# Chapter 2 Glossary

# 2 GLOSSARY AND ABBREVIATIONS

Term	Definition	
AC	asbestos cement	
access road	<ul> <li>An access road is defined as being any specific route, to be used during construction and/or operational phases by the operator and/or contractors that is needed for preparatory work, pipeline laying, pipeline operations and/or maintenance and which:</li> <li>Does not regularly carry heavy construction or maintenance vehicles, or</li> <li>Requires widening and/or surface improvement works along some, or all, of its length before it can be used for pipeline-related access purposes.</li> <li>An access road is considered to begin at its junction with a more major road that does not meet any of the above characteristics</li> </ul>	
ACT Research	Analysis and Consulting Team (ACT), a Georgian social research and consultancy company	
additional land	land outside the approved project working areas and other areas occupied by the project for temporary construction support or permanent facilities	
AETC	Azerbaijan Environmental and Technology Centre, an Azerbaijani environmental and social consultancy company	
AGI	Aboveground installation: any pipeline installation that is above ground, i.e. the pigging station and block valves	
agricultural area/land	area used for growing crops commercially (including areas temporarily out of use); excludes land used exclusively for grazing	
AIOC	Azerbaijan International Operating Company	
ALARP	as low as reasonably practicable	
AMs	aerial markers	
amsl	above mean sea level	
anthrax	an infectious disease caused by the spore-forming bacterium <i>Bacillus anthracis</i> . Anthrax most commonly occurs in wild and domestic mammalian species (cattle, sheep, goats, camels, antelopes, and other herbivores), but it can also occur in humans when they are exposed to infected animals or to tissue from infected	
API	animals American Petroleum Institute	
arable land	land used to grow crops	
ARs	access roads	
Asphalt/asphalted road	Is a road covered with a mixture of bitumen and mineral aggregate that forms a dark, smooth, hardwearing surface on top of the road	
ASME	American Society of Mechanical Engineers	
ATS	action tracking system	
auger boring	a drilling device, or drill bit, that usually includes a rotating helical screw blade to act as a screw conveyor to remove the drilled out material. The rotation of the blade causes the material to move out of the hole being drilled	
avulsion	abandonment of an old river channel and the creation of a new one	
AZN	Azerbaijan new manat, the currency of Azerbaijan	
AZRDB	Red Data Book of Azerbaijan: an inventory of threatened fauna and flora in Azerbaijan	
backfilling	the process of filling the trench with soil after the pipe has been laid. Soil is returned to the trench in reverse order, with the subsoil put back first, followed by the topsoil. This ensures the topsoil is returned to its original position	
barg	unit of gauge pressure	
BAT	best available technology	
bcma	billion cubic metres per annum (year)	
bentonite	a mineral clay used as a drilling mud to aid the drilling/boring process	
bgl	below ground level	

Term	Definition	
	the restoration of flora and fauna and the establishment of vegetation cover (post	
biorestoration	seeding) to return the vegetation cover and species diversity to meet the Project's	
	long-term targets	
biotic/abiotic	living organisms/non-living organisms	
blackwater/black water	wastewater containing human or animal waste, e.g. sewage	
BOD	biological oxygen demand	
BP	BP plc	
BP Cirrus	a software programme for modelling the consequences of gas leaks	
BP GDP	BP Group Defined Practice	
bpd	barrels per day	
BPEO	best practicable environmental option	
BI LO	urban sites for potential building development that have had previous developments	
brownfield	on them	
	an infectious disease caused by the bacteria of the genus Brucella. These bacteria	
brucellosis	are passed primarily among animals and cause disease in many different	
DIUCEIIOSIS	vertebrates. Humans become infected by coming in contact with animals or animal	
	products that are contaminated with these bacteria	
BSI	British Standards Institute	
BTC	Baku-Tbilisi-Ceyhan pipeline	
	BTC Environment and Social Impact Assessment (ESIA) Response to Comments	
BTC ESIA	from draft Public Disclosure Phase Volume I and Volume II September 2002;	
	Approved November 2002	
BTEX	benzene, toluene, ethylbenzene and xylenes	
	bunding, also called a bund wall, is the area within a structure designed to prevent	
bunding	inundation or breaches, usually referring to harmful or hazardous liquid chemical	
bunung	containers, to capture leakage.	
	block valve; a valve used to stop the flow of product through a pipeline and isolate a	
BV	segment of the pipeline system or a component of the system	
BVR	SCPX block valve site	
DVK	soils composed of, containing, or characteristic of calcium carbonate, calcium or	
calcareous	limestone	
	Construction camp; a purpose built area containing accommodation, welfare and	
camp	recreational facilities for Project construction workers	
	substances and preparations that, if they are inhaled or ingested or if they penetrate	
carcinogenic	the skin, may induce cancer or increase its incidence	
CARs	corrective action requests	
	a technique used to control the corrosion of a metal surface by making it the cathode	
cathodic protection	of an electrochemical cell	
CB&I	Chicago Bridge and Iron	
	community-based organisation: an organisation based only in one or more	
СВО	communities that aims to promote the interests and welfare of some or all of the	
000	members of these communities. Similar to a 'local association'	
CCA	Common Country Assessment: a system to analyse the national development	
	situation and identify key development issues	
CCTV	Closed-Circuit Television	
CDI	community development initiative	
census	an official enumeration of the population, with details of age, sex, occupation, etc.	
CH	cultural heritage	
CH <sub>4</sub>	methane	
chal meadow	marshland habitat with a high ecological value and a species rich, natural plant	
CITES	community Convention on International Trade in Endangered Species of Wild Elera and Found	
CITES	Convention on International Trade in Endangered Species of Wild Flora and Fauna	
CLO	community liaison officer	
cm	centimetres	
2	cubic centimetres	
cm <sup>3</sup> CO	carbon monoxide	

Term	Definition	
CO <sub>2</sub>	carbon dioxide	
CO <sub>2eq</sub>	carbon dioxide equivalent: for the purposes of this ESIA. This is the total emissions	
	of carbon dioxide and methane expressed as tonnes of CO <sub>2</sub> , assuming methane has	
	a global warming potential of 25 (from the Intergovernmental Panel for Climate	
	Change Fourth Assessment Report, 2007).	
COD	chemical oxygen demand	
	a statement of intent to implement a future measure with the aim of minimising,	
commitment	mitigating, managing or offsetting environmental and socio-economic impacts or	
	promoting potential benefits	
	for the purposes of this ESIA a community consists of interacting individuals, groups	
	and households who live together, permanently, temporarily or intermittently, in	
	relatively close proximity in a settlement, consisting of a least five dwellings such as	
community	houses and other built structures, which is considered to be a specific administrative	
	or socio-political entity, by the residents, and is recognised as such by the members	
	of other communities.	
	site condition (social, geographic or environmental) that could result in potentially	
constraint	higher impact from project activities. The areas identified as having constraints	
	should be avoided or mitigation measures applied.	
14 - 12	two-way exchange of information, views, and opinions on matters of mutual interest	
consultation	during the ESIA process	
contaminant	a potentially poisonous, polluting or otherwise harmful substance	
contaminated land	land that has been contaminated by potentially polluting substances	
contouring	landscaping the surface of the earth to adjust slopes	
	all construction contractors responsible for pipeline installation, special crossings,	
contractor	except where one of these parties is specifically identified	
corridor	the corridor (or route corridor) is the swathe of land within which the pipeline will lie.	
COSHH	control of substances hazardous to health	
	the principle that waste management responsibility extends from the point of	
cradle to grave	generation, or cradle, to its final destination, or grave	
curtilage	land area within property boundaries	
	a system of classifying the abundance of a species of plant according to the	
DAFOR	following scale: Dominant, Abundant, Frequent, Occasional or Rare	
dB	decibel	
	the unit used to measure the A-weighted decibel scale, which compensates for the	
dB(A)	specific sensitivities of the human ear (compared to a normal, unselective	
(-)	microphone)	
DBH	diameter at breast height (of a tree)	
	the unit used to measure the intensity of sound. It can be specifically defined as the	
decibel	logarithmic ratio of a sound pressure relative to a reference level of 20 micro-	
	Newtons per square metre	
	a multiplier that is used to ensure that the maximum design load or capacity of the	
design factor	pipeline is maintained below the maximum value that could be sustained by a	
3	pipeline system component or structure without failure	
	the temperature below which the water vapour in a volume of humid air at a constant	
dew point	barometric pressure will condense into liquid water	
directional boring	see 'horizontal directional drilling'	
DLE	dry low emission	
DLN	dry low NO <sub>x</sub>	
DO	dissolved oxygen	
	system devised by K. Domin for describing the cover of a species in a vegetation	
Domin scale	community	
	dye penetrant inspection: a method for locating surface defects in the pipeline. A dye	
DPI	is applied to the surface and then wiped away. The dye remains in cracks, rendering	
	them more visible and identifiable.	
drilling mud/drilling waste	fluids used and wastes generated during drilling and tunnelling	
anning maalanning waste	המוטש טשבע מווע שמשנכש עבוובומנבע עעווווץ עווווווץ מווע נעווופווווץ	

Term	Definition	
driver	includes drivers of passenger vehicles, goods vehicles and tracked or wheeled plant	
due d'Essere survey	and machinery	
due diligence survey	a survey conducted to identify pre-existing liabilities, e.g. soil contamination, of a site	
dunnage	material used to protect and securing cargo loads during transportation	
duty of care	the principle that states a waste producer has a duty to ensure that a waste is properly managed even after that waste has been transferred to a third party	
E&S GDP	BP Environmental and Social Group Defined Practice	
E-3	an exponential formula, e.g. 7 E-3 = 0.007	
economically active population	all persons of either sex, and above a certain age, providing the supply of labour for productive activities during a specified time-reference period. It includes all persons who fulfil the requirements for inclusion among the employed (employees or self employed) or the unemployed	
EGIG	European Gas Pipeline Incident Data Group	
EHS	environment, health and safety	
EIA	environmental impact assessment	
endemic	In epidemiology, an infection is said to be endemic in a population when that infection is maintained in the population without the need for external inputs. In ecology, it means that a species is confined to a certain area.	
engagement	term used to describe system and processes by which proponent/operator of a facility interacts on a regular basis with its stakeholders	
environmental and social assessment	an internal assessment (following the ESIA methodology) to identify the potential environmental and social impacts and proposed mitigation measures of a proposal, The scope and scale of the assessment is appropriate to the nature of the proposal and the range and magnitude of potential impacts identified.	
environmental strategy product	the scoping study, risk assessment, baseline study, EIA and emergency response plan as defined by the HGA	
ephemer	plant with a rapid life cycle	
ephemeroid	plants with underground storage organs	
epidemic	a widespread occurrence of an infectious disease in a community at a particular time	
EPPD	Export Pipelines Protection Department	
ERA	ERA Marketing Center, an Azerbaijani social research and consultancy company	
ERMP	Employment Relations Management Plan	
erosion class	categorisation of the severity of potential soil erosion	
ERP	Emergency Response Plan	
ESBR		
ESD	environmental and social baseline report	
ESIA	emergency shut down	
ESMMP	environmental and social impact assessment	
ESMP	Environmental And Social Management And Monitoring Plan	
-	Environmental And Social Management Plan	
ESMS excavation	environmental and social management system any operation involving movement of earth, rock or other materials below existing grade or surface level. Excavation can include digging, boring, tunnelling, and backfilling	
explosive	substances and preparations that may explode under the effect of flame or are more sensitive to shocks or friction than dinitrobenzene	

Term	Definition	
	"'Facility' or 'Facilities' means a main trunkline transmission system and	
	interconnections for the transit of Natural Gas, and for the receipt, transportation and	
	delivery of Natural Gas within, across, to and/or through the Territory and all above	
	and below ground or seabed installations and ancillary equipment, together with any	
	associated land as provided for in the applicable Project Agreement, all receipt,	
	delivery, treating, pressure reduction, compressing, measuring, sampling, testing	
	and metering facilities, all SCADA, communications, telemetry, fiber optic and other	
	cabling and similar equipment to support state-of-the art system communications	
	requirements used only for the operation, monitoring and maintenance of the SCP	
	System (and/or in cooperation with the project described in the BTC Project	
facility (quoted from the host	Agreements), all pig launching and receiving facilities, all Natural Gas which is used	
government agreement)	as line pack, all pipelines, conduit and other related equipment, including power	
govorninoni agroomoniy	lines, used to deliver any form of liquid or gaseous fuel and/or power necessary to	
	operate pump and/or compressor stations or for other system needs, cathodic	
	protection devices and equipment, all monitoring posts, markers and sacrificial	
	anodes, all terminaling, storage and related installations, all associated physical	
	assets and appurtenances (including roads and other means of access and	
	operational support) required from time to time for the proper functioning of any and	
	all thereof, constructed, installed, maintained, repaired, replaced, expanded,	
	extended, owned, controlled and/or operated by or on behalf of the SCP Participants	
	in respect of the SCP Project, as they may be modified, expanded (including by way	
	of additional pipeline loopings) or extended (including by way of laterals) in	
	accordance with the provisions of a Project Agreement."	
fauna	all animal life of any particular region or time	
	fusion bonded epoxy: a thermoset polymer epoxy based powder coating that is used	
FBE	to protect pipelines	
FBR	full bore rupture: a total mechanical failure of the pipeline leading to rupture	
FCIROW	facilities construction and installation right of way	
FEED	front-end engineering design	
FFD	full field development	
FFREQ	gas industry failure frequency prediction methodology used to assess the risk of	
	failure of a gas pipeline due to damage by others	
flora	all plant life of any particular region or time	
flume	to channel a flow of water into a pipe	
FOC	fibre optic cable: a cable containing optical fibres used to transmit digital information	
footprint	the total physical area of land required by the project or a component of the project,	
	such as a pigging station site	
fugitive dust	solid airborne particulate matter emitted from any source other than a stack or	
	chimney	
• · · · ·	a total structural failure of the pipeline leading to rupture. A rupture is the	
full bore rupture	propagation or growth of a defect to such an extent that the pipe becomes	
	completely unserviceable.	
GAB	guided augur bore: see 'augur boring' above	
gabions	wire cages filled with stones; used to support banks	
000	gross domestic product: a measure of the market value of all final goods and	
GDP	services produced in a country in a given period. GDP per capita is often considered	
0110	an indicator of a country's standard of living	
GHG Circles of finitest	greenhouse gas/gases	
Gini coefficient	a measure of income inequality in a country	
	geographical information system: an information system that integrates, stores,	
	adda analyzan alayzan and disclose measured information for the formation of the	
GIS	edits, analyses, shares and displays geographic information for informing decision	
	making	
GLAC	making Guide to Land Acquisition and Compensation	
	making	

Term	Definition	
H&S	health and safety	
ha	hectare: a metric unit of area defined as 10,000 square metres (100m by 100m)	
habitat	the area or environment where an organism or ecological community normally	
habitat	or occurs	
habitat fragmantation	the breaking up of an area of habitat into increasingly smaller blocks as a result of	
habitat fragmentation	direct loss and/or disturbance	
h a mafe d	substances and preparations that, if they are inhaled or ingested or if they penetrate	
harmful	the skin, may involve limited health risks	
	household budget survey: a survey that focuses on households' expenditure on	
HBS	goods and services, giving a picture of living conditions	
	horizontal directional drilling: a steerable trenchless method of installing	
HDD	underground pipes in a shallow arc along a prescribed bore path by using a surface	
	launched drilling rig, with minimal impact on the surrounding area	
HDPE	high-density polyethylene	
	a contagious liver disease that results from infection with the hepatitis B virus.	
hepatitis B	Hepatitis B is usually spread when blood, semen or another body fluid from a person	
•	infected with the hepatitis B virus enters the body of someone who is not infected	
HGA	Host Government Agreement	
HGV	heavy goods vehicle	
HH	household	
HIA	health impact assessment	
highly flammable	liquid substances and preparations having a flash point below 21°C (including	
	extremely flammable liquids); substances and preparations that may become hot	
	and finally catch fire in contact with air at ambient temperatures without any	
	application of energy; solid substances and preparations that may readily catch fire	
	after brief contact with a source of ignition and continue to burn or to be consumed	
	after removal of the source of ignition; gaseous substances and preparations that	
	are flammable in air at normal pressure; and substances and preparations that, in	
	contact with water or damp air, evolve highly flammable gases in dangerous	
	quantities	
HIV	human immunodeficiency virus	
HSE	health, safety and environment	
HSSE		
11355	health, safety, security and environment organic compounds consisting entirely of hydrogen and carbon, including	
hydrocarbon	substances such as crude oil, natural gas etc.	
	process during which the pipeline is filled and pressurised with a water-based	
hydrotest		
	solution to test the integrity of the system	
ICSS	integrated control and safety system	
IDP	internally displaced person. a person who has been displaced by conflict or natural	
	disaster, but who has not left his/her country of residence	
IFC	International Finance Corporation, part of the World Bank Group that lends to the	
	private sector	
IFI	international financial institution	
IGA	inter-governmental agreement	
ILO	International Labour Organization	
	any aspect of a project that may cause an effect; for example, land clearing during	
impact/effect	construction is an impact, while a possible effect is loss and fragmentation of wildlife	
	habitat	
IMT	incident management team	
indicator species	species used to provide a measurable sign or symptom of change for the general	
1111100101 0p00100	population	
infectious	substances containing viable micro-organisms or their toxins which are known or	
	reliably believed to cause disease in man or other living organisms	
	the movement of people into or out of a community or region	
in-migration and out-migration	the movement of people into of out of a community of region	
In-migration and out-migration	Institute of Archaeology and Ethnography	

Term	Definition	
IPA	Intermediate Pigging Station, Azerbaijan	
IPA1	WREP intermediate Pigging Station	
IPLOCA	International Pipeline and Offshore Contractors Association	
irritant	non-corrosive substances and preparations which, through immediate, prolonged or repeated contact with the skin or mucous membrane, can cause inflammation	
ISO		
	International Standards Organization	
	Invitation To Tender	
IUCN	International Union for Conservation of Nature	
К	the unit of measurement used to define the size of earthquakes in the 'K-class' system; the system used within Azerbaijan	
karizes	a water management system that supplies water to settlements or for irrigation	
km	kilometres: a metric unit of measurement equal to 1000 metres (approximately 0.62 miles)	
km <sup>2</sup>	the metric symbol for square kilometres	
KPIs	key performance indicators	
	kilometre points: used to measure a distance on the pipeline to help find a specific	
KPs	location	
kV	kilovolt	
LACF	Land Acquisition and Compensation Framework	
LACI	A-weighted continuous equivalent sound pressure level, an average value used to	
L <sub>Aeq</sub>	represent fluctuating noise sources, as heard by the human ear	
LDS	leak detection system	
leachate	liquid product of leaching process which normally drains from landfills	
LED	light emitting diode	
line pipe	sections of pipe that can be welded together to form a pipeline	
LOMS	local operating management system	
lower and lay	the process of placing the pipe into the trench	
•	Living Standard Measurement Study: a household study of living standards	
LSMS	undertaken to collect diagnostic socio-economic data and statistics	
m	metric symbol for metre, an SI unit of length	
m <sup>2</sup>	metric symbol for square metres, an SI unit of area	
m <sup>3</sup>	metric symbol for cubic metres, an SI unit of volume	
magnitude (of an impact)	a measure of how adverse or beneficial an effect may be	
MAOP		
	maximum allowable operating pressure	
MD	Ministry of Defence	
MDL	method detection limit	
MENR	Ministry of Ecology and Natural Resources	
MES	Ministry of Emergency Situations	
mesophile	an organism that grows best in a moderate temperature range, typically between 15°C and 40°C	
MFE	Ministry of Fuel and Energy	
mg <sup>-3</sup>	milligrams per cubic metre	
MH	Ministry of Health	
microtunnelling	a technique for constructing small tunnels. This process uses a remotely controlled microtunnel boring machine combined with the pipe jacking technique to directly install pipelines underground in a single pass	
mitigation	actions that the Project decides to take to avoid, eliminate, reduce or compensate for impacts which have been identified in screening and further analysed in the impact assessment. Mitigation measures may cover environmental, social, health, or other impacts	
MLSPP	Ministry of Labour and Social Protection of the Population	
mm	millimetres	
MMS	Moment Magnitude Scale; a measure of the size of an earthquake in terms of energy released	
MoCT	Ministry of Culture and Tourism	
mothball	the process of indefinitely postponing a project or placing it into standby	

Term	Definition	
MPI	magnetic particle inspection: a non-destructive testing process for detecting surface	
and slightly subsurface discontinuities in ferroelectric materials such a		
MSDS	materials safety data sheet	
Mw	moment of magnitude scale	
MW	megawatt, a SI unit of power equivalent to one million watts	
MWth	megawatt thermal input	
	a subjective estimate of the amount of human influence on a habitat. Generally	
naturalness	speaking the greater the amount of human disturbance, the less natural a habitat is	
	and the lower its ecological value.	
NCD	non-communicable disease	
NCDC	National Centre for Disease Control and Public Health	
NCR	non-conformance reports	
	non-destructive testing: a variety of tests used to check the integrity of the pipe in a	
NDT	way that does not involve damage of the pipe. These tests include ultrasonic testing,	
	magnetic particle inspection and dye penetrant inspection	
NGO	non-governmental organisation	
NH4	ammonium	
NO <sub>2</sub>		
	nitrogen dioxide	
NO <sub>3</sub>	nitrate	
NOx	nitrogen oxides	
NPK	nitrogen, phosphorous and potassium	
NTU	nephelometric turbidity units	
OMS	operating management system	
open-cut	a river crossing technique used in pipeline construction where a trench is cut into a	
•	river bed	
OSRP	Oil Spill Response Plan	
PAC	project affected community: community based on an inhabited settlement (i.e. for ESIA purposes a permanently, temporarily or intermittently inhabited settlement that can be identified from maps, satellite images or aerial photographs consisting of at least five dwellings). To be identified as a PAC, communities must lie within clear boundaries (e.g. within a specified distance from a SCPX Project site) and meet defined criteria.	
padding	a uniform ground soil and crushed rocks at the bottom of the trench, designed to minimise the danger of damaging the coating of the pipe while it is being laid in the trench	
РАН	polycyclic aromatic hydrocarbons	
pathway	a link, or series of linkages, which may connect a contaminant to a receptor	
paved road	a road that is covered with a hard surface such as concrete	
PCDP	Public Consultation and Disclosure Plan	
PE	potential evapotranspiration	
PHAST	Process Hazard Analysis Software Tool: a software programme for modelling the consequences of gas leaks	
pig	pipeline inspection gauge (an internal pipeline cleaning device)	
pig launcher	equipment used at a pigging station to insert a pig into the pipeline	
pigging station	a pipeline facility used for inserting a pig into a pressurised pipeline	
PIMS	pipeline integrity management system	
pipe storage area or pipe yard	the area used to store pipes prior to being transported to the spread	
pipe stringing	placing joints of line pipe end to end along a pipeline right of way in preparation for lowering/laying	
pipeline looping	a pipeline that is paralleled (looped) by a second pipeline, both of which serve the same source and destination	
PM <sub>10</sub>	particulate matter having aerodynamic diameter of 10 microns or less	
PRCI	Pipeline Research Council International	
PRMS	pressure reduction and metering station	
	individuals affected by Project activities	

Term	Definition	
	"The relevant Person that is a party to a Host Government Agreement (other than	
	the Government of the respective States in the capacity of a host government	
	counterparty to any such agreement), the operating company in respect of the SCPX	
	Project appointed by such party pursuant to the Host Government Agreement, and	
project investor	any successor or permitted assignee of any of the foregoing. A 'Project Investor'	
	shall include (i) in respect of any Person, its legal constituent parts, such as a	
	branch, office and permanent establishment, or an affiliate acting on behalf of such	
	Person or its constituent parts, and (ii) a nominee, agent or representative acting on	
	behalf of such Person or its constituent parts."	
	a protected area designated under the Law of the Azerbaijan Republic on Protection	
protected area	of the Environment	
	a species designated by the IUCN vulnerable, endangered or critically endangered,	
protected species	species listed by CITES and species included into the Red Data Book of the	
h	Azerbaijan Republic or into the list of specially protected animal species	
PSA	Baku–Tbilisi–Ceyhan Pump Station, Azerbaijan	
purpose-built batching plant	batching plant facilities that are contractor or subcontractor established for SCPX	
QRA	quantitative risk assessment	
	a preventable viral disease of mammals most often transmitted through the bite of a	
rabies	rabid animal. The rabies virus infects the central nervous system, ultimately causing	
Tables	disease in the brain and death.	
	passing a spiked or toothed implement through soil to break up lumps of soil that	
raking	have stuck together	
RAP	Resettlement Action Plan	
	a location (e.g. a habitat, a community, a watercourse) that may be adversely	
receptor	affected by a specific impact of the project	
redox	oxidation and reduction considered together as a complementary process	
	person who has been displaced by conflict or natural disaster and who has crossed	
refugee	an internationally recognised state border and left his/her country of residence	
	the process of restoring the area to its prior state after pipeline laying (includes	
	installation of erosion control measures, replacement of topsoil, topography, fences,	
	etc. and preliminary seeding, to all disturbed areas associated with the construction	
reinstatement	of the pipeline or pipeline facilities after their installation)	
	Note: the reinstatement of vegetative cover and species diversity beyond the	
	contract warranty period is not included in this definition (see biorestoration).	
residual impact	an effect that remains after mitigation has been applied	
rip rap	rock, or other material, used to protect riverbanks from water erosion	
rinning	the process of alleviating compaction of soil by passing mechanically operated	
ripping	spikes through it	
ROW	right of way; a strip of land on and around a pipeline, on which an operator has the	
	right to construct, operate and/or maintain a pipeline.	
RSK	RSK Group plc; Environmental Consultancy	
RTA	road traffic accident	
run-off	the downhill flow of water (usually from rainfall) over the surface of land	
SCP	South Caucasus Pipeline	
SCPX	South Caucasus Pipeline Expansion	
	"Any one or more, or all, of the Parties to this Agreement (including by novation	
SCPX Participants	and/or accession as an SCPX Participant pursuant to any Project Agreement), other	
	than the State Authorities, and any successors and permitted assignees of any of	
	the foregoing."	
SD1 and SD2	Shah Deniz Stage 1 and Shah Deniz Stage 2	
SEE	State Ecological Expertise	
	initial appelling required to obtain Euclide Class 2, restars upgratative and return	
	initial seeding required to obtain Erosion Class 3, restore vegetative cover and return	
seeding	areas to a condition which is visually similar to the surrounding area during the contract warranty period	

Term	Definition	
sensitive area	a project-defined term that refers to areas along the right of way that have been raised to a higher level of environmental significance including due to the presence of sensitive vegetation and/or fauna (including Azerbaijan Red List; IUCN Vulnerable; Caucasian Endemic Species and CITES species). This is a term that applies specifically to the SCPX Project and does not correspond to any national or international designation.	
sensitivity	the relative susceptibility to adverse impacts	
SI	International System of Units: the system of metric units of measurement	
sidecasting	spoil piled or disposed to the side of, and outside, the designated right of way or working width	
significance (of an impact)	a ranking of how significant an impact may be, based on its potential magnitude and likelihood and the importance and/or sensitivity of the receptor impacted	
SOCAR	State Oil Company of Azerbaijan Republic	
soil erosion class	categorisation of the severity of potential soil erosion	
SoW	scope of work	
SO <sub>x</sub>	sulphur oxides	
spoil	material removed from an excavation	
spread	all the personnel and equipment necessary to carry out all stages of construction	
SRA	social risk assessment	
stakeholder	person, organisation or other legal entity who has a legitimate interest in a proposed project and who has the ability to influence its location, design and the approval process	
STD/STI	sexually transmitted disease/infection	
steady noise	noise that gives fluctuations over a range not more than 5 dB on a sound level meter set to frequency weighting "A" and time weighting "S"	
STP	sewage treatment plant	
subsoil	the layer or layers of soil below the topsoil that are not fertile and normally, but not necessarily, of a different texture and/or colour to the topsoil.	
SUDS	sustainable urban drainage system; a sequence of management practices and control structures designed to drain surface water in a sustainable fashion	
SuRFNCD	National Survey on Risk Factors for Chronic Non-communicable Diseases in Azerbaijan, conducted by Ministry of Health	
TBM	tunnel-boring machine	
TDS	total dissolved solids: a measure of the inorganic salts (and organic compounds) dissolved in water	
THC	total hydrocarbons	
third party	private individual, enterprise or state organisation, i.e. any person or organisation that is not the company or contractor	
third party facility	a facility owned and operated by a third party entity	
third party land	land outside the ROW and other areas occupied by the project for temporary construction support or permanent facilities	
tining	see 'raking'	
topsoil	the top layer of soil on the surface that is suitable for sustaining agriculture or natural vegetation growth	
ToR	terms of reference	
toxic	substances and preparations (including very toxic substances and preparations) that, if they are inhaled or ingested, or if they penetrate the skin, may involve serious, acute or chronic health risks or even death.	
toxicant	a chemical capable of producing an adverse response (effect) in a biological system at concentrations that might be encountered in the environment, seriously injuring structure or function or producing death. Examples include biocides, pesticides and biotoxins	
toxicity	the inherent potential or capacity of a material to cause adverse effects in a living organism	
ТРН	total petroleum hydrocarbon: a term used for the measurement of any hydrocarbons in a given sample (e.g. soil or water)	

Term	Definition		
transboundary	something that crosses boundaries		
transboundary impact	any impact, not exclusively of a global nature, within an area under the jurisdiction of a party caused by a proposed activity the physical origin of which is situated wholly or in part within the area under the jurisdiction of another party		
treatment (for water)	improving the quality of water by physical, chemical and/or biological means		
trench	a long narrow ditch dug into the ground and embanked with its own soil and used for concealment and protection of line pipe. Trenches are usually dug by a backhoe or by a specialised digging machine		
TSS	total suspended solids: a measure of solid particles held in suspension in water, used as a water quality metric		
ultrasonic testing	a non-destructive testing method that uses ultrasonic waves to detect internal flaws within a material		
UNDP	United Nations Development Programme		
UNFCCC	UN Framework Convention on Climate Change		
unpaved road	An unpaved road is a road that can be graded or ungraded made of local material, so they have the soil or geology characteristics of the area in which they are built.		
USGS	United States Geological Survey – National Earthquake Information Centre		
UXO	unexploded ordnance: bombs, bullets, shells, grenades, land mines, etc., that did not explode when they were employed and still pose a risk of detonation, potentially many decades after they were used or discarded
