

## Providing

lower emissions gas

Produces about half as much CO<sub>2</sub> as coal when burned for power

Emits fewer pollutants

Perfect partner to variable sources like solar and wind power

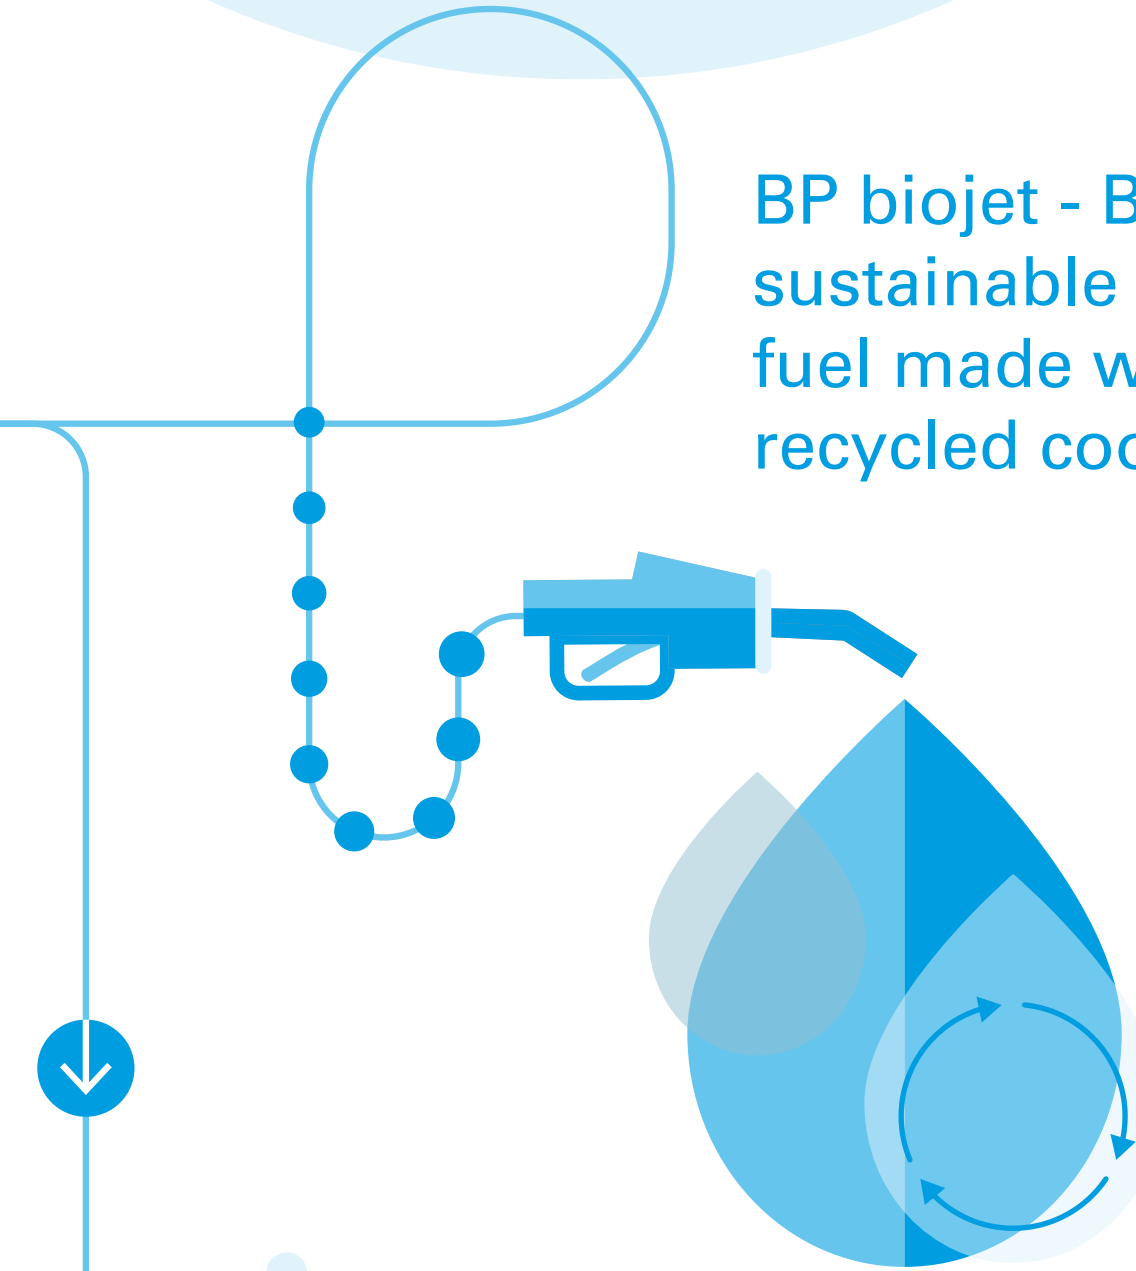

Delivers the high temperatures needed in heavy industries like steel, cement and metals

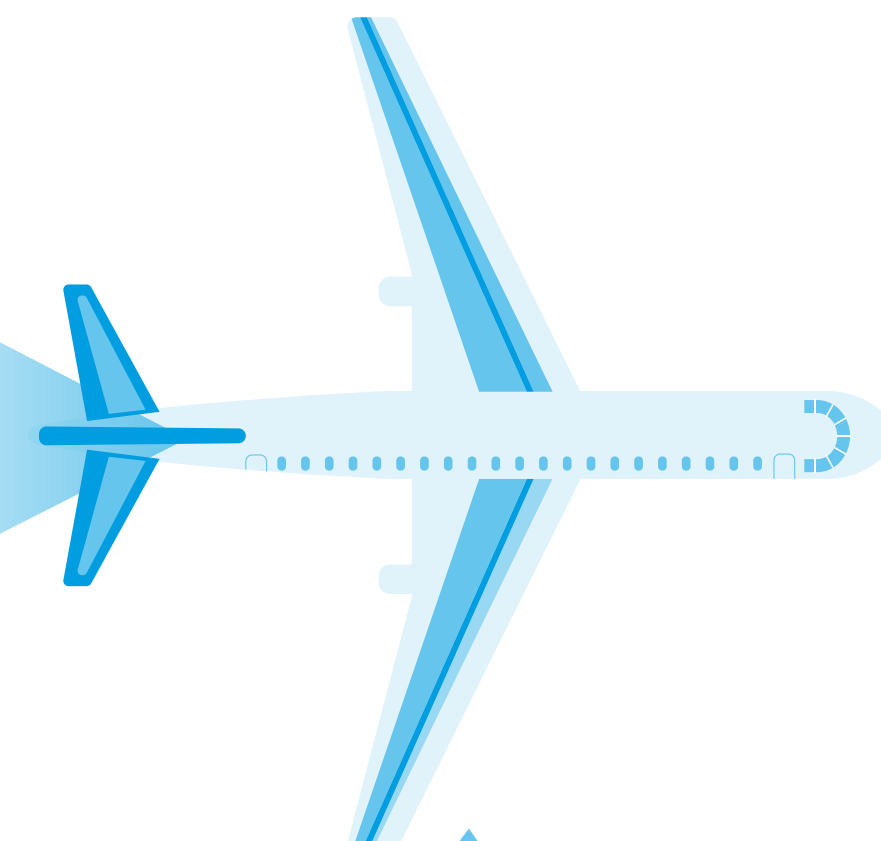

## Developing

more efficient and lower carbon fuels, lubricants and petrochemicals

Castrol GTX ECO – An oil range that uses a base-oil blend of at least 50% re-refined base oil

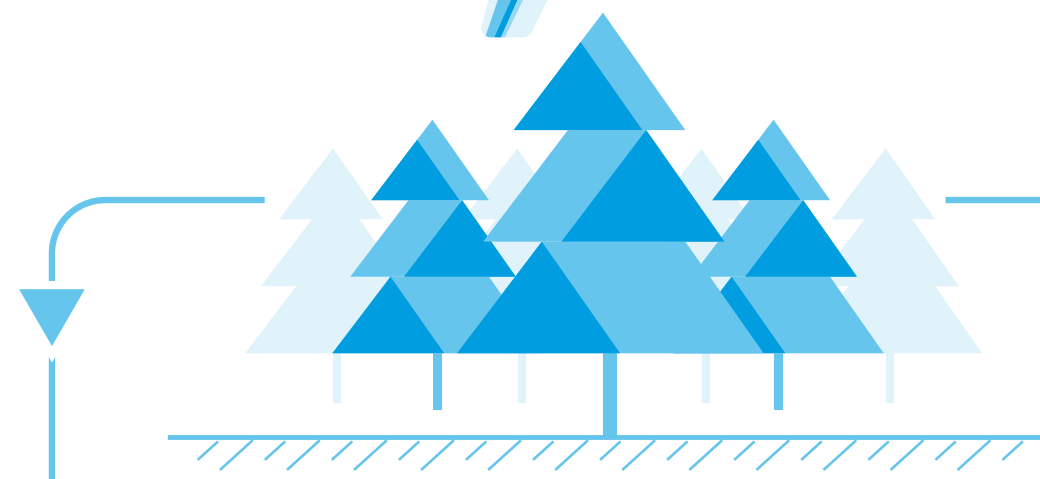

BP biojet - BP's sustainable aviation fuel made with recycled cooking oil

## Growing

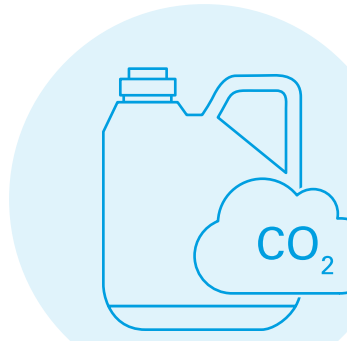

lower carbon offers for customers

BP Target Neutral has offset over 4m tonnes of customer emissions since 2006. In 2018 we launched:

New offsetting facility in BPme fuels payment app

Castrol VECTON carbon neutral

PTAir Neutral is the world's first certified carbon neutral PTA

PTA is the building block for everyday items such as clothes and packaging

To support these offers, Target Neutral buys carbon credits from a portfolio of projects that reduce emissions and improve lives
