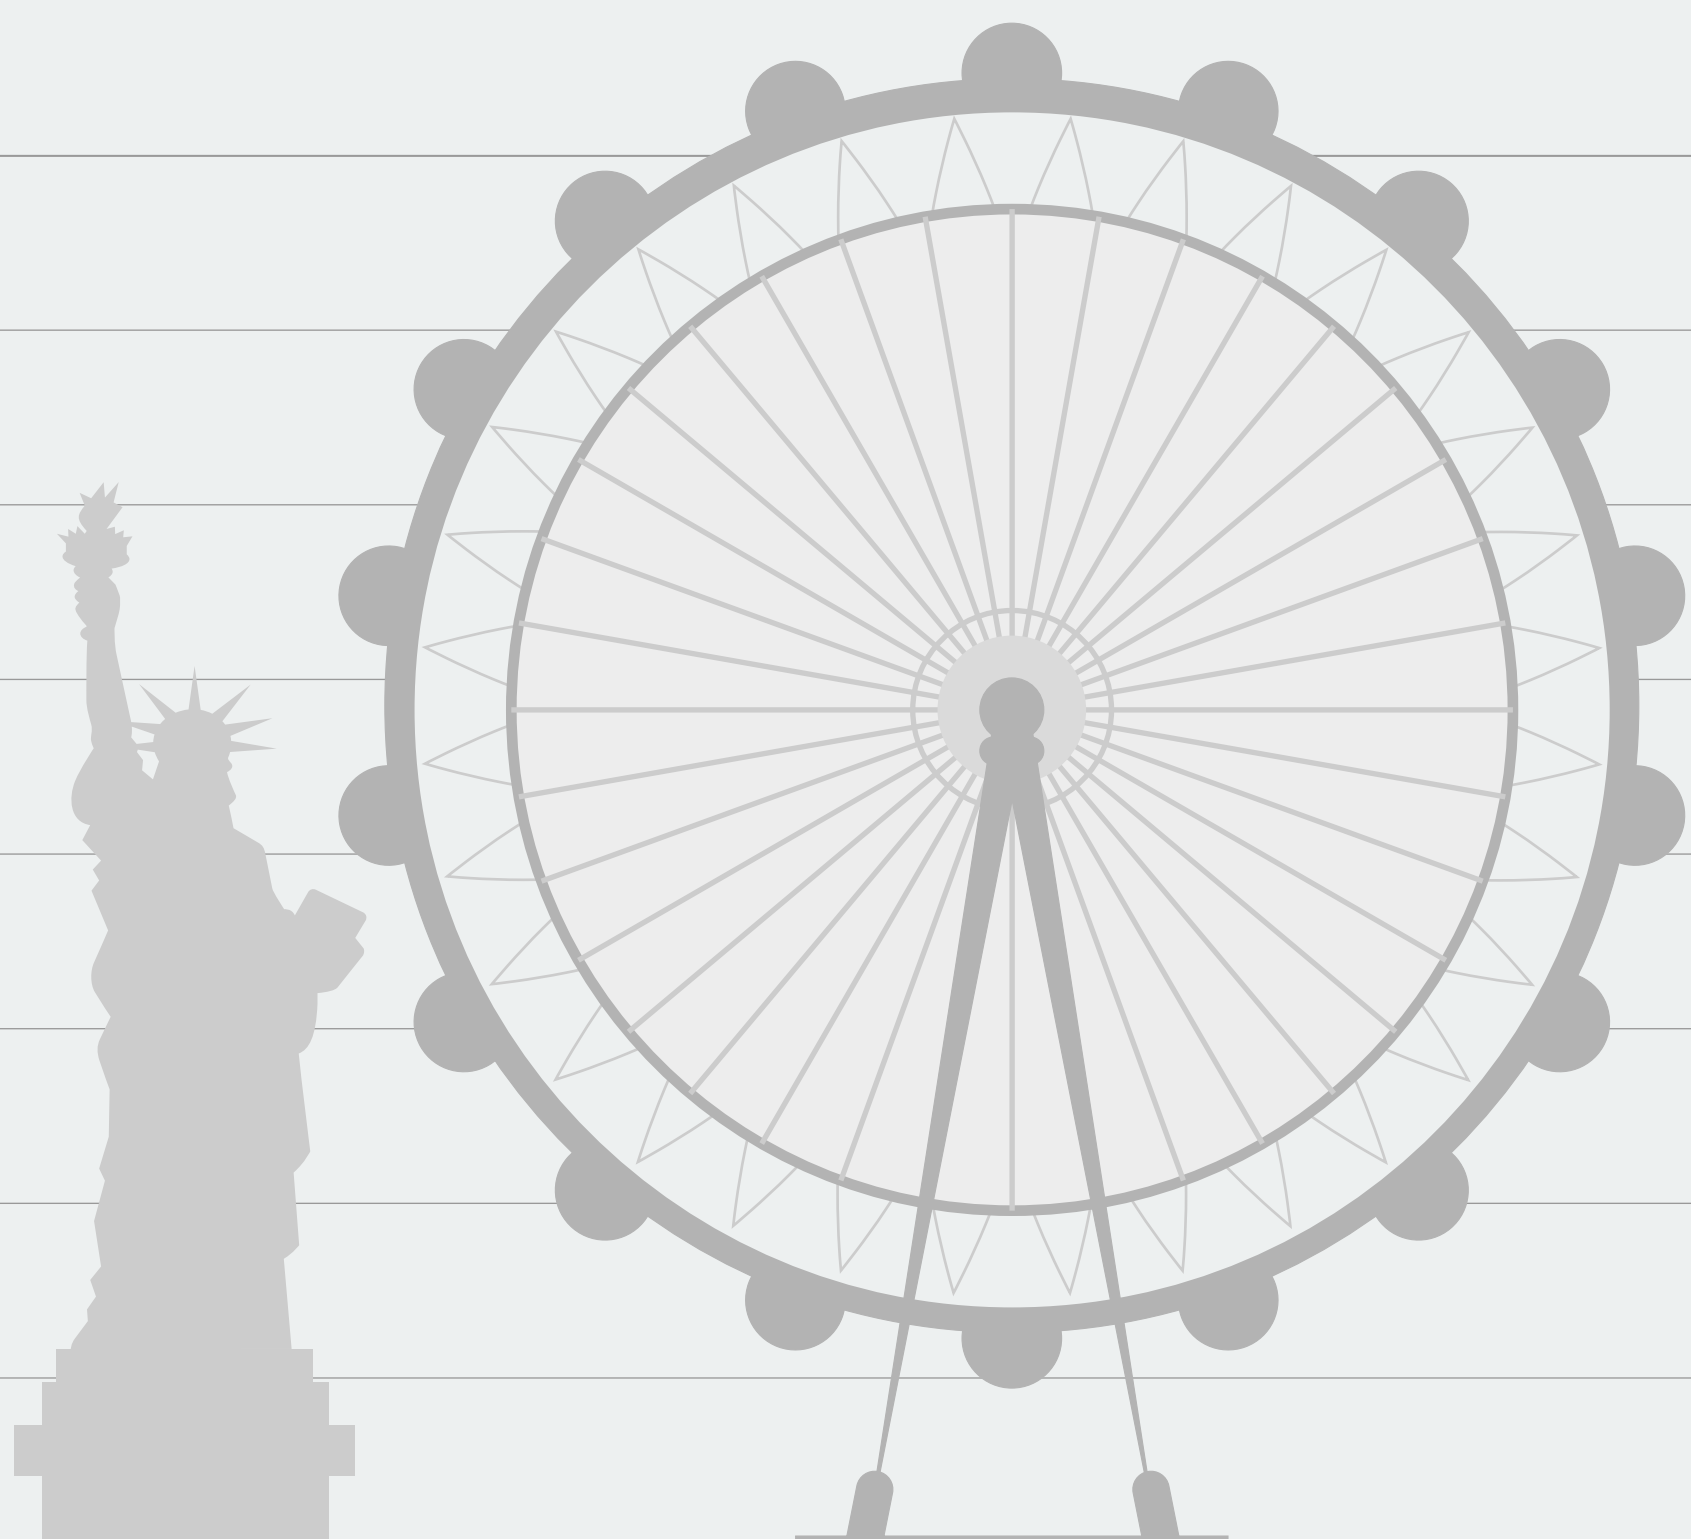

4,000

average cars

OVER 95%

of the labour during the fabrication in La Brea was done by Trinidad & Tobago nationals
