

The new generation in
fleet management has arrived

The Masana and bp Partnership

Masana Petroleum Solutions is a strategic partner to bp Southern Africa, one of the largest oil companies in the country. We are a leading supplier of a range of petroleum products and solutions across various B2B sectors and have delivered superior customer services for over ten years.

We are more than 58% black-owned, of which over 27% is black-female-owned. Our aim is to progressively build relationships across all industries with a reputation for quality products and service excellence.

Commercial road transport is an area of focus for both Masana and bp. We endeavour to provide the leading technology in fleet management solutions. Our vision inspired us to develop innovative offers, including bp FleetMove Plus and bp FleetMove Premium, which are a new generation fleet management solutions.

Powered by Masana and supported by bp, the bp FleetMove offer is an innovative real-time fleet monitoring solution designed to reduce fraud, manage vehicles and reduce operating costs. It offers packages suitable for commercial road transport operations of all sizes.

Masana is a B-BBEE rated supplier and partner of bp and Castrol.

What is bp FleetMove?

bp FleetMove is an innovative real-time fleet monitoring solution designed to reduce fraud, manage vehicles and reduce operating costs. It offers packages suitable for commercial road transport operators of all sizes.

Introducing our innovative offers, which include:

- **bp FleetMove Card**
- **bp FleetMove Plus**
- **bp FleetMove Premium**

Offering business owners the peace of mind of an expertly managed fleet by giving them full control every kilometre of the way.

bp FleetMove offers a complete cashless solution to reduce every aspect of fuel fraud.

It gives real-time control of refuelling and vehicle management to Fleet Managers via web portals and mobile applications. It substantially reduces operating costs.

Why bp FleetMove?

bp FleetMove is designed to take control of your fleet in an easy and convenient way, allowing you to focus on other key priorities.

Everyday, brighter

Meet the new generation in fleet management

There's a bp FleetMove solution for you!

bp FleetMove Card

bp, in partnership with Absa, has designed an innovative smart card solution to make things go your way. The bp FleetMove Card is the ideal offer for a small vehicle fleet, designed to take advantage of bp's network, fuel expertise and quality.

The bp FleetMove Card gives you the following benefits:

Controlled Spending

Efficient, flexible ways to control your spending.

Save Time

Manage day-to-day admin with minimal time and effort.

Added Value

Great rewards with every swipe.

bp Fuel Quality and Expertise

Trust the experts in fuel technology for over 100 years to fuel your fleet.

bp FleetMove

MASANA
Fuelling Excellence

bp FleetMove Plus

09

Vehicle tracking via a Telematics device is provided. Fleet Managers can make operational decisions immediately.

10

Telematics Web Portal is provided. Vehicle status such as location, speed, angle, engine on/off and fuel level is available in this portal in real-time. The Fleet Manager is also able to perform route monitoring on any vehicle.

11

Fuel In Tank security is provided. Changes in vehicle fuel levels are compared to pump transactions in real-time and email notifications or SMS alerts are sent if a threshold variance is breached.

05

Email notification and SMS alerts are sent in **real-time** for any behaviour or pattern that transgresses a refuelling rule. Fleet Managers can act immediately against transgressors.

06

Fleet Managers have access to all transactions, pricing reports, refuelling rules, etc. in a **Fleet Management Web Portal** in real-time. Fleet Managers can make operational decisions immediately.

07

Fleet Managers have complete and **immediate control over all refuelling rules** and can change any driver or vehicle profile on the web portal.

08

Fleet Managers will have access to a **Comprehensive refuelling network** that includes bp sites as well as Masana partner sites. Customer needs will drive the refuelling footprint.

12

Anti-syphoning control & detection is provided as fuel levels are constantly monitored. When a sudden drop in fuel level is detected an email notification or SMS alert is sent immediately enabling the Fleet Manager to manage fraud.

13

Driver behaviour can be monitored via **Geo-fencing control**. Fleet Managers will receive an email notification or SMS alert as soon as a vehicle enters or leaves the Geographic Fence that has been set up.

14

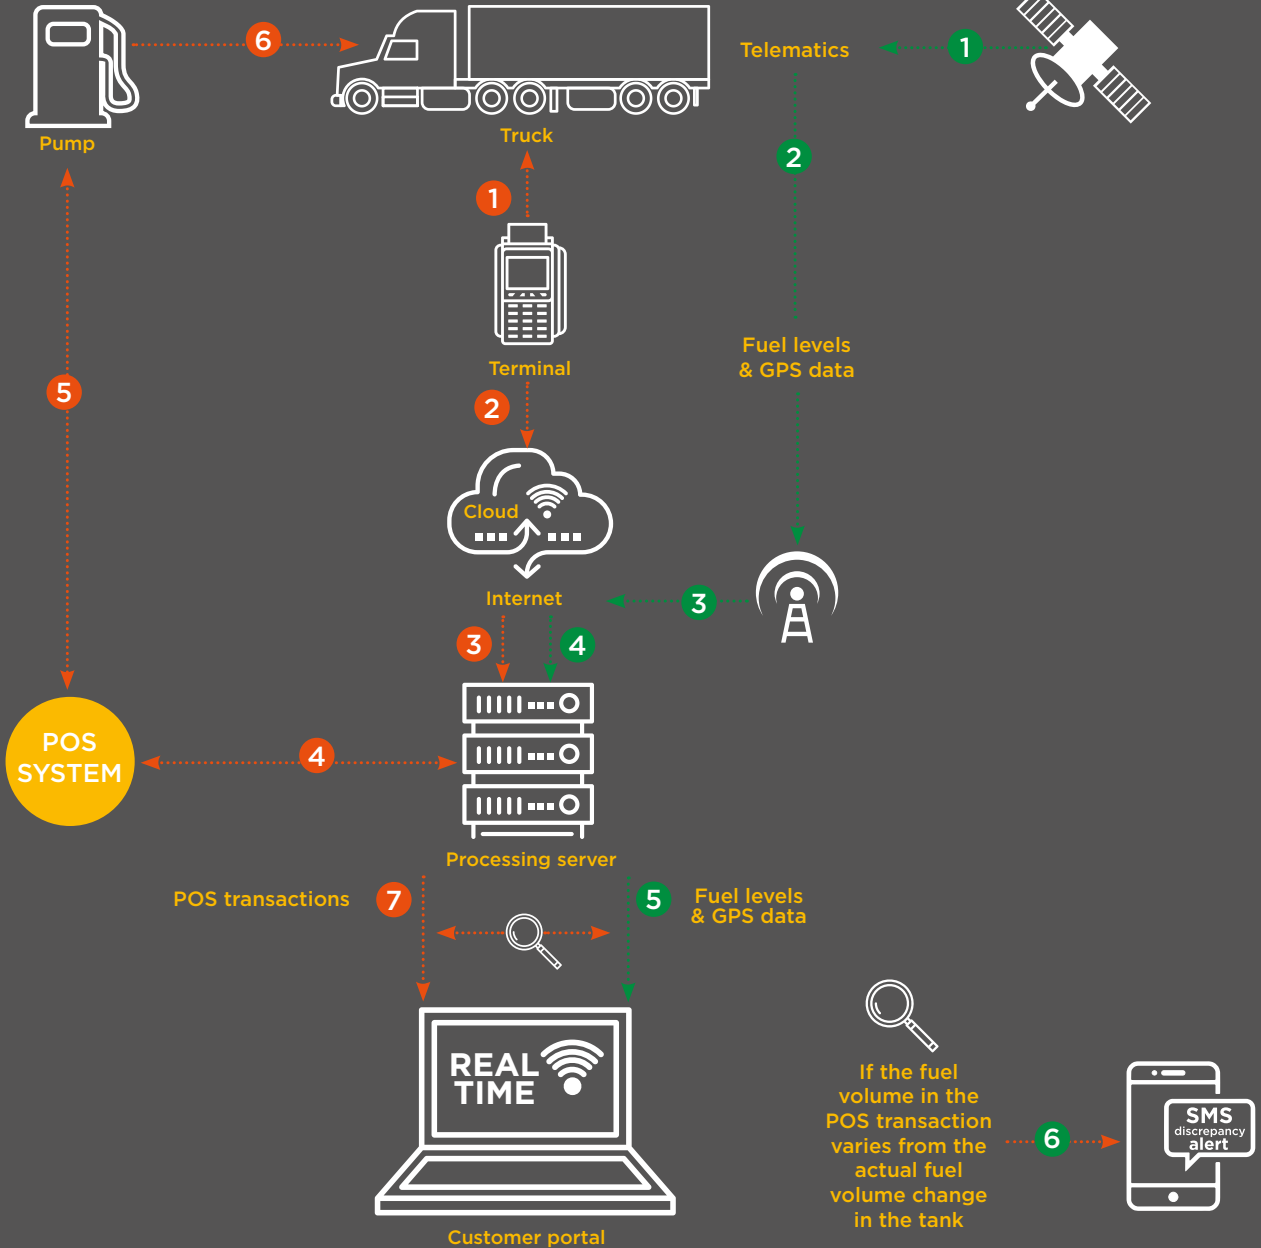

Full historical telemetry data access and web portal management of additional plug-ins such as collision detection, etc. is **Optional**.

How bp FleetMove Works

● bp FleetMove Plus

● bp FleetMove Premium
(In addition to bp FleetMove Plus)

Tamper proof vehicle tag

bp FleetMove's innovative vehicle tag technology means this is a completely paperless system, offering convenience and ease of use.

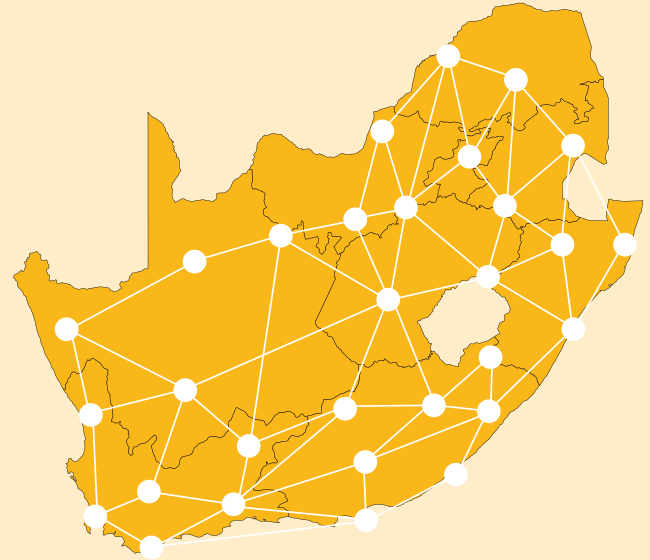

The tag is tamper proof and cannot be transferred to another vehicle, this reduces fraud as refuelling transactions can only take place if the vehicle is on-site.

Our footprint

It's important that your drivers stay on track and that every journey is as fuel efficient as possible. With bp FleetMove your fleet has access to an extensive network of more than 500 bp service stations, complimented by a growing network of Masana partner sites in remote locations that can be easily enabled. A 24-hour dedicated customer support service ensures you and your drivers will remain in the driver's seat.

With Geo-fencing control the fleet manager will be notified when a vehicle enters or leaves the Geographic Fence that has been set up.

Fuel In Tank (FIT) Security

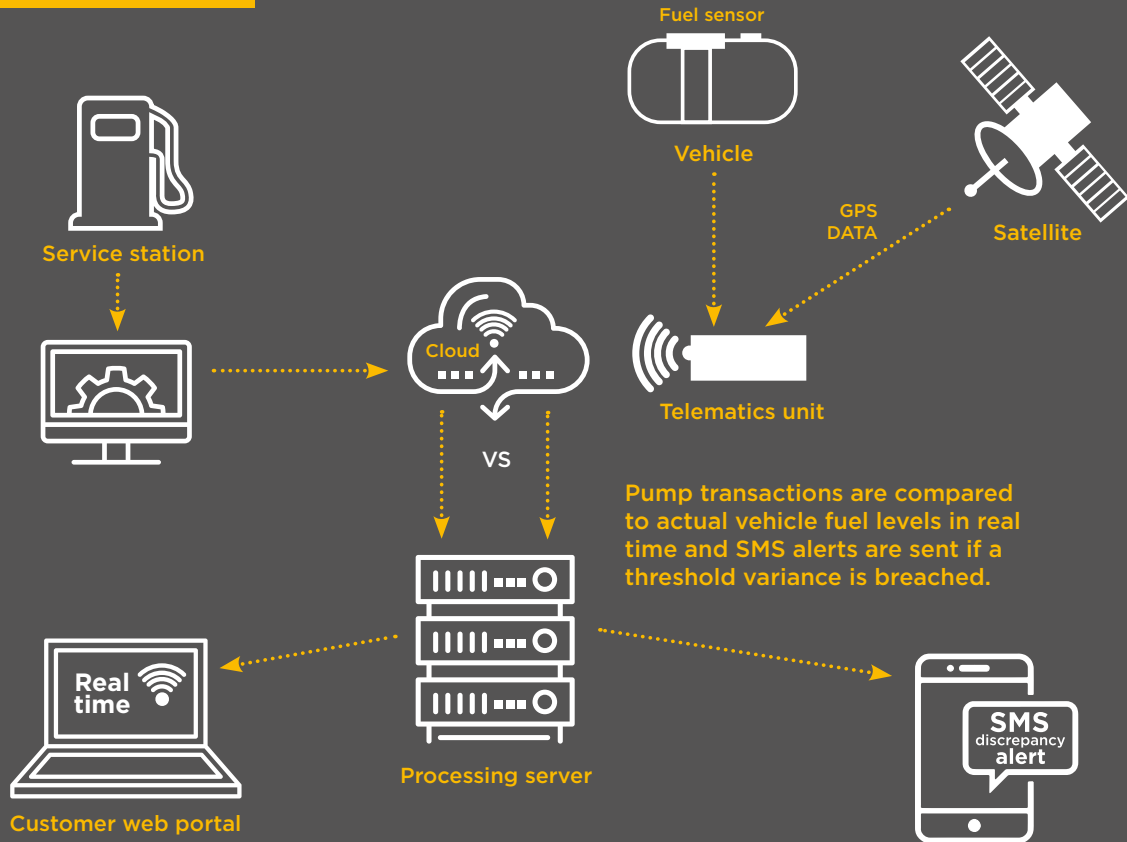

The major benefit of **bp FleetMove Premium** is FIT security.

Each of your vehicles will be fitted with a fuel level sensing device. This device allows you to compare all vehicle fuel levels to pump transactions in real-time.

Should any previously approved threshold variance be breached, you will receive an SMS or email alert immediately.

How it Works

Telematics

When signing up for **bp FleetMove Premium** each vehicle in your fleet is fitted with a Telematics tracking device which offers vehicle tracking via a web-based telematics portal. This means Fleet Managers can make operational decisions immediately.

This Telematics portal offers a host of benefits. Real-time data means driver behaviour can always be monitored, and Fleet Managers will receive reports which highlight various problem areas and trends. The system replaces virtually all manually captured data and assists with route compliance, as well as provide actual fuel used per trip.

These small changes are sure to have a significant impact on day-to-day business operations.
