

## US Lower 48

The US Lower 48 business comprises BP's onshore oil and gas operations in the 'Lower 48' states of the US. The business has significant activities producing natural gas, NGLs and condensate across seven states, including production from unconventional gas, coalbed methane (CBM) and shale gas assets.

We began operating the US Lower 48 as a separate business in January 2015. The results of this business are reported within our Upstream segment.

The quarterly information presented here is intended to provide insight into the operating and financial performance of the US Lower 48 business.

(a) Liquids comprise crude oil, condensate and natural gas liquids.

(b) Hydrocarbons comprise liquids and natural gas. Natural gas is converted to oil equivalent at 5.8 billion cubic feet = 1 million barrels.

(c) Production costs do not include depreciation, depletion and amortization, ad valorem and severance taxes and certain other costs.
