

5-minute talk for **We watch for weak signals**

Process Safety Fundamental (PSF)

WE WATCH FOR WEAK SIGNALS

- We proactively look for indicators or signals that suggest future problems.
- We speak up about potential issues even if we are not sure they are important.
- We persistently explore the causes of changing indicators or unusual situations.

Discussion prompts

Do you have examples of weak signals which may have indicated an incident which occurred? How could there have been a proactive response to these signals?

Do you have any examples of weak signals which may need to be discussed currently?

Note: 'Weak signals' can be a vital opportunity to act early to avoid an accident, so it is important that they are persistently explored to understand the cause.
