Indonesia's partner for  
more than *55 years*  
and counting

**Our purpose is  
reimagining energy for  
people and our planet.  
We want to help the  
world reach net zero and  
improve people's lives.**

We have been delivering energy solutions for Indonesia for more than **55 years**, and we will continue to deliver long-term value for our customers, communities and all our stakeholders in Indonesia.

Our energy solutions for Indonesia range from

Hydrocarbon production & operations

to

Energy trading & shipping, and  
retail products

# Castrol Indonesia

## The home of Liquid Engineering

Castrol lubricants are trusted for their high performance and quality.

Since 1997 when we built Indonesia's first private lubricants blending plant, Castrol has been serving drivers, motorcyclists, and industries in the country. We do this through Liquid Engineering. That means creating high performance oils, lubricants, fluids and greases for every application you can imagine.

Today we operate a 80,000 mtpa, fully-automated plant in Merak, Banten.

Castrol is a valued partner to our customers and communities. We do this through partnerships with small and medium enterprises, and helping hundreds of automotive workshops as well as large-scale industries grow successful business.

# PT Aneka Petroindo Raya

Since its first site operation in 2018, the number of service stations operated by bp-AKR has grown steadily. Today we operate 42 service stations all over Greater Jakarta (Jabodetabek), West Java and East Java regions.

bp-AKR is highly optimistic about its business growth in Indonesia and therefore invites both individual and corporate investors to join and be part of bp fuels retail business partners in Indonesia. In addition to allowing partners to develop their properties, bp-AKR provides support entirely from the planning, constructing, all the way to operations and ensures that staff are qualified to deliver services that are up to par with operational standards.

bp-AKR officially launched its latest high-quality fuel in Indonesia, bp Ultimate with ACTIVE technology, in November 2022 for Greater Jakarta (*Jabodetabek*) area and in April 2023 for East Java area. bp Ultimate with ACTIVE technology is an innovative product, that contains a special formula which is designed to help clean and at the same time protect the engine from dirt build-up. Using bp Ultimate with ACTIVE technology helps vehicle engine become cleaner, smoother and go further\* between fill-ups.

bp-AKR is committed to expand its modern service stations network to answer the needs of Indonesian people, offering not only quality fuels and services, but also integrated facilities to cater the needs of modern consumers who are constantly mobile. In October 2022, bp-AKR introduced **wildbean café** at bp Pangeran Antasari service station, South Jakarta which is the first coffee shop in Indonesia which is owned and managed by bp-AKR.

With the opening of **wildbean café**, bp-AKR service station offers customers the experience of bp's owned coffee brand, as well as a variety of unique coffee blends infused with local flavour, local snacks and meals to satisfy the Indonesian palate. Our fresh barista-made coffee is proudly made using 100% freshly ground Indonesia coffee beans.

With the presence of our new product innovations, bp-AKR is committed to always serve Indonesian community and to be part of their enjoyable everyday travel companion (#TemanPerjalanan).

\*bp Ultimate helps remove harmful dirt from critical engine parts which, with ongoing use, can help engines perform at their best, run smoothly and help restore and maintain fuel economy. Actual results may vary due to factors including vehicle type, engine condition and driving style.

# PT Dirgantara Petroindo Raya

Air bp and AKR see huge potential within the Indonesian aviation fuel sector and will support the development of Indonesia's aviation industry. Our joint venture holds the remit to develop aviation fuel business in Indonesia.

We are the jet fuel supplier for Wiladatika Private Airport in Jakarta, and we operate a jet fuel storage and provide into plane filling service at the Indonesian Morowali Industrial Park, Sulawesi Tengah.

# PT Jasatama Petroindo

PT Jasatama Petroindo is bp's trading & shipping arm in the country. PT Jasatama Petroindo has extensive experience in trading gas oil for mining and industrial purposes, as well as fuel oil for Marine Vessel Plants. We have been operating in Indonesia's gas oil market since 2010, and expanded our portfolio to the limited trading of fuel oil in 2018.

In support of a just energy transition, we help the next generation of Indonesians advance their education. For over five years, PT Jasatama Petroindo has been providing scholarships to university students in the country, focusing on engineering and economics.

# Tangguh LNG

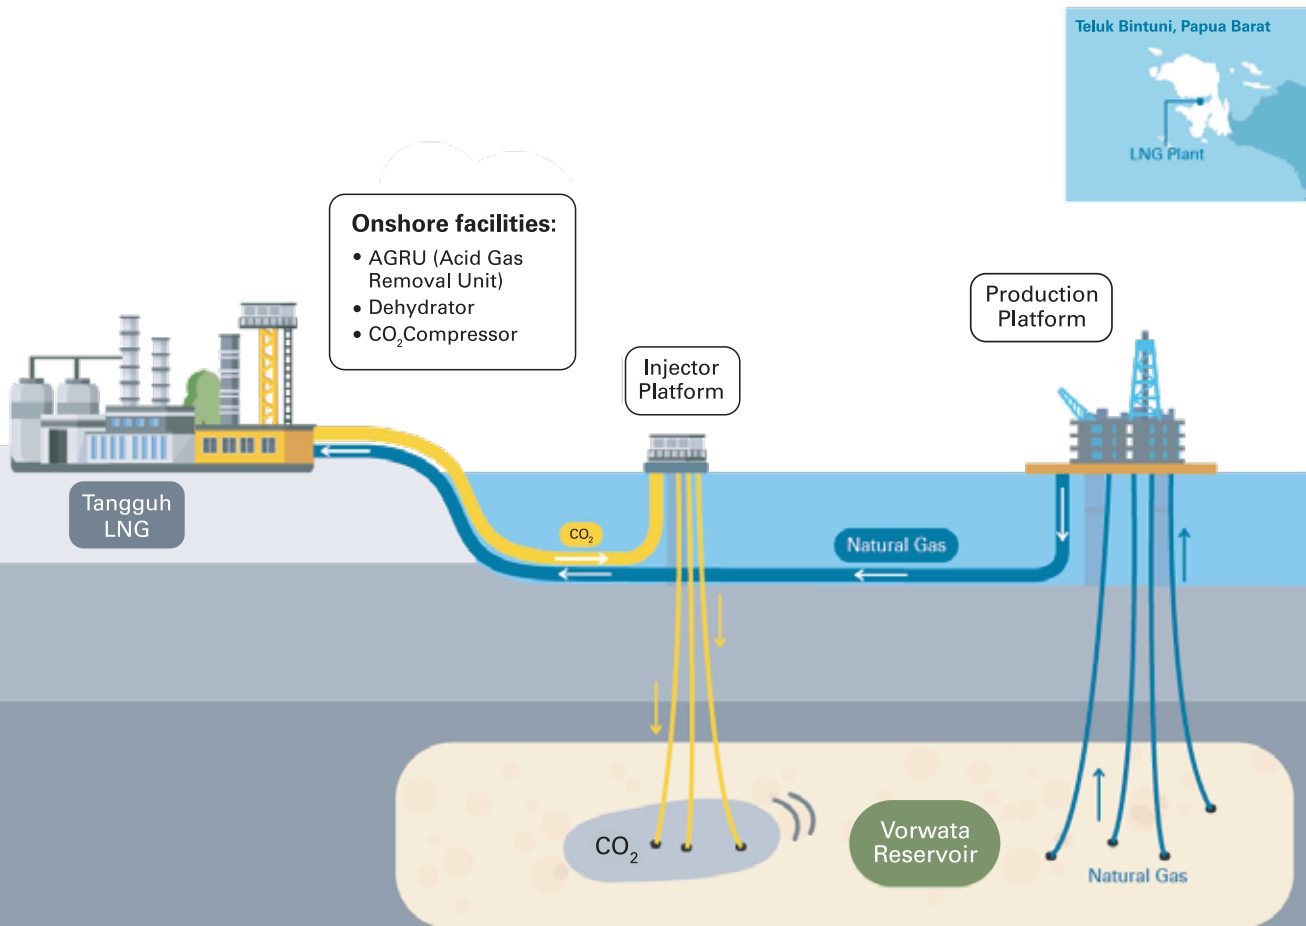

bp has been operating Tangguh LNG since 2009. Located in Teluk Bintuni, Papua Barat Province it is a fully integrated LNG operations – from bringing gas from the bay, to processing it in our two-train onshore liquefaction facility, and delivering the LNG to customers.

We are currently working to expand the Tangguh LNG plant by adding a third train, which will increase Tangguh's production capacity to a total of 11.4 million tonnes per annum (mtpa). Tangguh train 3 was deemed a National Strategic Project, as per Presidential Decree No. 58/2017.

More than 99% of our team is Indonesian, with more than half of our people being local Papuans.

# Reimagining Indonesia's energy

## Schematic diagram of Vorwata CCUS

### — **Vorwata carbon capture utilization and storage (CCUS)**

It will remove up to 90% of the reservoir-associated CO<sub>2</sub>, which is currently vented and represents nearly half of the Tangguh LNG emissions.

### — **Andaman II block**

30% non-operating interest in Andaman II block, 150 km offshore Aceh, with Harbour Energy.

### — **Agung I and II exploration blocks**

bp has signed a 30-year production sharing contract for Agung I and Agung II exploration blocks in offshore Bali, East Java, West Nusa Tenggara and South Sulawesi with the government of Indonesia.

# *Delivering value* to communities

---

Alongside our net zero ambition and aims. We have also set out aims to help improve people's live and care for our planet.

In Indonesia, our Tangguh sustainable development programmes support the social sustainability of Tangguh LNG. The programmes help Papuans in:

Community health

Livelihood and Papuan entrepreneurship

Education

Governance

Papuan development

External relations

Since these programmes were first implemented in 2005, Papua Barat - particularly communities in the villages around Tangguh LNG - has benefited from the continual development of Tangguh plant.

## Programme highlights

More than

**US\$ 40 million**

have been invested in social investment programmes since 2006, covering health, education, governance, community development and entrepreneurship programmes for Papuans.

Scholarship programme for Papuan students, including a three-year Tangguh technician apprentice programme where selected Papuan students can obtain international certification and be part of Tangguh's future talent pool.

Over

**1,300 Papuan students**

so far have received scholarships for high schools and universities.

Initiated an alternative energy pilot project to help meet the communities' demand for electricity, by building the first solar panel and wind turbine at a number of public facilities in Arguni and Taroy Districts in Bintuni.

More than

**Rp 4 trillion**

in contract value with 30 Papuan companies involved in the supply chain for Tangguh project from 2006.

Tangguh LNG, together with Teluk Bintuni Regency and Papua Barat Provincial Governments, facilitated COVID-19 vaccine distribution and vaccination programme in Teluk Bintuni, for surrounding communities and Tangguh workers.

Tangguh LNG, together with Fakfak Regency Government, provided 500 food supply packages for communities, to help with economic recovery to those impacted by COVID-19.

Provided capacity-building trainings for Tangguh workers coming from surrounding villages such as English, computer skills and machinery.

Since 2017, more than

**3,500 Indigenous Papuans**

from Bintuni and Fakfak have worked in Tangguh Train 3 project, as well as participated in training programmes to upskill and access better work opportunities in the future.

**72.7% of workers**

in Tangguh operations are from Papua (data as per December 2022).

Since 2015, SUBITU – a local business run by indigenous communities with Tangguh's support – has expanded into

**8 business units**

in Teluk Bintuni, Sorong, and Manokwari. Among them are:

- Subitu Trans Maritim has partnered with Tangguh for crew change transportation from North Shore of Teluk Bintuni.
- Subitu Karya Teknik is a provider of scaffolding workers for Tangguh LNG.

## Who We are

Defines what we stand for at bp. It builds on our best qualities and those things that are most important to us, while putting an even greater focus on how we can take bp to the next level.

We believe that bringing to life all three of these beliefs will give us the energy and drive to deliver our purpose and ambition.

## Live our purpose

### Safety comes first

Look after each other and our company – in the real world and online

### Make a positive impact

Everywhere we work – and with everyone we work with

### Do the right thing

Always follow our code

# Play to Win

## Know the competition

There is always someone better – we seek out different views and learn from them

## Keep improving

Become more agile, more digital and more efficient with the money we spend

## Be accountable

We follow through on our promises – when we can't – or make mistakes – own it

# Care for others

## Be kind

Get to know those you work with, show real interest, be supportive

## Prioritize the team

Leave your ego at the door, be inclusive, collaborative and open to honest feedback

## Put yourself in other people's shoes

Especially our partners, suppliers and customers – ask how we can help them

*Reimagining*  
*energy* for people and  
our planet
