

Clair Phase 1 Platform

Infrastructure information

Oil export capacity	67 mbd
Gas compression capacity	51 mmscf/d
Gas export capacity	51 mmscf/d
Gas lift capacity	51 mmscf/d
Produced water handling capacity	117 mb/d
Dehydration capacity	49 mmscf/d
H2S removal capacity	Scavenger Based System
Water injection capacity	162 mb/d

High Level Capacity Information

Basic capacity information is portrayed below through coded 'traffic lights', which reflect thresholds of availability over the next 5 years.

Available Capacities >25% 5%-25% <5% Unknown

Process Capacity Available	2023	2024	2025	2026	2027	Comments
Oil						
Gas export						
Gas compression						
Gas lift						
Produced water						
Dehydration						
H2S removal						
Water reinjection
