

bp looks to leverage power of generative AI with Copilot for Microsoft 365

15 November 2023

bp has announced that it will be expanding the use of generative AI to enhance its global employee experience through the use of Copilot for Microsoft 365.

bp is the one of the first companies globally to act as a launch partner for the 'intelligent AI assistant'. bp will be able to roll out access at scale across a substantial part of its global workforce from early 2024.

Copilot for Microsoft 365 is a cloud-based service that integrates with the Microsoft 365 ecosystem. The service uses artificial intelligence and natural language processing to automate a variety of daily tasks such as writing emails and managing inboxes.

By using the capabilities of Copilot for Microsoft 365, bp can help employees to boost productivity, upskill, enhance business performance and support innovation. bp may also offer insights that may help shape the future functionality of the product.

Leigh-Ann Russell, bp's EVP of innovation & engineering says:

"This collaboration with Copilot for Microsoft 365 is a significant next step in bp's digital transformation. Leveraging the latest developments in AI-powered workplace solutions offers the opportunity for bp to transform how work gets done. Our ambition is to empower our people to spend more time on innovation and the problem-solving that will help make the energy transition a success.

"bp has been using AI safely and responsibly in our operations for a number of years. Extending our work with a trusted partner such as Microsoft means that bp is one of the companies at the forefront of the global deployment of this tool."

Clare Barclay, CEO, Microsoft UK says:

"Copilot for Microsoft 365 will help thousands of employees unlock creativity and give them the ability to focus on what really matters: problem-solving, innovation and accelerating the energy transition. We're supporting bp as it puts this transformational technology in the hands of its people."

About bp

bp's purpose is to reimagine energy for people and our planet. It has set out an ambition to be a net zero company by 2050, or sooner and help the world get to net zero, and a strategy for delivering on that ambition. For more information visit bp.com.

Cautionary statement

In order to utilize the 'safe harbor' provisions of the United States Private Securities Litigation Reform Act of 1995 (the 'PSLRA'), bp is providing the following cautionary statement. This press release contains certain forward-looking statements – that is, statements related to future, not past events and circumstances – which may relate to one or more of the financial condition, results of operations and businesses of bp and certain of the plans and objectives of bp with respect to these items. These statements are generally, but not always, identified by the use of words such as 'will', 'expects', 'is expected to', 'aims', 'should', 'may', 'objective', 'is likely to', 'intends', 'believes', 'anticipates', 'plans', 'we see' or similar expressions. Actual results may differ from those expressed in such statements, depending on a variety of factors including the risk factors set forth in our most recent Annual Report and Form 20-F under "Risk factors" and in any of our more recent public reports.

Our most recent Annual Report and Form 20-F and other period filings are available on our website at www.bp.com, or can be obtained from the SEC by calling 1-800-SEC-0330 or on its website at www.sec.gov.
