

5-minute talk for **We stop if the unexpected occurs**

Process Safety Fundamental (PSF)

WE STOP IF THE UNEXPECTED OCCURS

- We discuss the work plan and what signals would tell us it is proceeding as expected.
- We pause and ask questions when signals and conditions are not as expected.
- We stop and alert supervision if the activity is not proceeding as expected.

Discussion prompts

When is the last time you stopped to re-evaluate a task if it is not going as planned?

Who can you seek guidance from if an activity is not proceeding as expected?

Note: Pausing or stopping a task may feel inconvenient at the time but keeping an activity on plan and under control will avoid incidents, keeping people safe, and supporting good business performance.
