USPL One Map (cloud edition) authentication
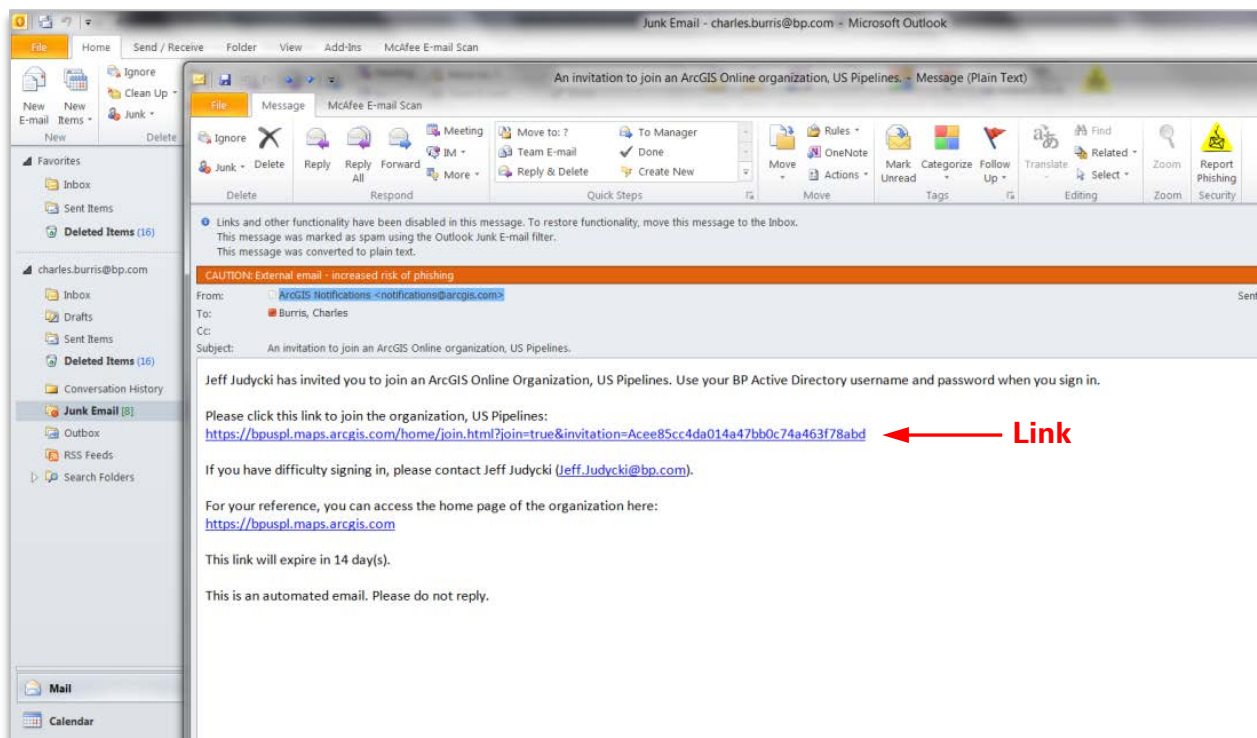

User setup

Purpose

This document provides instructions to log in to the USPL One Map (cloud edition) for the first time. This will allow you to download and use the digital repair and inspection report (R&IR) and access BP's One Map. The USPL One Map (cloud edition) service uses BP credentials for single sign-on. Users are required to have a registered NTID or an assigned account through the GIS administrator. If you need assistance to access the USPL One Map (cloud edition) service, please contact Jeff Judycki (Jeff.Judycki@bp.com).
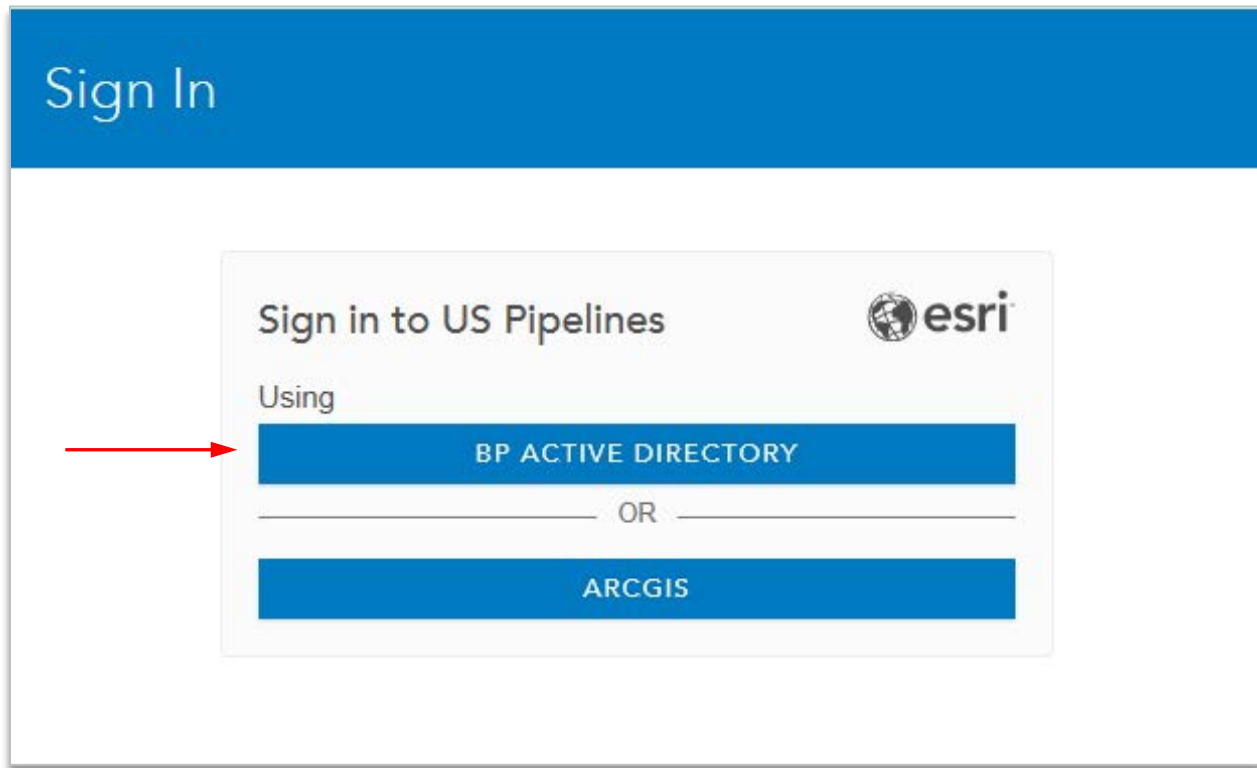

Steps for first-time setup

1. Mobile accounts for the USPL One Map (cloud edition) are assigned by a site administrator. Please contact Jeff.Judycki@bp.com to set up new account.
2. You will receive an email message from the site administrator with instructions to log in to the system, as depicted below.
   a. The email will be sent by ArcGIS Notifications.
   b. Be sure to use the link provided to access the system, since it is tied to your credentials to use mobile applications. Do not share this link with others.
   c. If you do not see the email contact your GIS Administrator as it may have landed in your junk email folder.

USPL One Map (cloud edition) authentication

3. Upon opening the link, the sign in screen will appear. Select 'BP Active Directory'.

4. The home screen will appear with your name at the top right, signifying that your credentials have been validated.
