

Glen Lyon FPSO

Infrastructure Information

Oil export capacity	967.7 mb/d (to tanker)
Gas compression capacity	204.6 mmscf/d
Gas export capacity	90 mmscf/d (to pipeline)
Gas lift capacity	280 mmscf/d (Riser capacity. Well capacity varies)
Produced water handling capacity	310 mb/d
Dehydration capacity	220 mmscf/d
H2S removal capacity	Design dosage 7ppmv H2S
Water injection capacity	380.7 mb/d

High Level Capacity Information

Basic capacity information is portrayed below through coded 'traffic lights', which reflect thresholds of availability over the next 5 years.

Available Capacities ■ >25% ■ 5%-25% ■ <5% Unknown

Process Capacity Available	2019	2020	2021	2022	2023	Comments
Oil						
Gas						
Gas Compression						
Gas Lift						
Produced Water						
Dehydration						
H2S Removal						
Water Injection
